Cartoon Animation for Everyone Alan Cleave, 1973

Animating Culture Eric Loren Smoodin, 1993 Long considered children's entertainment by audiences and popular media, Hollywood animation has received little serious attention. Eric Smoodin's *Animating Culture* is the first and only book to thoroughly analyze the animated short film. Usually running about seven or eight minutes, cartoons were made by major Hollywood studios--such as MGM, Warner Bros., and Disney--and shown at movie theaters along with a newsreel and a feature-length film. Smoodin explores animated shorts and the system that mass-produced them. How were cartoons exhibited in theaters? How did they tell their stories? Who did they tell them to? What did they say about race, class, and gender? How were cartoons related to the feature films they accompanied on the evening's bill of fare? What were the social functions of cartoon stars like Donald Duck and Minnie Mouse? Smoodin argues that cartoons appealed to a wide audience--not just children--and did indeed contribute to public debate about political matters. He examines issues often ignored in discussions of animated film--issues such as social control in the U.S. army's Private Snafu cartoons, and sexuality and race in the sites of Betty Boop's body and the cartoon harem. Smoodin's analysis of the multiple discourses embedded in a variety of cartoons reveals the complex and sometimes contradictory ways that animation dealt with class relations, labor, imperialism, and censorship. His discussion of Disney and the Disney Studio's close ties with the U.S. government forces us to rethink the place of the cartoon in political and cultural life. Smoodin reveals the complex relationship between cartoons and the Hollywood studio system, and between cartoons and their audiences.

Animation & Cartoons Nicolae Sfetcu, 2014-05-07 An animated cartoon is a short, hand-drawn (or made with computers to look similar to something hand-drawn) moving picture for the cinema, TV or computer screen, featuring some kind of story or plot. Animation is the optical illusion of motion created by the consecutive display of images of static elements. In film and video production, this refers to techniques by which each frame of a film or movie is produced individually. Computer animation is the art of creating moving images via the use of computers. It is a subfield of computer graphics and animation. Anime is a medium of animation originating in Japan, with distinctive character and background aesthetics that visually set it apart from other forms of animation. An animated cartoon is a short, hand-drawn (or made with computers to look similar to something hand-drawn) moving picture for the cinema, TV or computer screen, featuring some kind of story or plot (even if it is a very short one). Manga is the Japanese word for comics and print cartoons. Outside of Japan, it usually refers specifically to Japanese comics. Special effects (abbreviated SPFX or SFX) are used in the film, television, and entertainment industry to visualize scenes that cannot be achieved by normal means, such as space travel. Stop motion is a generic general term for an animation technique which makes static objects appear to move.

Emile Cohl, Caricature, and Film Donald Crafton, 2014-07-14 This is the definitive biography of Emile Cohl (1857-1938), one of the most important pioneers of the art of the animated cartoon and an innovative contributor to popular graphic humor at a critical moment when it changed from traditional caricature to the modern comic strip. This profusely illustrated book provides not only a wealth of information on Cohl's life but also an analysis of his contribution to the development of the animation film in both France and the United States and an interpretation of how the new

genre fit into the historical shift from a primitive to a classical cinema. Beautiful in look and design, with stunning reproductions from films and newspapers, Emile Cohl, Caricature, and Film offers a biography of a figure who virtually created the European art of animation... In its theory and history, the book is one of the most important contributions to [the field of animated film]. But [it] is central for film study per se, offering a fresh, exciting look at the complicated world of early cinema.--Dana Polan, *Film Quarterly* Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Before Mickey Donald Crafton, 2015-04-01 This witty and fascinating study reminds us that there was animation before Disney: about thirty years of creativity and experimentation flourishing in such extraordinary work as *Girdie the Dinosaur* and *Felix the Cat*. Before Mickey, the first and only in-depth history of animation from 1898-1928, includes accounts of mechanical ingenuity, marketing and art. Crafton is equally adept at explaining techniques of sketching and camera work, evoking characteristic styles of such pioneering animators as Winsor McCay and Ladislav Starevitch, placing work in its social and economic context, and unraveling the aesthetic impact of specific cartoons. Before Mickey's scholarship is quite lively and its descriptions are evocative and often funny. The history of animation coexisted with that of live-action film but has never been given as much attention.—Tim Hunter, *New York Times*

The Great Cartoon Directors Jeff Lenburg, 1983 The first book ever on Hollywood's greatest 1930s-1950s cartoon directors: Tex Avery, Bob and Sody Clampett, Friz Freleng, Bill Hanna & Joe Barbera, Walter Lantz, and many others. Terrytoons W. Gerald Hamonic, 2018 During his forty-year career in animation, Paul Terry animated, directed, and produced over 1,100 cartoons. Yet despite his prodigious output he remains one of animation's unsung legends. 'Terrytoons' chronicles the fascinating life of one of the animation industry's cartoon giants, from his humble beginnings on a family farm in San Mateo, California, to his rise as one of the leading super producers of cartoon shorts during the golden age of American animation. Walt Disney admitted that one of his earliest ambitions was to produce cartoons of comparable quality to Paul Terry. Terry's story is one of survival in the face of natural disasters, economic collapse and bitter rivalries. With biographies on all of the key Terrytoons staff and hundreds of lavish illustrations and photographs, many of which are in color, this biography is a long overdue homage to the legendary producer and invaluable addition to any cartoon lover's book collection.

Arthurian Animation Michael N. Salda, 2013-07-30 This is an exploration of the potent blend of Arthurian legend, cartoon animation, and cultural and artistic trends from 1933 to the present. In more than 170 theatrical and televised short cartoons, televised series and specials, and feature-length films from *The Sword in the Stone* to *Shrek the Third*—all covered in this book—animators have repeatedly brought the Round Table to life. Although these productions differ greatly in tone and intent—spanning spectra from comic to sober, fantastic to realistic, and entertaining to edifying—they share in the proof of Camelot's continuing relevance in the modern world.

Hollywood Cartoons J. Michael Barrier, 1999 Take a guided tour of American animation in the 1930s, '40s, and '50s and meet the legendary artists and entrepreneurs who created Bugs Bunny, Betty Boop, Mickey Mouse, and many other cartoon favorites. 50 halftones.

Cartoon Monickers Walter M. Brasch, 1983 Animated cartoons are part of a multi-billion dollar mass communications industry that began shortly before the turn of the 20th century. The first cartoons appeared almost with the birth of the film industry. Beginning with the late 1920s, cartoon shorts appeared in almost every double feature. But by the late 1960s, the major studios had eliminated the theatrical cartoon shorts, only to resurrect them for a younger television audience. *Cartoon Monickers* is the story not only of cartoons, but of the film and television industries, and American social values.

Shadow of a Mouse Donald Crafton, 2012 Animation variously entertains, enchants, and offends, yet there have been no convincing explanations of how these films do so. *Shadow of a Mouse* proposes performance as the common touchstone for understanding the principles underlying the construction, execution, and reception of cartoons. Donald Crafton's interdisciplinary methods draw on film and theater studies, art history, aesthetics, cultural studies, and performance studies to outline a personal view of animated cinema that illuminates its systems of belief and world making. He wryly asks: Are animated characters actors and stars, just like humans? Why do their performances seem live and present, despite our knowing that they are drawings? Why is animation obsessed with distressing the body? Why were California regional artists and Stanislavsky so influential on Disney? Why are the histories of animation and popular theater performance inseparable? How was pictorial space constructed to accommodate embodied acting? Do cartoon performances stimulate positive or negative behaviors in audiences? Why is there so much extreme eating? And why are seemingly insignificant shadows vitally important? Ranging from classics like *The Three Little Pigs* to contemporary works by Švankmajer and Plympton, these essays will engage the reader's imagination as much as the subject of animation performance itself.
