India International Monetary Fund. Asia and Pacific Dept,2013-02-06 India's economy has slowed substantially before and after the global financial crisis. The economy is in a weaker position than before the crisis. With investment particularly hard-hit, potential GDP is likely to be lower than estimated. Inflation is constraining the room for monetary policy easing. Banks' capital ratios have fallen slightly, but asset quality is deteriorating considerably. The current account deficit registered a record high in 2011-12. Delivering on structural reforms, fiscal consolidation, and low inflation are critical for a sustained recovery.

Rice Blast: Interaction with Rice and Control Shinji Kawasaki,2013-06-05 For the researchers of rice blast disease and plant blast resistances, IRBC is an important chance to exchange information and discussion on rice blast, which has been a rather minor topic on international plant pathological meetings. Especially for those in Asia, where the blast is one the most important agricultural concerns, IRBC was a unique opportunity to discuss on rice blast with scientists in the West, in where it is achieving the positions of a model pathogen and a model system to study plant microbe interactions. However, I and probably many of Japanese blast researchers have felt an accumulated frustration that, in world plant pathological conferences, the information presented from Asia is only a small fraction although they have much more information that may be valuable for world plant pathologists and resistance researchers. I have noticed also some concept gaps between the researchers in East and West, particularly in the field resistance and the multiline system. There seems to be few who study field resistance and multilines in the West, while in Japan they are expected to become mainstream strategies to suppress the disease. Surely there is a great value in rd having 3 IRBC in Japan for cultivating wider communication between the scientists of the East and West.

Resurrection in the New Testament Jan Lambrecht,2002 Resurrection in the New Testament is a Festschrift offered to J. Lambrecht

on the occasion of his seventy-fifth birthday. Among the many scholarly interests of Professor Lambrecht the theme of the resurrection seemed best suited to honour his academic achievement. The 27 contributions cover many of the books of the New Testament. The first two articles in this volume discuss influences on the New Testament treatment of resurrection from the Greco-Roman (Dieter Zeller) and Jewish (Daniel J. Harrington) backgrounds. H.J. de Jonge considers visionary experiences of the Old Testament as an interpretive clue for understanding New Testament references to appearances. The articles by Martin Rese, Benoit Standaert, Otfried Hofius, and Gergely Juhasz deal with interpretive questions that range through several books of the New Testament and to varying degrees again bring into discussion previously debated issues. From this point, with the exception of the final two, the articles appear in canonical order. Adelbert Denaux and Wim J.C. Weren treat issues in Matthew, John Gillman in Luke-Acts, Maarten J.J. Menken and Thomas Soding in John, John J. Kilgallen and Florence Morgan Gillman in Acts, Veronica Koperski, Margaret E. Thrall, and Johan S. Vos in the Pauline letters in general, Morna D. Hooker and Eduard Lohse in Romans, Joel Delobel and Peter J. Tomson in 1 Corinthians, Frank J. Matera in 2 Corinthians, John Reumann in Philippians, Raymond F. Collins in the Pastoral Epistles, and Jacques Schlosser in 1 Peter. Joseph Verheyden discusses the witness of Mary Magdalene and the Women at the tomb in the extra-canonical Gospel of Peter. Finally, Barbara Baert contributes a discussion on how the Resurrection was portrayed in visual art during the Middle Ages, with striking illustrative examples.
