Energy Efficient Buildings Zhiqiang John Zhai,2022-10-04 Energy Efficient Buildings A complete and authoritative discussion of the fundamentals of designing and engineering energy efficient buildings In Energy Efficient Buildings: Fundamentals of Building Science and Thermal Systems, distinguished engineer and architect Dr. John Zhai delivers a comprehensive exploration of the design and engineering fundamentals of energy efficient buildings. The book introduces the fundamental knowledge, calculations, analyses, and principles used by designers of energy efficient buildings and addresses all essential elements of the discipline. An essential guide for students studying civil, architectural, mechanical, and electrical engineering with a focus on energy, building systems, and building science, the book provides practical in-class materials, examples, and actual design practices, as well as end-of-chapter questions (with solutions) and sample group projects. Readers will find: A thorough introduction to the cross-disciplinary approach to the design of energy efficient buildings Comprehensive explorations of all critical elements of energy efficient building design, including standards and codes, psychometrics, microclimate, thermal comfort, indoor air quality, HVAC systems, and more In-depth discussions of the foundational knowledge, calculations, analysis, and principles needed to design energy efficient buildings Practical in-class examples and end-of-chapter questions with solutions for students, and design guidance and sample group projects for use in course lectures and actual design practices. Perfect for graduate and advanced undergraduate students studying building environmental systems, building systems in construction, and mechanical and electrical systems in construction, Energy Efficient Buildings: Fundamentals of Building Science and Thermal Systems will also earn a place in the libraries of practicing civil, architectural, and mechanical engineers.

Guide to Mold Toxins Gary Rosen,2006 The latest medical science shows 1 in 4 children are sensitive to low levels of mold toxins. Is your child one of these? Now a top gun physician & medical innovator teams up with an accomplished scientist & master builder to clearly explain how even small amounts of hidden indoor mold-produced biotoxins can subtly impact youth behavior, emotions, health and learning. In their easy-to-read prophetic book, they offer solutions based on the latest medical and scientific research that work for both bodies and buildings ... restoring quality of life to children and parents--Page 4 of cover.

You will familiarize yourself with the main aspects of this delicate balance in relation to gut function.

Indoor Air Pollution Control Thad Godish,1989-10-31 This is an all new book designed to provide you the practical information and data you need for indoor air pollution control! Presented early in the book is theory as support for the applications that follow; including a synthesized review of the significant literature on controlling air pollution. Practical applications-largely from the author's own experience-deal with 1) How to conduct indoor air quality investigations in both residences and public access buildings, 2) Indoor air quality mitigation practice, and 3) Case histories. This book will be very useful to consultants and other professionals who grapple to solve real world problems. And it will make an excellent textbook for new courses in indoor air quality. Indoor Air Pollution Control will be used for control and prevention of contaminated air in homes, apartment buildings, office buildings (large and small), hospitals, auditoriums, and other public buildings.

Mold Remediation in Schools and Commercial Buildings ,2001

Surviving Mold Ritchie C. Shoemaker,2010 Microbes, especially molds and bacteria, growing in water-damaged buildings make people sick. The book follows *Mold Warriors* (published in 2005) as the definitive source of information on mold illness, its basis in inflammation, its physiology and its links to politics, lawsuits and science. It has true stories, regarding this increasingly common problem in the US and around the world. If you already know that you could be sickened by mold-damaged buildings, this book will guide you through diagnosis and treatment, through remediation and return to health.

Locating Hidden Toxic Mold ,

Toxic Neil Nathan,2018-10-09 Millions of people are suffering from chronic illnesses that, unbeknownst to them, are the result of exposure to environmental toxins and infectious agents such as mold and *Borrelia*, which causes Lyme disease. Millions. Because the symptoms of these illnesses are so varied and unusual, many of these individuals have sought medical care only to be dismissed, as if what they are experiencing is "in their head." Many (if not most) have tried to tough it out and continue to function without hope of improvement. Unfortunately, their illnesses are very real. *Toxic* is a book of hope for these individuals, their loved ones, and the physicians who provide their care. Over many years of helping thousands of patients recover their health (even after their previous doctors had given up on them), Dr. Neil Nathan has come to understand some of the most common causes for these debilitating illnesses, which allows for the utilization of more precise and effective forms of treatment. The goal of this book is to shed light on these complex illnesses so that suffering patients and their families can get the help they so desperately need. Inside, you will find:

- Information about how extreme sensitivity and toxicity develop in the body, how sensitivity and toxicity differ, and how they often overlap
- Detailed descriptions of each of the five major causes of extreme sensitivity and toxicity: mold, Bartonella (a co-infection of Lyme disease), mast cell activation, porphyria, and carbon monoxide poisoning
- An outline of the cell danger response, a revolutionary model developed by Dr. Robert Naviaux that explains how the body essentially gets "stuck" fighting a threat even after the danger has passed
- A system-by-system plan for "rebooting" the body to break the cycle of illness and allow healing to begin
- Information about coping with stress and embracing an emotional and/or spiritual awakening on the path to wellness

Green Building RSMMeans,2011-01-19 A unique cost reference, updated and expanded, for architects, engineers, contractors, building owners, and managers Green building is no longer a trend. Since the publication of the widely read first edition of this book, green building has become a major advancement in design and construction. Building codes and standards have adopted much stricter energy efficiencies. Businesses, institutions, and communities have discovered huge savings, along with health and marketing advantages, in sustainable building. Private facilities, as well as public buildings for Federal, state, and local governments are increasingly required to design and build sustainably in both new construction and renovation. This Third Edition has been updated with the latest in green building technologies, design concepts, standards, and costs. The chapters, case studies, and resources give you practical guidance on green building, including the latest on: Green building approaches, materials, rating systems, standards, and guidelines Energy efficiencies, implementing energy modeling tools Designing and specifying, as well as commissioning, green building projects Often-specified products and materials, as well as a sample spec Goals and techniques for health, comfort, and productivity Evaluating the cost versus value of green products over their life cycle Low-cost green strategies, and special economic incentives and funding Building deconstruction and cost considerations With a new chapter on greening of commercial real estate, this reference is a one-stop resource for the latest in green building approaches and implementation. The contributors, all prominent leaders in green building, include: Mark Kalin, FAIA, FCSI, author of the original GreenSpec Andy Walker, Ph.D., PE, senior engineer with NREL Joseph Macaluso, AACE, certified cost consultant
