**The Trouble with Empire** Antoinette M. Burton,2015 While imperial blockbusters fly off the

shelves, there is no comprehensive history dedicated to resistance in the 19th and 20th century British Empire. *The Trouble with Empire* is the first volume to fill this gap, offering a brief but thorough introduction to the nature and consequences of resistance to British imperialism. Historian Antoinette Burton's study spans the 19th and 20th centuries, when discontented subjects of empire made their unhappiness felt from Ireland to Canada to India to Africa to Australasia, in direct response to incursions of military might and imperial capitalism. *The Trouble with Empire* offers the first thoroughgoing account of what British imperialism looked like from below and of how tenuous its hold on alien populations was throughout its long, unstable life. By taking the long view, moving across a variety of geopolitical sites and spanning the whole of the period 1840-1955, Burton examines the commonalities between different forms of resistance and unveils the structural weaknesses of the British Empire.<sup>0</sup>

**Becasse** Justin North, 2010-03-01 The culinary heart and soul of the beautiful and culturally fascinating Piemonte region of northwest Italy—from Crissini con le Noci to Frittata Gialla e Verde, and from tiny countryside trattorias to opulent Torino cafes—is explored in this alluring account that is equal parts memoir, local history, and recipe collection. Located between France, Switzerland, and the eastern portion of Italy, the area is home to some of the world's best produce and known for its autumnal bounty—wild mushrooms and truffles, rice harvests from the River Po, and specialty cheeses from tiny, mountain dairies. Secrets of the agriculturally rich Po Valley and tales of the spectacular capital of Torino are coupled with anecdotes about friends, family, and the importance of preparing and sharing good, quality food. Lavish color photographs capture the bustling culture and illustrate the splendor of the region, while also displaying some of the delectable recipes, including Anchovies with Salsa Verde, Taglierini with Fonduta and Truffle Oil, and Nougat Semifreddo.

### **International Case Studies of Terrorist Rehabilitation** Rohan Gunaratna, Sabariah M.

Hussin, 2018-07-24 The post 9/11 era has produced structured rehabilitation programmes in a wide range of countries including Saudi Arabia, Singapore, Pakistan, Malaysia, Egypt, Iraq, and Uzbekistan. There are also ad hoc and emerging programmes in Nigeria, China, Indonesia, Bangladesh, Denmark, Germany, United Kingdom, and Nepal. Due to the threat from global Islamist terrorist groups, including al-Qaeda and the Islamic State (IS), the focus has tended to be on Islamist groups. However, Sri Lanka also has a multifaceted rehabilitation programme that was created after the ethno-nationalist Liberation Tigers of Tamil Eelam (LTTE) group was defeated in 2009, which can teach us some valuable lessons. This book consists of a series of case studies of different terrorist rehabilitation initiatives that have been attempted around the world. Each initiative is critically analysed to develop a sound understanding of the significance of different approaches and strategies of terrorist rehabilitation in helping potential terrorists integrate back into society. Sharing and examining case studies, by both practitioners and scholars, this book provides vital tools to address the challenges faced by practitioners of terrorist rehabilitation programmes.

**Chocolate Unwrapped** Sarah Jane Evans, 2010-09-20 The story of chocolate: its place in history, from the Mayans to 21st-century artisan producers; the journey from tree to bar, from the plantation to the gourmet store; and terroir and flavours from around the world Discover more than 80 of the world's top producers and their bars – single origin, ethical and fair trade, classic and new flavours Learn to taste chocolate like an expert Take a bite of a chocolate bar. Beside the pleasure it gives, the chocolate leads you on a journey from the cacao bean grown on a far-away plantation to the final designer bar, but also on a more complex voyage through history, society, politics and economics. Throughout its 3000-year history, chocolate has been celebrated as a precious health-giving drink; it

was not until the 20th century that sweetened chocolate confectionery and bars replaced 'real' chocolate. Today fine chocolate is part of the revival of interest in 'real' food. Small artisan chocolatiers and global producers alike are seeking out top quality beans from specific origins. Sarah Jane Evans brings the story of chocolate up to date, and profiles more than 80 of the world's leading fine chocolate producers, with her tasting notes on selected bars. Chocolate has over 500 chemical compounds that affect its flavour and this book teaches the chocolate lover how to taste, discover and enjoy its many flavours.

**GeoSensor Networks** Silvia Nittel, Alexandros Labrinidis, Anthony Stefanidis, 2008-08-15 This volume serves as the post-conference proceedings for the Second GeoSensor Networks Conference that was held in Boston, Massachusetts in October 2006. The conference addressed issues related to the collection, management, processing, analysis, and delivery of real-time geospatial data using distributed geosensor networks. This represents an evolution of the traditional static and centralized geocomputational paradigm, to support the collection of both temporally and spatially high-resolution, up-to-date data over a broad geographic area, and to use sensor networks as actuators in geographic space. Sensors in these environments can be static or mobile, and can be used to passively collect information about the environment or, eventually, to actively influence it. The research challenges

behind this novel paradigm extend the frontiers of traditional GIS research further into computer science, addressing issues like data stream processing, mobile computing, location-based services, temporal-spatial queries over geosensor networks, adaptable middleware, sensor data integration and mining, automated updating of geospatial databases, VR modeling, and computer vision. In order to address these topics, the GSN 2006 conference brought together leading experts in these fields, and provided a three-day forum to present papers and exchange ideas.

Artificial Intelligence for Humans, Volume 2 Jeff Heaton, 2014-05-28 Nature can be a great source of inspiration for artificial intelligence algorithms because its technology is considerably more advanced than our own. Among its wonders are strong AI, nanotechnology, and advanced robotics. Nature can therefore serve as a guide for real-life problem solving. In this book, you will encounter algorithms influenced by ants, bees, genomes, birds, and cells that provide practical methods for many types of AI situations. Although nature is the muse behind the methods, we are not duplicating its exact processes. The complex behaviors in nature merely provide inspiration in our quest to gain new insights about data. Artificial Intelligence for Humans is a book series meant to teach AI to those readers who lack an extensive mathematical background. The reader only needs knowledge of basic college algebra and computer programming. Additional topics are thoroughly explained. Every chapter also includes a programming example. Examples are currently provided in Java, C#, and Python. Other languages are planned. No knowledge of biology is needed to read this book. With a forward by Dave Snell.

**Intelligent Systems for Crisis Management** Sisi Zlatanova, Rob Peters, Arta Dilo, Hans Scholten, 2012-12-03 There have been major advances in technologies to support crisis response in the last few years. However, many aspects related to the efficient collection and integration of geo-information, applied semantics and situation awareness for disaster management are still open. To advance the systems and make them intelligent, an extensive collaboration is required between emergency responders, disaster managers, system designers and researchers. To facilitate this process the Geo-information for Disaster Management (Gi4DM) conference has been organized since 2005. Gi4DM is coordinated by the Joint Board of Geospatial Information Societies (JB GIS) and the ad-hoc Committee on Risk and Disaster Management. This volume presents the results of the Gi4DM 2012 conference, held in Enschede, the Netherlands, on 13-15 December. It contains a selection of around 30 scientific and 25 best-practice peer-reviewed papers. The 2012 Gi4DM focuses on the intelligent use of geo-information, semantics and situation awareness.
