Apple Pro Training Series Joe Torelli,2010-04-09 Broadcast editors work with deadlines that are the most demanding in the field. To help you meet those deadlines and learn to use Final Cut Pro at the same time, this easy look-up guide focuses on the essential features that you need to get your stories done quickly without sacrificing quality. For editing everything from voiceovers to sports and news packages, you'll get tips for efficient setup, customization, and trimming techniques. You'll learn the best methods for making audio adjustments, how to use common transitions and effects, splice in fat and tight bites, cover narration with B-Roll, and prepare a story for delivery. "No one teaches cutting edge technology better than Joe Torelli. Read his book. In clear, simple terms, he'll show you things you might miss that will make you a better storyteller." —Bob Dotson, Emmy Award-winning NBC News correspondent "As the first person to use an Avid digital nonlinear editing system in a broadcast environment, who better than Joseph Torelli to write the definitive book on fast story editing under tremendous deadline pressures than this veteran broadcast videographer-editor." —Tom Ohanian, Academy Award and two-time Emmy Award recipient and Co-Inventor, Avid Media, Film, Multicamera Systems

Concurrent Aerobic and Strength Training Moritz Schumann,Bent R. Rønnestad,2018-10-31 This book provides an extensive guide for exercise and health professionals, students, scientists, sport coaches, athletes of various sports and those with a general interest in concurrent aerobic and strength training. Following a brief historical overview of the past decades of research on concurrent training, in section 1 the epigenetic as well as physiological and neuromuscular differences of aerobic and strength training are discussed. Thereafter, section 2 aims at providing an up-to-date analysis of existing explanations for the interference phenomenon, while in section 3 the training-methodological difficulties of combined aerobic and strength training are elucidated. In section 4 and 5, the theoretical considerations reviewed in previous sections will then be practically applied to specific populations, ranging from children and elderly to athletes of various sports. Concurrent Aerobic and Strength Training: Scientific Basics and Practical Applications is a novel book on one of the "hot topics" of exercise training. The Editors' highest priority is to make this book an easily understandable and at the same time scientifically supported guide for the daily practice.

Genetics and Molecular Biology of Muscle Adaptation Neil Spurway,Henning Wackerhage,2006-01-01 This title is directed primarily towards health care professionals outside of the United States. It starts with the origin of life and ends with the mechanisms that make muscles adapt to different forms of training. In between, it considers how evidence has been obtained about the extent of genetic influence on human capacities, how muscles and their fibres are studied for general properties and individual differences, and how molecular biological techniques have been combined with physiological ones to produce the new discipline of molecular exercise physiology. This is the first book on such topics written specifically for modules in exercise and sport science at final year Hons BSc and taught MSc levels.

Animal Models of Cognitive Impairment Edward D. Levin,Jerry J. Buccafusco,2006-06-22 The costs associated with a drug's clinical trials are so significant that it has become necessary to validate both its safety and efficacy in animal models prior to the continued study of the drug in humans. Featuring contributions from distinguished researchers in the field of cognitive therapy research, Animal Models of Cognitive Impairment examines some of the most popular and successful animal archetypes used in the context of drug discovery. It provides integrated coverage of the latest research concerning neuronal systems relevant to cognitive function and dysfunction, assimilating reviews of this research within the context of each chapter. This approach is unique in that it brings together molecular and neurochemical methodologies, behavioral applications in translational models, and clinical applications. The book comprehensively discusses a wide variety of animal models of cognitive impairment, including genetic, lesion, pharmacological, and aging related impairments. It also explores the significance of this research in regards to the treatment of various addictions and disorders such as stroke, autism, Alzheimer's, schizophrenia, and ADHD. Edited by two renowned authorities in the field, Animal Models of Cognitive Impairment is a timely book that provides integrated coverage of cutting-edge research that concerns neuronal systems relevant to cognitive function and dysfunction.

Nutrition in the Prevention and Treatment of Abdominal Obesity Ronald Ross Watson,2018-11-26 Nutrition in the Prevention and Treatment of Abdominal Obesity, Second Edition focuses on the important role that exercise, dietary changes and foods play in promoting and reducing visceral fat. Nutritionists, dieticians and healthcare providers seeking to address the abdominal obesity epidemic will find this book to be a valuable resource in their long-term goal of preventing chronic diseases, especially heart, vascular and diabetic diseases. Chapters define a range of dietary approaches to reduce risk for the associated chronic diseases. In addition, discussions of the importance of dietary approaches to reduce abdominal obesity, along with clinical approaches, are discussed, including costs and risks. Serves as a starting point for in-depth discussions in academic settings that will lead to revised and updated treatment options Offers detailed, well-documented reviews outlining the various dietary approaches to visceral obesity with their benefits and failures Includes updated research on the gut microbiome, FGF 21 and dietary foods and supplements

Foundation Models for Natural Language Processing Gerhard Paaß,Sven Giesselbach,2023-05-23 This open access book provides a comprehensive overview of the state of the art in research and applications of Foundation Models and is intended for readers familiar with basic Natural Language Processing (NLP) concepts. Over the recent years, a revolutionary new paradigm has been developed for training models for NLP. These models are first pre-trained on large collections of text documents to acquire general syntactic knowledge and semantic information. Then, they are fine-tuned for specific tasks, which they can often solve with superhuman accuracy. When the models are large enough, they can be instructed by prompts to solve new tasks without any fine-tuning. Moreover, they can be applied to a wide range of different media and problem domains, ranging from image and video processing to robot control learning. Because they provide a blueprint for solving many tasks in artificial intelligence, they have been called Foundation Models. After a brief introduction to basic NLP models the main pre-trained language models BERT, GPT and sequence-to-sequence transformer are described, as well as the concepts of self-attention and context-sensitive embedding. Then, different approaches to improving these models are discussed, such as expanding the pre-training criteria, increasing the length of input texts, or including extra knowledge. An overview of the best-performing models for

about twenty application areas is then presented, e.g., question answering, translation, story generation, dialog systems, generating images from text, etc. For each application area, the strengths and weaknesses of current models are discussed, and an outlook on further developments is given. In addition, links are provided to freely available program code. A concluding chapter summarizes the economic opportunities, mitigation of risks, and potential developments of AI.

Visual Tracking in Conventional Minimally Invasive Surgery Shahram Payandeh,2016-11-03 Visual Tracking in Conventional Minimally Invasive Surgery introduces the various tools and methodologies that can be used to enhance a conventional surgical setup with some degree of automation. The main focus of this book is on methods for tracking surgical tools and how they can be used to assist the surgeon during the surgical operation. Various notions associated with surgeon-computer interfaces and image-guided navigation are explored, with a range of experimental results. The book starts with some basic motivations for minimally invasive surgery and states the various distinctions between robotic and non-robotic (conventional) versions of this procedure. Common components of this type of operation are presented with a review of the literature addressing the automation aspects of such a setup. Examples of tracking results are shown for both motion and gesture recognition of surgical tools, which can be used as part of the surgeon-computer interface. In the case of marker-less tracking, where no special visual markers can be added to the surgical tools, the tracking results are divided into two types of methodology, depending on the nature and the estimate of the visual noise. Details of the tracking methods are presented using standard Kalman filters and particle filters. The last part of the book provides approaches for tracking a region on the surgical scene defined by the surgeon. Examples of how these tracking approaches can be used as part of image-guided navigation are demonstrated. This book is designed for control engineers interested in visual tracking, computer vision researchers and system designers involved with surgical automation, as well as surgeons, biomedical engineers, and robotic researchers.

Focus on Gynecologic Malignancies Nathan A. Berger,Ann H. Klopp,Karen H. Lu,2017-10-19 Gynecologic malignancies, especially endometrial and ovarian cancers are among the most important and most severely affected by obesity. This volume of Energy Balance and Cancer, written by the world's leading experts in this field, is arranged to provide a transdisciplinary assessment of the pertinent issues, results of relevant research on mechanisms, and control, strategies for dealing with affected patients and improving outcomes and future research needs. The volume comprehensively covers the epidemiology linking obesity to endometrial and ovarian cancer as well as the public awareness of this critical problem. Subsequent chapters explain biologic aspects of linkages between energy balance and gynecologic malignancies. The volume further outlines strategies to disrupt the linkage between obesity and gynecologic malignancies and concludes with a series of chapters focused on management strategies for obese patients with gynecologic malignancies. This volume provides a valuable resource for all physicians, scientists and other transdisciplinary investigators and practitioners interested and involved in energy balance and cancer. It should be a particularly useful guide to optimize outcomes for all practitioners dealing with patients with gynecologic malignancies challenged by energy balance issues. Moreover, it should serve as a useful guide to students and investigators interested in conducting further research on defining and disrupting the important linkage between energy balance and gynecologic malignancies.
