**Urban Mobility Systems in the World** Gaelle Lesteven, 2024-01-11 Urban Mobility Systems in the World provides insight into the geographical organization of urban mobility systems around the world. These “systems” consist of infrastructure networks, existing transport services and people’s travel practices. Adopting a comparative approach, the book highlights the geographical diversity of mobility systems, based on case studies from Africa, North and South America, Asia and Europe. This multi-disciplinary book is organized into twelve chapters, divided into four parts. The first part gives an overview of urban mobility, and then examines the factors that determine everyday mobility in cities, revealing different travel practices among populations (poor, elderly and children). Parts 2 and 3, respectively, focus on urban public transport (trains, metros, minibuses) and active modes of transport (walking, cycling), and the related infrastructure policies. The final section examines the circulation of urban mobility analysis tools and public policy models

**Mobility and Locative Media** Adriana de Souza e Silva, Mimi Sheller, 2014-08-07 Mobilities has become an important framework to understand and analyze contemporary social, spatial, economic and political practices. Especially as mobile media become seamlessly integrated into transportation networks, navigating urban spaces, and connecting with social networks while on the move, researchers need new approaches and methods to bring together mobilities with mobile communication and locative media. Mobile communication scholars have focused on cell phones, often ignoring broader connections to urban spaces, geography, and locational media. As a result, they emphasized virtual mobility and personalized communication as a way of disconnecting from place, location and publics. The growing pervasiveness of location-aware technology urges us to rethink the intersection among location, mobile technologies and mobility. Few studies have addressed the many transformations taking place in mobile sociality and in urban spatial processes through the appropriation of these technologies. Chapter 12 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.

**Mobility Aware Technologies and Applications** Thomas Magedanz, Ahmed Karmouch, Samuel Pierre, Iakovos Venieris, 2005-11-16 The beginning of the twenty-first century is characterized by global markets, and the mobility of people is becoming an important fact of life. Consequently, the mobile user is demanding appropriate technical solutions to make use of customized information and communication services. In this context the notion of next-generation networks (NGNs), which are driven by the convergence of the entertainment sector, the mobile Internet, and fixed/mobile telecommunications, is emerging. Such NGNs are aggregating a variety of different access networks and supporting the seamless connection of an open set of end-user devices, and due to the adoption of an all-IP network paradigm they enable a much better integration of voice and data services. Coincidentally the buzzword ‘fixed mobile convergence’ (FMC) describes the current trend towards providing common services across fixed and mobile networks resulting in the medium term in the full integration of fixed and mobile telecommunication networks. The adoption of appropriate middleware technologies and the provision of – called service delivery platforms driven by the ongoing innovation in the field of information technologies provides today the technical foundation for supporting terminal, personal and service mobility and thus the implementation of real seamless information and communication services. Furthermore, users are nowadays looking, in light of an omnipresent service environment, for a much higher degree of customization and context awareness in the services they use. The papers in this volume look at these enabling mobility-aware technologies and their use for implementing mobility-aware and context-aware applications.

**Migration and (Im)Mobility** Anna Xymena Wieczorek, 2018-03-31 In her endeavour to overcome the established methodological, conceptual, and empirical dualism of mobility and migration, Anna Xymena Wieczorek develops a mobilities perspective by combining migration studies theories with approaches of the mobility studies. With the help of rich empirical data gathered among young adults of Polish heritage in Germany and Canada, Wieczorek conceptualizes three patterns of (im)mobility which illustrate the diversity of immigrants' geographical movements after their initial migration. She thus reveals the different social configurations promoting or hindering the development, maintenance or shifting of each pattern in migrants' biographical trajectories.

**Tourism, Public Transport and Sustainable Mobility** C. Michael Hall, Diem-Trinh Le-Klähn, Yael Ram, 2017-02-03 This book offers a comprehensive global examination of the relationship between public transport and tourism as well as exploring other sustainable transport modes. It offers a unique view by analysing tourism through the public transport lens and vice versa. The volume provides an account of how the public transport experience can be improved for tourists so that its value can be maximised and a greater number of people can be encouraged to shift modes. It features a wide range of case studies and examples showing how the tourism industry, as well as regional economies, communities and the environment, benefit when public transport is widely used by tourists. The book will be of interest to researchers and students in the fields of tourism and transport as well as destination marketing organisations and tourism, transport and urban planners.

**Residential Mobility in Montreal, 1861-1901** Jason A. Gilliland, Canada Mortgage and Housing Corporation. Scholarship Program, 1993 Studies of present-day household mobility provide a well-developed set of theories, on which several hypotheses were based. Multivariate regression analysis was performed using the binomial logit model to assess the relative effects of ethnicity, tenure, occupational status, age, household size, marital status and rent, on rates of household persistence. --

Transformations in Mobility Gilles Roucolle, 2024-04-03 Transformations in Mobility provides a panoramic overview of the changing mobility business landscape, helping transportation leaders and consultants make sense of the most important trends, challenges and opportunities impacting this sector. Drawing on exclusive interviews from thirty of the most important leaders, experts and financiers in transportation spanning all modes and from around the world, the book delves into the practical lessons learned from a demand, regulatory, strategic, technology and leadership perspective and explores the way mobility might evolve in the future. It looks into pressing issues such as fragmentation of demand in mobility, technological disruptions impacting the sector and how far it is possible to decarbonize transport when it is the world's second biggest source of emissions. Drawing on cutting-edge insights, this book explores mobility's shift from supply-driven to demand-driven growth, the role of regulation and standards, digitalization, the emergence of cross-industry coalitions and the decarbonization agenda and its impact on future transport shares. It offers insightful stories and lessons learned from some of the world's leading industry experts, including some never heard before. It also features exciting case studies such as European Rail Signalling Systems ERTMS and Class 1 Freight Railways in North America.

**Mobility and Transport for Elderly and Handicapped Persons** Norman Ashford, William G. Bell, Tom A. Rich, 2021-05-11 Originally published in 1982 and contributed to by a range of international authors and experts in the field of

transport accessibility, this volume discusses the position of urban and rural transport problems of the elderly and disabled in the UK, USA, Belgium, Canada, France, Germany, The Netherlands and Sweden. Based on research, policy analysis and documental field experience the volume also discusses advances made in relevant technology, major changes in public policy and innovative proposals for system development or change.

*Big Moves* Anthony Perl, Matt Hern, Jeffrey Kenworthy, 2020-09-23 All countries have distinctive urban regions, but Canadian cities especially differ from one another in culture, structure, and history. Anthony Perl, Matt Hern, and Jeffrey Kenworthy reveal that despite the peculiarities and singular traits that each city embodies, a common logic has guided the development of transportation infrastructure across the country. *Big Moves* analyzes how Canada's three largest urban regions - Montreal, Toronto, and Vancouver - have been shaped by the interplay of globalized imperatives, aspirations, activism, investment, and local development initiatives, both historically and in a contemporary context. Canadian urban development follows a distinct pattern that involves compromise between local viewpoints and values and the pursuit of global capital at particular historical junctures. As the authors show, the success or failure of each city to construct major mobility infrastructure has always depended on the timing of investments and the specific ways that cities have gained access to necessary capital. Drawing on urban mobility history and global city theory, this book delves into the details of the big moves that have affected transport infrastructure in major Canadian cities. Knowing where urban development will head in the twenty-first century requires understanding how cities' major mobility infrastructures were built. *Big Moves* explains the shape of Canada's three biggest cities and how their mix of expressways and rapid transit emerged.

**The Rough Guide to Montréal** Arabella Bowen, John Shandy Watson, 2004 Montreal and Quebec City are like outposts of European culture in the heart of Canada just hours from the US, distinctively Canadian but with a palpable French spirit. The Rough Guide to Montreal takes you through everything in great detail, providing informative and entertaining accounts of what the city has to offer in terms of attractions, restaurants, accomodation and its vibrant nightlife. There is extensive coverage of Quebec City, as well as the snow-capped peaks of the Laurentian Mountains and Eastern Townships, all accessible day-trips from Montreal. In each chapter there are detailed maps and plans covering every neighbourhood. The contexts section includes a useful French language section and glossary.

Community Mobility William Mann, 2012-12-06 Affordable, easy-to-use, and flexible transportation options are vital to older adults' quality of life. *Community Mobility: Driving and Transportation Alternatives for Older Persons* provides physical and occupational therapists with recent research findings on older driver assessment, remediation/rehabilitation, and the use of alternatives to the car in the event that older adults need to “retire” from driving. This unique book addresses changes in driving patterns over time, the impact of climate conditions on driving, mental and physical health issues, self-regulation by drivers, and driver safety. *Community Mobility* addresses changes in driving patterns over time, the impact of climate conditions on driving, mental and physical health issues, self-regulation by drivers, and driver safety. This unique book also includes summaries of recent consensus conferences held in the United States and Canada to determine the best approaches to therapist services and counseling. *Community Mobility* examines: the effect of alternative forms of transportation on drivers in declining mental and physical health safety interventions the relationship between chronic illness and an elderly driver’s “home range” road conditions versus driving patterns factors that can act as predictors in mobility patterns self-regulation and adaptation strategies effective remediation techniques a comprehensive driving evaluation (CDE) and much more! *Community Mobility* is an essential resource for anyone working with elderly drivers who face the loss of independence and the decreased access to social activities, medical services, and other basic needs that accompany “retirement” from the driver’s seat.

**Urban Planning for Transitions** Nicolas Douay, Michael Minja, 2021-03-26 Today, as cities undergo rapid and dynamic transformations, riddled with uncertainties about the future, the roles of urban planning and urban planners lie in one of these new crossroad moments. Climate change, urban migration, social inclusion, health emergencies and financial and economic crises have elevated urbanization to newer heights of complexity that can only be tackled by integrating a multitude of scenarios, strategies and discourses, in order to create an urban future that is resilient and sustainable. Urban planners have come up with transition proposals and concepts that they hope will be able to respond to cities’ challenges and ultimately allow them to adapt and make the transition into more robust urban areas. This book presents and discusses various urban transition strategies, action plans and programs that have been proposed or even conducted in different countries all over the world. Different countries require different strategies, but they all have the same goal in mind, each of them trying to address urban complexities and cope with the rapid pace at which the world is evolving.

**Montreal in Evolution** Jean-Claude Marsan, 1990 Montreal in Evolution presents the rich and complex history of Montreal's architectural and environmental development from the first fort of Ville-Marie to the skyscrapers of today. It also examines the forces which shaped the city during the past three hundred and fifty years.

**Recent Social Trends in Quebec, 1960-1990** Simon Langlois, Baillargeon, 1992-02-05 Readers will follow an intense period of social change in Quebec, during which there was a remarkable increase in the level of modernization. They will note a massive entry of women into the labour force and a growing service sector that now constitutes seventy percent of all economic activity. They will observe also that the Québécois have dramatically increased their television viewing and that, while they express a generally high level of satisfaction with life, the Québécois must contend with escalating crime and suicide rates.
