American Line Type Book, Borders, Ornaments American Type Founders Company,1906

The American Type Founders Company (ATF) was formed out of a business necessity. Led by John Marder of the Chicago Type Foundry and Arthur Brower of the Union Type Foundry, several other type founders created a combined company of twenty-three plants scattered across the United States, which was incorporated by November 1892. According to Annenberg, this edition was prepared for the London branch. This copy of the catalog, which does not contain any kind of London imprint, includes only type metal, cuts, ornaments, and rule.

This new compilation offers an extremely wideranging and comprehensive overview of the state-of-the-art in rock mechanics and rock engineering and is composed of peer-reviewed, dedicated contributions by all the key experts worldwide. Key features of this set are that it provides a systematic, global summary of new developments in rock mechanics and rock engineering practices as well as looking ahead to future developments in the fields. Contributors are worldrenowned experts in the fields of rock mechanics and rock engineering, though younger, talented researchers have also been included. The individual volumes cover an extremely wide array of topics grouped under five overarching themes: Principles (Vol. 1), Laboratory and Field Testing (Vol. 2), Analysis, Modelling and Design (Vol. 3), Excavation, Support and Monitoring (Vol. 4) and Surface and Underground Projects (Vol. 5). This multi-volume work sets a new standard for rock mechanics and engineering compendia and will be the go-to resource for all engineering professionals and academics involved in rock mechanics and engineering for years to come.
