How Knowledge Moves John Krige, 2019-01-25 Knowledge matters, and states have a stake in managing its movement to protect a variety of local and national interests. The view that knowledge circulates by itself in a flat world, unimpeded by national boundaries, is a myth. The transnational movement of knowledge is a social accomplishment, requiring negotiation, accommodation, and adaptation to the specificities of local contexts. This volume of essays by historians of science and technology breaks the national framework in which histories are often written. Instead, *How Knowledge Moves* takes knowledge as its central object, with the goal of unraveling the relationships among people, ideas, and things that arise when they cross national borders. This specialized knowledge is located at multiple sites and moves across borders via a dazzling array of channels, embedded in heads and hands, in artifacts, and in texts. In the United States, it shapes policies for visas, export controls, and nuclear weapons proliferation; in Algeria, it enhances the production of oranges by colonial settlers; in Vietnam, it facilitates the exploitation of a river delta. In India it transforms modes of agricultural production. It implants American values in Latin America. By concentrating on the conditions that allow for knowledge movement, these essays explore travel and exchange in face-to-face encounters and show how border-crossings mobilize extensive bureaucratic technologies.

Moving the Equity Agenda Forward Julie A. Bianchini, Valarie L. Akerson, Angela Calabrese Barton, Okhee Lee, Alberto J. Rodriguez, 2012-08-11 This volume takes on the vital tasks of celebrating, challenging, and attempting to move forward our understanding of equity and diversity in science education. Organized thematically, the book explores five key areas of science education equity research: science education policy; globalization; context and culture; discourse, language and identity; and leadership and social networking. Chapter authors -- emerging to established US science education scholars -- present their latest research on how to make science interesting and accessible to all students. The volume includes international voices as well: Scholars from around the world crafted responses to each section. Together, authors and respondents attempt to refine our methods for examining equity issues across classrooms, schools, and policies, and deepen our understanding of ways to promote equity and acknowledge diversity in science classrooms. *Moving the Equity Agenda Forward* is endorsed by NARST: A Worldwide Organization for Improving Science Teaching and Learning Through Research. The volume gains authority from the fact that it was edited by one current and four former chairs of NARST's Equity and Ethics Committee.

A Jurisprudence of Movement Olivia Barr, 2016-02-22 Law moves, whether we notice or not. Set amongst a spatial turn in the humanities, and jurisprudence more specifically, this book calls for a greater attention to legal movement, in both its technical and material forms. Despite various ways the spatial turn has been taken up in legal thought, questions of law, movement and its materialities are too often overlooked. This book addresses this oversight, and it does so through an attention to the materialities of legal movement. Paying attention to how law moves across different colonial and contemporary spaces, this book reveals there is a problem with common law's place. Primarily set in the postcolonial context of Australia - although ranging beyond this nationalised topography, both spatially and temporally - this book argues movement is fundamental to the very terms of common law's existence. How, then, might we move well? Explored through examples of walking and burial, this book responds to the challenge of how to live with a contemporary form of colonial legal inheritance by arguing we must take seriously the challenge of living with law, and think more carefully about its spatial productions, and

place-making activities. Unsettling place, this book returns the question of movement to jurisprudence.

Assessing the Educational Data Movement Philip J. Piety, 2015-04-25 For better or worse, many educational decisions that were once a private matter of teachers or administrators are now based on information technology. To be successful in this era, educators need to know how to use data successfully for their purposes and to understand the social forces at work. In this book, the author draws on his unique background in education policy and information systems to provide valuable insights into the education data movement. Using narratives of practice, the text discusses many current topics including value added modeling for teacher evaluation, big data and analytics, longitudinal data systems, open educational resources, and new designs for teaching.

Moving Students of Color from Consumers to Producers of Technology Rankin, Yolanda, Thomas, Jakita, 2016-12-12 In recent years, diversity in learning environments has become a pivotal topic of conversation for educators. By enhancing underrepresented students' computational thinking skills, it creates more room for future career opportunities. *Moving Students of Color from Consumers to Producers of Technology* is a comprehensive reference source that provides innovative perspectives on the need for diversity in computer science and engineering disciplines and examines best practices to build upon students' knowledge bases. Featuring coverage on an expansive number of topics and perspectives, such as, computational algorithmic thinking, STEM diversity, and distributed mentorship, this publication is ideally designed for academicians, researchers, and students interested in efforts to broaden participation in computer science careers fields for underrepresented students.

Stuck Moving Peter Benson, 2023 AUTHOR'S NOTE: This book is unconventional. A self-conscious experiment in form

that draws together two vernaculars: anthropological thought and the pop culture of my youth. It is a fraught exercise. I write as a White guy about angst and alienation in the privileged spaces of anthropology and higher education. I appreciate the irony. I hope nonetheless that my experiences with and critical perspectives on social conventions, the culture of liberalism, and ableism in academia might be useful. I seek to expand possibilities of anthropological representation while challenging epistemological, aesthetic, and professional norms in my discipline. It bothers me that anthropology can be so sanctimonious. I take aim at the ableist conceit that anthropologists are non-characters studying a messy world. Much of my life has been a mess. My work has been undertaken amid struggles with pregnancy loss, bipolar disorder, and drug addiction. I have deep regrets about my participation in an exploitative field. I have deep regrets about many things. I have hurt people and been hurt by people. I hope my stories and reflections add to what others have already written about a more open, honest, and self-deprecating anthropology--

NASA and the Long Civil Rights Movement Brian C. Odom, Stephen P. Waring, 2022-04-12 American Astronautical Society Eugene M. Emme Astronautical Literature Award As NASA prepared for the launch of Apollo 11 in July 1969, many African American leaders protested the billions of dollars used to fund "space joyrides" rather than help tackle poverty, inequality, and discrimination at home. This volume examines such tensions as well as the ways in which NASA's goal of space exploration aligned with the cause of racial equality. It provides new insights into the complex relationship between the space program and the civil rights movement in the Jim Crow South and abroad. Essays explore how thousands of jobs created during the space race offered new opportunities for minorities in places like Huntsville, Alabama, while at the same time segregation at NASA's satellite tracking station in South Africa led to that facility's closure. Other topics include black skepticism toward NASA's framing of space exploration as "for the benefit of all mankind," NASA's track record in hiring women and minorities, and the efforts of black activists to increase minority access to education that would lead to greater participation in the space program. The volume also addresses how to best find and preserve archival evidence of African American contributions that are missing from narratives of space exploration. *NASA and the Long Civil Rights Movement* offers important lessons from history as today's activists grapple with the distance between social movements like Black Lives Matter and scientific ambitions such as NASA's mission to Mars. An Excursion in Diagrammatic Algebra J. Scott Carter, 2012 The aim of this book is to give as detailed a description as is possible of one of the most beautiful and complicated examples in low-dimensional topology. This example is a gateway to a new idea of higher dimensional algebra in which diagrams replace algebraic expressions and relationships between diagrams represent algebraic relations. The reader may examine the changes in the illustrations in a leisurely fashion; or with scrutiny, the reader will become familiar and develop a facility for these diagrammatic computations. The text describes the essential topological ideas through metaphors that are experienced in everyday life: shadows, the human form, the intersections between walls, and the creases in a shirt or a pair of trousers. Mathematically informed reader will benefit from the informal introduction of ideas. This volume will also appeal to scientifically literate individuals who appreciate mathematical beauty.

Pakistan's Political Parties Mariam Mufti, Sahar Shafqat, Niloufer Siddiqui, 2020-05-01 Pakistan's 2018 general

elections marked the second successful transfer of power from one elected civilian government to another—a remarkable achievement considering the country's history of dictatorial rule. *Pakistan's Political Parties* examines how the civilian side of the state's current regime has survived the transition to democracy, providing critical insight into the evolution of political parties in Pakistan and their role in developing democracies in general. Pakistan's numerous political parties span the ideological spectrum, as well as represent diverse regional, ethnic, and religious constituencies. The essays in this volume explore the way in which these parties both contend and work with Pakistan's military-bureaucratic establishment to assert and expand their power. Researchers use interviews, surveys, data, and ethnography to illuminate the internal dynamics and motivations of these groups and the mechanisms through which they create policy and influence state and society. *Pakistan's Political Parties* is a one-of-a-kind resource for diplomats, policymakers, journalists, and scholars searching for a comprehensive overview of Pakistan's party system and its unlikely survival against an interventionist military, with insights that extend far beyond the region.

The Nazi Movement in Baden, 1920-1945 Johnpeter Horst Grill,1983 Grill shows how the Baden party's true believers captured votes in 1928 before the Nazi takeover. These party faithful consolidated their power and ideology through organization, maintained their strength by wooing the rural and Protestant population, and, after their 1928 electoral success, appealed to the general population's sense of volkisch nationalism. After the Nazi takeover in 1933, they became primarily the tool of Hitler. Originally published in 1983. Neuroscientific Foundations of Anesthesiology George A. Mashour,Ralph Lydic,2011-10-05 Although the perioperative care of patients by anesthesiologists draws on diverse clinical skills, the principles of anesthesiology and pain management are rooted in the neurosciences. *The Neuroscientific Foundations of Anesthesiology* thoroughly examines the anesthetic modulation of the central, peripheral, and autonomic nervous systems and will help redefine anesthesiology as a fundamentally neuroscientific field. The book is organized by sections, with each focusing on a different part of the nervous system. State-of-the-art chapters written by thought-leaders in anesthesiology and neuroscience provide a novel and invaluable resource.

Sixties Radicalism and Social Movement Activism Bryn Jones,Mike O'Donnell,2012-10-15 This book's four main aims are to examine: firstly, why movements happened in the socio-historical context of sixties' radicalism; secondly, its distinctive legacy of crucial, cultural, societal and political interconnections; thirdly, continuing links between seminal ideas and movements and socio-political activism today; fourthly little-discussed national instances and divergent impacts of sixties radicalism, in relation to contemporary 'global' social movements. A conclusion traces all these dimensions from current social movements back to sixties radicalism's pioneering upheavals.

The Intersection of Intellectual Property Law and the Green Movement John Marshall Review of Intellectual Property Law,2010-06-22 Special symposium by leading scholars and lawyers on intellectual property law, including patents and trademarks. *The Green Issue* presents cutting-edge articles on the emerging green movement in environmental law and its promotion through IP law. Topics include encouraging biodiversity, green labeling and fake marketing, greenwashing, miscalculation of long-term costs, and patenting environmental tech.

Youth Moves Nadine Dolby, Fazal Rizvi, 2008-03-25 This fascinating collection of original essays seeks to address the possibilities and dangers of young people's transnational, commodified identities; how society and educational institutions might respond to these new identities; and the consequences for democratic practices and the public sphere. Drawing together contributions from the work of both well known and emerging scholars, this collection highlights the practices of youth's identities in the context of broadly defined educative sites, including schools, media and popular culture, community organisations, cyberspace, music, and urban landscapes.

The Ninth Marcel Grossman Meeting (MGIXMM) Robert T. Jantzen, Remo Ruffini, Vahe G. Gurzadyan, 2002-12-01 In 1975 the Marcel Grossmann Meetings were established by Remo Ruffini and Abdus Salam to provide a forum for discussion of recent advances in gravitation, general relativity, and relativistic field theories. In these meetings, which are held once every three years, every aspect of research is emphasized - mathematical foundations, physical predictions, and numerical and experimental investigations. The major objective of these meetings is to facilitate exchange among scientists, so as to deepen our understanding of the structure of space-time and to review the status of both the ground-based and the space-based experiments aimed at testing the theory of gravitation. The Marcel Grossmann Meetings have grown under the guidance of an International Organizing Committee and a large International Coordinating Committee. The first two meetings, MG1 and MG2, were held in Trieste (1975, 1979). A most memorable MG3 (1982) was held in Shanghai and represented the first truly international scientific meeting in China after the so-called Cultural Revolution. Three years later MG4 was held in Rome (1985). It was at MG4 that 'astroparticle physics' was born. MGIXMM was organized by the International Organizing Committee composed of D Blair, Y Choquet-Bruhat, D Christodoulou, T Damour, J Ehlers, F Everitt, Fang Li Zhi, S Hawking, Y Ne'eman, R Ruffini (chair), H Sato, R Sunyaev, and S Weinberg. Essential to the organization was an International Coordinating Committee of 135 members from scientific institutions of 54 countries. MGIXMM was attended by 997 scientists of 69 nationalities. It took place on 2-8 July 2000 at the University of Rome, Italy. The scientific programs included 60 plenary and review talks, as well as talks in 88 parallel sessions. The three volumes of the proceedings of MGIXMM present a rather authoritative view of relativistic astrophysics, which is becoming one of the priorities in scientific endeavour. The papers appearing in these volumes cover all aspects of gravitation, from mathematical issues to recent observations and experiments. Their intention is to give a complete picture of our current understanding of gravitational theory at the turn of the millennium. The Marcel Grossmann Individual Awards for this meeting were presented to Cecille and Bryce DeWitt, Riccardo Giacconi and Roger Penrose, while the Institutional Award went to the Solvay Institute, accepted on behalf of the Institute by Jacques Solvay and Ilya Prigogine. The acceptance speeches are also included in the proceedings.
