Introduction to Mortgages and Mortgage Backed Securities Richard K. Green, 2013-11-21 In *Introduction to Mortgages & Mortgage Backed Securities*, author Richard Green combines current practices in real estate capital markets with financial theory so readers can make intelligent business decisions. After a behavioral economics chapter on the nature of real estate decisions, he explores mortgage products, processes, derivatives, and international practices. By focusing on debt, his book presents a different view of the mortgage market than is commonly available, and his primer on fixed-income tools and concepts ensures that readers understand the rich content he covers. Including commercial and residential real estate, this book explains how the markets work, why they collapsed in 2008, and what countries are doing to protect themselves from future bubbles. Green's expertise illuminates both the fundamentals of mortgage analysis and the international paradigms of products, models, and regulatory environments. Written for buyers of real estate, not mortgage lenders Balances theory with increasingly complex practices of commercial and residential mortgage lending Emphasizes international practices, changes caused by the 2008-11 financial crisis, and the behavioral aspects of mortgage decision making

Non-Prime Mortgages William B. Shear, 2011 This is a print on demand edition of a hard to find publication. The surge in mortgage foreclosures that began in late 2006 and continues today was initially driven by deterioration in the performance of non-prime loans. Non-prime mortgage originations increased dramatically from 2000 through 2006, rising from 12% of all mortgage originations to 34%. The non-prime market contracted sharply in mid-2007, in response to increasing defaults and foreclosures for these loans. This report: (1) provides info. on the performance of non-prime loans through 12/31/09; (2) examines how loan and borrower characteristics and economic conditions influenced the likelihood of default of non-prime loans; and (3) describes the features of data on non-prime loan performance and borrower characteristics.
