**Influence of Shear and Compression Interaction on the Response of Sand to Dynamic Loading** Patrick Maesa Griffin,1980

**Interaction Effects of Simultaneous Torsional and Compressional Cyclic Loading of Sand** Patrick M. Griffin,William N. Houston,1979 An experimental research program based on laboratory test studies and scaled slope model tests was conducted with specimens of Monterey No. 0 sand. The principal objective of the research was to study the effects of interactive coupling during combined compression (normal) and shear loading on the response of sands to dynamic loading. The research program included the following experimental studies: (1) Resonant Column tests on cylindrically shaped specimens using longitudinal and torsional excitation, both separately and in combination. (2) Thin-walled Hollow Cylinder tests using longitudinal and torsional cyclic excitation, both separately and in combination. (3) Large scale shaking table tests on slope models, using horizontal and vertical cyclic excitation, both separately and in combination. (Author).

*The Toolbox Revisited* Clifford Adelman,2006 The Toolbox Revisited is a data essay that follows a nationally representative cohort of students from high school into postsecondary education, and asks what aspects of their formal schooling contribute to completing a bachelor's degree by their mid-20s. The universe of students is confined to those who attended a four-year college at any time, thus including students who started out in other types of institutions, particularly community colleges.

**The RISC-V Reader** David A. Patterson,Andrew Waterman,2017

**Social Capital Online** Kane X. Faucher,2018-06-14 What is 'social capital'? The enormous positivity surrounding it conceals the instrumental economic rationality underpinning the notion as corporations silently sell consumer data for profit. Status chasing is just one aspect of a process of transforming qualitative aspects of social interactions into quantifiable metrics for easier processing, prediction, and behavioural shaping. A work of critical media studies, Social Capital Online examines the idea within the new 'network spectacle' of digital capitalism via the ideas of Marx, Veblen, Debord, Baudrillard and Deleuze. Explaining how such phenomena as online narcissism and aggression arise, Faucher offers a new theoretical understanding of how the spectacularisation of online activity perfectly aligns with the value system of neoliberalism and its data worship. Even so, at the centre of all, lie familiar ideas – alienation and accumulation – new conceptions of which he argues are vital for understanding today's digital society.

*Making Institutional Repositories Work* Burton B. Callicott,David Scherer,Andrew Wesolek,2015-11-15 Quickly following what many expected to be a wholesale revolution in library practices, institutional repositories encountered unforeseen problems and a surprising lack of impact. Clunky or cumbersome interfaces, lack of perceived value and use by scholars, fear of copyright infringement, and the like tended to dampen excitement and adoption.This collection of essays, arranged in five thematic sections, is intended to take the pulse of institutional repositories-to see how they have matured and what can be expected from them, as well as introduce what may be the future role of the institutional repository. Making Institutional Repositories Work takes novices as well as seasoned practitioners through the practical and conceptual steps necessary to develop a functioning institutional repository, customized to the needs and culture of the home institution. The first section covers all aspects of system platforms, including hosted and open-source options, big data capabilities and integration, and issues related to discoverability. The second section addresses policy issues, from the basics to open-source and deposit mandates. The third section focuses on recruiting and even creating content. Authors in this section will address the ways that different disciplines tend to have different motivations for deposit, as well as the various ways that institutional repositories can serve as publishing platforms. The fourth section covers assessment and success measures for all involved-librarians, deans, and administrators. The theory and practice of traditional metrics, alt metrics, and peer review receive chapter-length treatment. The fifth section provides case studies that include a boots-on-the-ground perspective of issues raised in the first four sections. By noting trends and potentialities, this final section, authored by Executive Director of SPARC Heather Joseph, makes future predictions and helps managers position institutional repositories to be responsive change and even shape the evolution of scholarly communication.

**The Process of Question Answering** WENDY G. LEHNERT,2022-09-16 First published in 1978, this title examines a phenomenon that relies on many realms of human cognition: language comprehension, memory retrieval, and language generation. Problems in computational question answering assume a new perspective when question answering is viewed as a problem in natural language processing.

**The Health Effects of Cannabis and Cannabinoids** National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on the Health Effects of Marijuana: An Evidence Review and Research Agenda,2017-03-31 Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs.

**Physiology and Biochemistry of Metal Toxicity and Tolerance in Plants** M.N. Prasad,Kazimierz Strzalka,2013-06-29 The aim of this book is to give an overview of the most important aspects of physiological and biochemical basis for metal toxicity and tolerance in plants. The book is expected to serve as a reference to university and college teachers, students of plant sciences, environmental biology, environmental biotechnology, agriculture, horticulture, forestry, plant molecular biology, and genetics.

The Psychology of Fake News Rainer Greifeneder,Mariela Jaffe,Eryn Newman,Norbert Schwarz,2020-08-13 This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of “alternative facts”, this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.
