An Introduction to Financial Option Valuation Desmond Higham, 2004-04-15

This is a lively textbook providing a solid introduction to financial option valuation for undergraduate students armed with a working knowledge of a first year calculus. Written in a series of short chapters, its self-contained treatment gives equal weight to applied mathematics, stochastics and computational algorithms. No prior background in probability, statistics or numerical analysis is required. Detailed derivations of both the basic asset price model and the Black-Scholes equation are provided along with a presentation of appropriate computational techniques including binomial, finite differences and in particular, variance reduction techniques for the Monte Carlo method. Each chapter comes complete with accompanying stand-alone MATLAB code listing to illustrate a key idea. Furthermore, the author has made heavy use of figures and examples, and has included computations based on real stock market data.

In the Shadow of Jezebel (Treasures of His Love Book #4) Mesu

Andrews, 2014-03-04 Princess Jehosheba wants nothing more than to please the harsh and demanding Queen Athaliah, daughter of the notorious Queen Jezebel. Her work as a priestess in the temple of Baal seems to do the trick. But when a mysterious letter from the dead prophet Elijah predicts doom for the royal household, Jehosheba realizes that the dark arts she practices reach beyond the realm of earthly governments. To further Athaliah and Jezebel's strategies, she is forced to marry Yahweh's high priest and enters the unfamiliar world of Yahweh's temple. Can her new husband show her the truth and love she craves? And can Jehosheba overcome her fear and save the family--and the nation--she loves? With deft skill, Mesu Andrews brings Old Testament passages to life, revealing a fascinating story of the power of unconditional love.

The Unprecedented 2016 Presidential Election Rachel Bitecofer,2017-10-10

This book explains the 2016 presidential election through a strategic focus. In the primaries both parties faced challenges from insurgent outsiders riding waves of populist fervor in the electorate, but only the Democrats were able to steer the nomination into the hands of their establishment favorite. Why weren't Republican elites able to stop Donald Trump from hijacking their party's nomination? Why did Hillary Clinton come up short on Election Day despite the fact that nearly everyone expected her to win after her opponent ran a haphazard campaign plagued by scandal after scandal? The research presented here argues that the Clinton campaign conducted the nearly perfect execution of the wrong electoral strategy, costing her the Electoral College and her chance to become America's first female president.

Exchange Rate Regimes and Macroeconomic Stability Hong Kong Economic Association,2003 The Asian crisis of 1997-1998 was a major influence on macroeconomic thinking concerning exchange rate regimes, the functioning of international institutions, such as the IMF and the World Bank, and international contagion of macroeconomic instability from one country to another. *Exchange Rate Regimes and Macroeconomic Stability* offers perspectives on these issues from the viewpoints of two Nobel Laureates, an IMF economist, and Asian economists. This book contributes new ideas to the ongoing debate on the role of domestic monetary authorities and international institutions in reducing the likelihood of international financial crises, as well as the problems associated with various exchange rate regimes from the standpoint of macroeconomic stability. Overall, the chapters contained in this volume offer interesting perspectives, which have been stimulated by the recent events in the foreign exchange market. They provide a useful reference for anyone interested in the development of exchange rate regimes, and represent considerable reflection by economists half a century after Bretton Woods.

Lake Victoria Fisheries Resources Yunus D. Mgaya, Shigalla B.

Mahongo, 2017-11-28 This book synthesises the historical trends of the lake fisheries, the lake ecology, biology and biodiversity, socio-economics, stock assessment, aquaculture, fish quality assurance, environmental quality and management of the fisheries resources. The evolution of fisheries in Lake Victoria has undergone dramatic changes over the last few decades, leading to both ecological and socio-economic consequences. The lake has changed from one dominated by haplochromines in the 1950s, to one currently dominated by Nile perch, 'dagaa' (*Rastrineobola argentea*) and Nile tilapia. These changes have mainly been driven by the introduction of the predatory Nile perch in the lake, eutrophication due to increased human activities in the catchment, increased human population growth, overfishing and changes in the global climate system. This work should therefore be a particularly useful reference to fisheries scientists and managers, potential investors, students and other professionals who may be interested in the Lake Victoria fisheries.

Effectiveness and Impact of Corporate Average Fuel Economy (CAFE) Standards

National Research Council, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on the Effectiveness and Impact of Corporate Average Fuel Economy (CAFE) Standards, 2002-01-29 Since CAFE standards were established 25 years ago, there have been significant changes in motor vehicle technology, globalization of the industry, the mix and characteristics of vehicle sales, production capacity, and other factors. This volume evaluates the implications of these changes as well as changes anticipated in the next few years, on the need for CAFE, as well as the stringency and/or structure of the CAFE program in future years.
