Current Trends in Web Engineering Andreas Harth,Nora Koch,2012-03-09 This book constitutes the thoroughly refereed post-conference proceedings of the workshops held at the 11th International Conference on Web Engineering, ICWE 2011, in Paphos, Cyprus, in June 2011. The 42 revised full papers presented were carefully reviewed and selected from numerous submissions . The papers are organized in sections on the Third International Workshop on Lightweight Composition on the Web (ComposableWeb 2011); First International Workshop on Search, Exploration and Navigation of Web Data Sources (ExploreWeb 2011); Second International Workshop on Enterprise Crowdsourcing (EC 2011); Seventh Model-Driven Web Engineering Workshop (MDWE 2011); Second International Workshop on Quality in Web Engineering (QWE 2011); Second Workshop on the Web and Requirements Engineering (WeRE 2011); as well as the Doctoral Symposium2011, and the ICWE 2011 Tutorials.

Human-Computer Interaction -- INTERACT 2011 Pedro Campos,Nicholas Graham,Joaquim Jorge,Nuno Nunes,Philippe Palanque,Marco Winckler,2011-08-30 The four-volume set LNCS 6946-6949 constitutes the refereed proceedings of the 13th IFIP TC13 International Conference on Human-Computer Interaction, INTERACT 2011, held in Lisbon, Portugal, in September 2011. The fourth volume includes 27 regular papers organized in topical sections on usable privacy and security, user experience, user modelling, visualization, and Web interaction, 5 demo papers, 17 doctoral consortium papers, 4 industrial papers, 54 interactive posters, 5 organization overviews, 2 panels, 3 contributions on special interest groups, 11 tutorials, and 16 workshop papers.

Music in the AI Era Mitsuko Aramaki,Keiji Hirata,Tetsuro Kitahara,Richard Kronland-Martinet,Sølvi Ystad,2023-06-21 This book constitutes the refereed proceedings and revised selected papers from the 15th International Symposium on Music in the AI Era, CMMR 2021, which took place during November 15-19, 2021 as a virtual event. The 24 full papers included in this book were carefully reviewed and selected from 48 submissions. The papers are grouped in thematical sessions on Music technology in the IA era; Interactive systems for music; Music Information Retrieval and Modeling; and Music and Performance Analysis.

Windows Developer Power Tools James Avery,Jim Holmes,2007 A wealth of open and free software is available today for Windows developers who want to extend the development environment, reduce development effort, and increase productivity. This encyclopedic guide explores more than 100 free and open source tools available to programmers who build applications for Windows desktops and servers.

Validating RDF Data Jose Emilio Labra Gayo,Eric Prud'hommeaux,Iovka Boneva,Dimitris Kontokostas,2022-05-31 RDF and Linked Data have broad applicability across many fields, from aircraft manufacturing to zoology. Requirements for detecting bad data differ across communities, fields, and tasks, but nearly all involve some form of data validation. This book introduces data validation and describes its practical use in day-to-day data exchange. The Semantic Web offers a bold, new take on how to organize, distribute, index, and share data. Using Web addresses (URIs) as identifiers for data elements enables the construction of distributed databases on a global scale. Like the Web, the Semantic Web is heralded as an information revolution, and also like the Web, it is encumbered by data quality issues. The quality of Semantic Web data is compromised by the lack of resources for data curation, for maintenance, and for developing globally applicable data models. At the enterprise scale, these problems have conventional solutions. Master data management provides an enterprise-wide vocabulary, while constraint languages capture and enforce data structures. Filling a need long recognized by Semantic Web users, shapes languages provide models and vocabularies for expressing such structural constraints. This book describes two technologies

for RDF validation: Shape Expressions (ShEx) and Shapes Constraint Language (SHACL), the rationales for their designs, a comparison of the two, and some example applications.

Human-Computer Interaction. Theory, Design, Development and Practice Masaaki Kurosu,2016-07-04 The 3-volume set LNCS 9731, 9732, and 9733 constitutes the refereed proceedings of the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, ON, Canada, in July 2016. The total of 1287 papers and 186 posters presented at the HCII 2016 conferences and were carefully reviewed and selected from 4354 submissions. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The volumes constituting the full 27-volume set of the conference proceedings.

ASE's Comprehensive Strain Imaging, E-Book Thomas H. Marwick,Theodore P. Abraham,2021-05-01 Strain imaging (also known as speckle-tracking echocardiography or STE) is a rapidly growing, affordable, and versatile cardiac imaging technology of great interest to clinicians in both inpatient and outpatient settings. ASE's Comprehensive Strain Imaging is the first reference designed to help you master a wide range of strain imaging/STE applications, including screening, diagnosis, treatment, and follow up. Written and edited by a team of international experts from the American Society of Echocardiography (ASE), this new resource provides the information you need to optimize imaging acquisition and analysis using this important new echocardiography method. Covers step-by-step techniques on how to use strain imaging with expert tips on nuances, pitfalls, and clinical decision making. Discusses the growing range of strain imaging applications for assessing diastolic function, atrial function, heart failure, arterial disease, valve disease, hypertrophy, and other common cardiovascular conditions. Provides up-to-date information on screening and follow up of patients who receive cardio-toxic oncologic agents during cancer treatment and evaluation of patients with cardiomyopathy, heart failure, arterial disease, valve disease, implantable pacemakers, pericardial disease, hypertrophy, ischemic disease, and chest radiation. Includes more than 150 images using the latest strain imaging technology, as well as videos that depict evaluation and monitoring of patients with cardiomyopathies. Addresses future applications, including elastography.

Fuzzy Systems and Data Mining IV A.J. Tallón-Ballesteros,K. Li,2018-11-06 Big Data Analytics is on the rise in the last years of the current decade. Data are overwhelming the computation capacity of high performance servers. Cloud, grid, edge and fog computing are a few examples of the current hype. Computational Intelligence offers two faces to deal with the development of models: on the one hand, the crisp approach, which considers for every variable an exact value and, on the other hand, the fuzzy focus, which copes with values between two boundaries. This book presents 114 papers from the 4th International Conference on Fuzzy Systems and Data Mining (FSDM 2018),

held in Bangkok, Thailand, from 16 to 19 November 2018. All papers were carefully reviewed by program committee members, who took into consideration the breadth and depth of the research topics that fall within the scope of FSDM. The acceptance rate was 32.85% . Offering a state-of-the-art overview of fuzzy systems and data mining, the publication will be of interest to all those whose work involves data science.

Autonomous Control for a Reliable Internet of Services Ivan Ganchev,R. D. van der Mei,Hans van den Berg,2018-05-30 This open access book was prepared as a Final Publication of the COST Action IC1304 "Autonomous Control for a Reliable Internet of Services (ACROSS)". The book contains 14 chapters and constitutes a show-case of the main outcome of the Action in line with its scientific goals. It will serve as a valuable reference for undergraduate and post-graduate students, educators, faculty members, researchers, engineers, and research strategists working in this field. The explosive growth of the Internet has fundamentally changed the global society. The emergence of concepts like SOA, SaaS, PaaS, IaaS, NaaS, and Cloud Computing in general has catalyzed the migration from the information-oriented Internet into an Internet of Services (IoS). This has opened up virtually unbounded possibilities for the creation of new and innovative services that facilitate business processes and improve the quality of life. However, this also calls for new approaches to ensuring the quality and reliability of these services. The objective of this book is, by applying a systematic approach, to assess the state-of-the-art and consolidate the main research results achieved in this area.

Advanced Techniques in Shoulder Arthroscopy Peter J. Millett,Jonas Pogorzelski,2019-10-18 This book is written for the benefit of all surgeons who have an interest in arthroscopic shoulder surgery. It is a compendium of different aspects of shoulder surgery that have been learned over the last 25 years. While there has been a rapid progression of shoulder surgery over the last two decades, particularly with the advancement of operative arthroscopic surgery, certain principles remain. The purpose of this book is not to be an exhaustive detailed account of the various historical aspects of arthroscopic shoulder surgery, but rather to act as an up-to-date, instructional handbook that outlines these principles. The book also helps the practicing shoulder surgeon become familiar some of the latest techniques in arthroscopic shoulder surgery, demonstrating proven approaches and outlining key aspects of common and uncommon procedures. Each chapter starts with the indications for the procedure, moves towards the appropriate evaluation and diagnostic work up, and culminates in specific technical explanation of the surgical procedure itself. Advanced Techniques in Shoulder Arthroscopy is a valuable resource for those who are new to arthroscopic shoulder surgery and for those who are skilled and experienced in operative arthroscopy. It is meant to provide a foundation for basic and advanced arthroscopic techniques that helps surgeons improve their craft and treat their patients better.

Conference on Software Engineering Education and Training Timothy Christian Lethbridge,W. The Semantic Web - ISWC 2008 Amit P. Sheth,Steffen Staab,Massimo Paolucci,Diana Maynard,Timothy Finin,Krishnaprasad Thirunarayan,2008-10-21 The Web is a globalinformationspace consistingoflinked documents

andlinked data. As the Web continues to grow and new technologies, modes of interaction, and applications are being developed, the task of the Semantic Web is to unlock the power of information available on the Web into a common semantic inf- mation space and to make it available for sharing and processing by automated tools as well as by people. Right now, the publication of large datasets on the Web, the opening of data access interfaces, and the encoding of the semantics of the data extend the current human-centric Web. Now, the Semantic Web c- munity is tackling the challenges of how to create and manage Semantic Web content, how to make Semantic Web applications robust and scalable, and how to organize and integrate information from di?erent sources for novel uses. To foster the exchange of ideas and collaboration, the International Semantic Web Conference brings together researchers and practitioners in relevant disciplines such as arti?cial intelligence, databases, social networks, distributed computing, Web engineering, information systems, natural language processing, soft c- puting, and human-computer interaction. This volume contains the main proceedings of ISWC 2008, which we are - cited to o?er to the growing community of researchers and practitioners of the Semantic Web. We got a tremendous response to our call for research papers from a truly international community of researchers and practitioners from 41 countries submitting 261 papers. Each paper receivedan averageof 3.

  Tool Integration D. Schefström,G. van den Broek,1993-03-16 Uses actual experiences of practitioners in the field to survey issues regarding the building of integrated systems engineering environments. Coverage includes design techniques, tools, problems confronted and their solutions. Features a detailed discussion of integration.
