The Many Deaths of Tsar Nicholas II Wendy Slater, 2007-06-26 How did Nicholas II, Russia's last Tsar, meet his death? Shot point blank in a bungled execution by radical Bolsheviks in the Urals, Nicholas and his family disappeared from history in the Soviet era. But in the 1970s, a local geologist and a crime fiction writer discovered the location of their clandestine mass grave, and secretly removed three skulls, before reburying them, afraid of the consequences of their find. Yet the history of Nicholas' execution and the discovery of his remains are not the only stories connected with the death of the last Tsar. This book recounts the horrific details of his death and the thrilling discovery of the bones, and also investigates the alternative narratives that have grown up around these events. Stories include the contention that the Tsar's killing was a Jewish plot, in which Nicholas' severed head was taken to Moscow as proof of his death; tales of would-be survivors of the execution, self-confessed children of the Tsar claiming their true identity; and accounts of miracles performed by Nicholas, who was made a saint by the Russian church in 2000. Not least among these alternative narratives is the romanticization of the Romanovs, epitomized by the numerous photographs of the family released from the Russian archives.

Global Nomads Anthony D'Andrea, 2007-01-24 *Global Nomads* provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, *Global Nomads* develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

Organization and Financing of Public Health Services in Europe Who Regional Office for Europe, Centers of Disease Control, 2018-06-29 What are public health services? Countries across Europe understand what they are or what they should include differently. This study describes the experiences of nine countries detailing the ways they have opted to organize and finance public health services and train and employ their public health workforce. It covers England France Germany Italy the Netherlands Slovenia Sweden Poland and the Republic of Moldova and aims to give insights into current practice that will support decision-makers in their efforts to strengthen public health capacities and services. Each country chapter captures the historical background of public health services and the context in which they operate; sets out the main organizational structures; assesses the sources of public health financing and how it is allocated; explains the training and employment of the public health workforce; and analyses existing frameworks for quality and performance assessment. The study reveals a wide range of experience and variation across Europe and clearly illustrates two fundamentally different approaches to public health services: integration with curative health services (as in Slovenia or Sweden) or organization and provision through a separate parallel structure (Republic of Moldova). The case studies explore the context that explain this divergence and its implications. This study is the result of close collaboration between the European Observatory on Health

Systems and Policies and the WHO Regional Office for Europe Division of Health Systems and Public Health. It accompanies two other Observatory publications Organization and financing of public health services in Europe and The role of public health organizations in addressing public health problems in Europe: the case of obesity alcohol and antimicrobial resistance (both forthcoming).
