The Lincoln Highway Amor Towles,2021-10-05 #1
NEW YORK TIMES BESTSELLER More than ONE MILLION
copies sold A TODAY Show Read with Jenna Book Club
Pick A New York Times Notable Book, and Chosen by
Oprah Daily, Time, NPR, The Washington Post, Bill
Gates and Barack Obama as a Best Book of the Year
“Wise and wildly entertaining . . . permeated with
light, wit, youth.” –The New York Times Book
Review “A classic that we will read for years to
come.” –Jenna Bush Hager, Read with Jenna book
club “Fantastic. Set in 1954, Towles uses the
story of two brothers to show that our personal
journeys are never as linear or predictable as we
might hope.” –Bill Gates “A real joyride . . .
elegantly constructed and compulsively readable.”
–NPR The bestselling author of *A Gentleman in
Moscow* and *Rules of Civility* and master of
absorbing, sophisticated fiction returns with a
stylish and propulsive novel set in 1950s America
In June, 1954, eighteen-year-old Emmett Watson is
driven home to Nebraska by the warden of the
juvenile work farm where he has just served
fifteen months for involuntary manslaughter. His
mother long gone, his father recently deceased,
and the family farm foreclosed upon by the bank,
Emmett's intention is to pick up his eight-year-
old brother, Billy, and head to California where
they can start their lives anew. But when the
warden drives away, Emmett discovers that two
friends from the work farm have hidden themselves
in the trunk of the warden's car. Together, they
have hatched an altogether different plan for

Emmett's future, one that will take them all on a fateful journey in the opposite direction—to the City of New York. Spanning just ten days and told from multiple points of view, Towles's third novel will satisfy fans of his multi-layered literary styling while providing them an array of new and richly imagined settings, characters, and themes. “Once again, I was wowed by Towles’s writing—especially because The Lincoln Highway is so different from A Gentleman in Moscow in terms of setting, plot, and themes. Towles is not a one-trick pony. Like all the best storytellers, he has range. He takes inspiration from famous hero’s journeys, including The Iliad, The Odyssey, Hamlet, Huckleberry Finn, and Of Mice and Men. He seems to be saying that our personal journeys are never as linear or predictable as an interstate highway. But, he suggests, when something (or someone) tries to steer us off course, it is possible to take the wheel.” – Bill Gates

Neural circuits underlying emotion and motivation: Insights from optogenetics and pharmacogenetics Anton Ilango, Mary Kay Lobo, 2015-06-04 Application of optogenetic and pharmacogenetic tools to study the neural circuits underlying emotional valence, feeding, arousal and motivated behaviors has provided crucial insights into brain function. Expression of light sensitive proteins into specific neurons and subsequent stimulation by light (optogenetics) to control neuronal activity or expression of designer receptors exclusively activated by designer drugs (DREADD) in specific neuronal populations with subsequent activation or suppression of neuronal

activity by an otherwise inert ligand (pharmacogenetics) provides control over defined elements of neural circuits. These novel tools have provided a more in depth understanding into several questions about brain function. These include:

- Regulation of sleep-wake transition by the interaction of hypocretin neurons of lateral hypothalamus and noradrenergic neurons of the locus coeruleus
- Regulation of feeding by AGRP and POMC neurons in arcuate nucleus of the hypothalamus
- Place preference and positive reinforcement by activation of DA neuron of VTA
- Place aversion by activation of VTA GABA and lateral habenula neurons
- Opposing influences on reinforcement by activation of D1 and D2 expressing medium spiny neurons of dorsal striatum and nucleus accumbens

The list still grows... From cell type specific manipulations to signaling properties in the cell (Dietz et al 2012) with unprecedented temporal resolution, these tools revolutionize the exploration of pathways/connectivity. Recent years also witnessed the extension of applying these tools from studying emotional valence and motivated behavior to reactivation of memory. c-fos based genetic approaches allowed us to integrate light sensitive opsins or DREADD receptor into specific neurons that are activated by certain learning events (for example fear) (Garner et al 2012; Liu et al 2012). In this Research Topic, we welcome researchers to contribute original research articles, review articles, methods and commentary on topics utilizing optogenetic and pharmacogenetic tools to study the neural circuits underlying emotional

valence, motivation, reinforcement and memory. We believe the Research Topic will shine light on various questions we have about brain function by using novel optogenetic and pharmacogenetic tools and will hopefully inspire ongoing research to overcome the hurdles of using these tools to advance clinical applications.

Independent Filmmaking and Digital Convergence Vladan Nikolic,2016-12-01 Independent Filmmaking and Digital Convergence: Transmedia and Beyond offers a comprehensive analysis of the technological changes of the past few decades in independent film and media-making, and explores new strategies and practices in media production, exhibition and distribution for independent producers and content creators. The book examines how independent filmmaking concepts have merged with digital and online technologies to create new hybrid multi-platform content creations. It explores key questions like how to reach an audience at a time when media conglomerates and their products dominate the market, and simultaneously, there is an overabundance of content competing for viewer time. The book investigates what kind of stories we tell and why; how the audience has changed, and what their expectations are; what the various niche markets are for independent producers and creators in new

media; and new models for media financing and distribution. The content found in this book: Bridges the gap between professional media-makers and amateurs by focusing on new and emerging media models and practices. Provides a holistic view of the new media landscape, and practical advice on producing content in the new multi-platform media environment. Demonstrates how to create financially sustainable models for independent producers and creators in a shifting and unstable environment, providing many challenges, but also opportunities for independents. The author's website (<http://www.filmconvergence.com/>) supports this book with case studies, news and updates.

No Caption Needed Robert Hariman, John Louis Lucaites, 2007-06 A gaunt woman stares into the bleakness of the Great Depression. An exuberant sailor plants a kiss on a nurse in the heart of Times Square. A naked Vietnamese girl runs in terror from a napalm attack. An unarmed man stops a tank in Tiananmen Square. These and a handful of other photographs have become icons of public culture: widely recognized, historically significant, emotionally resonant images that are used repeatedly to negotiate civic identity. But why are these images so powerful? How do they remain meaningful across generations? What do they expose--and what goes unsaid? In *No Caption Needed*, Robert Hariman and John Louis Lucaites provide the definitive study of the iconic photograph as a dynamic form of public art. Their critical analyses of nine individual icons explore the photographs themselves and their subsequent circulation through an astonishing array of media, including stamps, posters, billboards, editorial cartoons, TV shows, Web pages, tattoos, and more. As these iconic images are reproduced and refashioned by governments, commercial advertisers, journalists, grassroots advocates, bloggers, and artists, their alterations throw key features of political experience into sharp relief. Iconic images are revealed as models of visual eloquence, signposts for collective memory,

means of persuasion across the political spectrum, and a crucial resource for critical reflection. Arguing against the conventional belief that visual images short-circuit rational deliberation and radical critique, Hariman and Lucaites make a bold case for the value of visual imagery in a liberal-democratic society. No Caption Needed is a compelling demonstration of photojournalism's vital contribution to public life.

Understanding Media Marshall McLuhan, 2016-09-04 When first published, Marshall McLuhan's *Understanding Media* made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Hollywood 9/11 Tom Pollard, 2015-12-03 The terrorist attacks of September 11, 2001, and the subsequent US-led invasions of Afghanistan in 2001 and Iraq in 2003 profoundly affected all aspects of society, including cinema. Or did they? Even now, years after those horrific events, debate still rages over their impact on films. At the time many expected Hollywood to tamp down graphic movie violence, while others hoped that filmmakers would finally lay bare volatile socio-political issues fuelling terrorist attacks. In fact, what has emerged is a thicket of darkly pessimistic genres including thrillers, combat films, sci-fi, and horror that makes pre-9/11 films appear naive and optimistic. *Hollywood 9/11* explores this transformation, critically examining everything from *Harry Potter and the Half-Blood Prince* to *The Hurt Locker* and placing the films in the context of both the socio-political scene and the history of cinema.
