**The Open Book of Social Innovation** Robin Murray, Julie Caulier-Grice, Geoff Mulgan, 2010

This book is about the many ways in which people are creating new and more effective answers to the biggest challenges of our times: how to cut our carbon footprint; how to keep people healthy; and how to end poverty. It describes the methods and tools for innovation being used across the world and across different sectors – the public and private sectors, civil society and the household – in the overlapping fields of the social economy, social entrepreneurship and social enterprise. It draws on inputs from hundreds of organisations to document the many methods currently being used around the world. -- Back cover.

**Orbital Mechanics for Engineering Students** Howard D Curtis, 2009-10-26

**Orbital Mechanics for Engineering Students**, Second Edition, provides an introduction to the basic concepts of space mechanics. These include vector kinematics in three dimensions; Newton's laws of motion and gravitation; relative motion; the vector-based solution of the classical two-body problem; derivation of Kepler's equations; orbits in three dimensions; preliminary orbit determination; and orbital maneuvers. The book also covers relative motion and the two-impulse rendezvous problem; interplanetary mission design using patched conics; rigid-body dynamics used to characterize the attitude of a space vehicle; satellite attitude dynamics; and the characteristics and design of multi-stage launch vehicles. Each chapter begins with an outline of key concepts and concludes with problems that are based on the material covered. This text is written for undergraduates who are studying orbital mechanics for the first time and have completed courses in physics, dynamics, and mathematics, including differential equations and applied linear algebra. Graduate students, researchers, and experienced practitioners will also find useful review materials in the book. NEW: Reorganized and improved discussions of coordinate systems, new discussion on perturbations and quaternions NEW: Increased coverage of attitude dynamics, including new Matlab algorithms and examples in chapter 10 New examples and homework problems

Teaching Translation from Spanish to English Allison Beeby Lonsdale, Allison Beeby, 1996

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics can illuminate the translation process. Using Spanish to English translation as her example, she presents the basic principles of translation through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

**Camera Traps in Animal Ecology** Allan F. O'Connell, James D. Nichols, K. Ullas Karanth, 2010-10-05 Remote photography and infrared sensors are widely used in the sampling of wildlife populations worldwide, especially for cryptic or elusive species. Guiding the practitioner through the entire process of using camera traps, this book is the first to compile state-of-the-art sampling techniques for the purpose of conducting high-quality science or effective management. Chapters on the evaluation of equipment, field sampling designs, and data analysis methods provide a coherent framework for making inferences about the abundance, species richness, and occupancy of sampled animals. The volume introduces new models that will revolutionize use of camera data to estimate population density, such as the newly developed spatial capture-recapture models. It also includes richly detailed case studies of camera trap work on some of the world's most charismatic, elusive, and endangered wildlife species. Indispensable to wildlife conservationists, ecologists, biologists, and conservation agencies around the world, the text provides a thorough review of the subject as well as a forecast for the use of remote photography in natural resource conservation over the next few decades.

Indians and Mestizos in the "Lettered City" Alcira Duenas, Alcira Dueñas, 2010-06-15 Through newly unearthed texts virtually unknown in Andean studies, *Indians and Mestizos in the Lettered City* highlights the Andean intellectual tradition of writing in their long-term struggle for social empowerment and questions the previous understanding of the lettered city as a privileged space populated solely by colonial elites. Rarely acknowledged in studies of resistance to colonial rule, these writings challenged colonial hierarchies and ethnic discrimination in attempts to redefine the Andean role in colonial society. Scholars have long assumed that Spanish rule remained largely undisputed in Peru between the 1570s and 1780s, but educated elite Indians and mestizos challenged the legitimacy of Spanish rule, criticized colonial injustice and exclusion, and articulated the ideas that would later be embraced in the Great Rebellion in 1781. Their movement extended across the Atlantic as the scholars visited the seat of the Spanish empire to negotiate with the king and his advisors for social reform, lobbied diverse networks of supporters in Madrid and Peru, and struggled for admission to religious orders, schools and universities, and positions in ecclesiastic and civil administration. *Indians and Mestizos in the Lettered City* explores how scholars contributed to social change and transformation of colonial culture through legal, cultural, and political activism, and how, ultimately, their significant colonial critiques and campaigns redefined colonial public life and discourse. It will be of interest to scholars and students of colonial history, colonial literature, Hispanic studies, and Latin American studies.

Writing Beyond Pen and Parchment Ricarda Wagner, Christine Neufeld, Ludger Lieb, 2019-10-21 What can stories of magical engraved rings or prophetic inscriptions on walls tell us about how writing was perceived before print transformed the world? Writing beyond Pen and Parchment introduces readers to a Middle Ages where writing is not confined to manuscripts but is inscribed in the broader material world, in textiles and tombs, on weapons or human skin. Drawing on the work done at the Collaborative Research Centre "Material Text Cultures," (SFB 933) this volume presents a comparative overview of how and where text-bearing artefacts appear in medieval German, Old Norse, British, French, Italian and Iberian literary traditions, and also traces the paths inscribed objects chart across multiple linguistic and cultural traditions. The volume's focus on the raw materials and practices that shaped artefacts both mundane or fantastical in medieval narratives offers a fresh perspective on the medieval world that takes seriously the vibrancy of matter as a vital aspect of textual culture often overlooked.

**Ancient Terracottas from South Italy and Sicily in the J. Paul Getty Museum** Maria Lucia Ferruzza, 2016-01-25 In the ancient world, terracotta sculpture was ubiquitous. Readily available and economical—unlike stone suitable for carving—clay allowed artisans to craft figures of remarkable variety and expressiveness. Terracottas from South Italy and Sicily attest to the prolific coroplastic workshops that supplied sacred and decorative images for sanctuaries, settlements, and cemeteries. Sixty terracottas are investigated here by noted scholar Maria Lucia Ferruzza, comprising a selection of significant types from the Getty's larger collection—life-size sculptures, statuettes, heads and busts, altars, and decorative appliqués. In addition to the comprehensive catalogue entries, the publication includes a guide to the full collection of over one thousand other figurines

and molds from the region by Getty curator of antiquities Claire L. Lyons. The free online edition of this open-access catalogue, available at [www.getty.edu/publications/terraccottas/](http://www.getty.edu/publications/terraccottas/) includes zoomable high-resolution photography and a select number of 360° rotations; the ability to filter the catalogue by location, typology, and date; and an interactive map drawn from the Ancient World Mapping Center and linked to the Getty's Thesaurus of Geographic Names and Pleiades. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book; CSV and JSON downloads of the object data from the catalogue and the accompanying Guide to the Collection; and JPG and PPT downloads of the main catalogue images.

We Live Inside Your Eyes Kealan Patrick Burke,2019-04-26 In the ruins of an old parking garage, there is an effigy lashed to a pillar. To anyone else, the remains of the woman with the goat skull head is a warning. To a lonely young boy looking for escape, it is a god of salvation. At its feet lay tattered old notebooks, scattered stories, tales of strange encounters, of broken people and monstrous things, and of corrupt hearts and evil minds. In order to complete his transfiguration, the boy must read these stories, but he has no idea the fate that awaits him. WE LIVE INSIDE YOUR EYES is the much anticipated new collection from Bram Stoker Award-winning horror author Kealan Patrick Burke, featuring previously uncollected stories and a brand new tale written especially for this collection, the short story You Have Nothing to Fear From Me. With an introduction and story notes by the author.

**Policies to Address Poverty in America** Melissa Kearney,Benjamin Harris,2014-06-19 One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in povertyÊnot only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at Brookings asked academic experts to develop policy proposals confronting the various challenges of AmericaÕs poorest citizens, and to introduce innovative approaches to addressing poverty.ÊWhen combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in The Hamilton ProjectÕs Policies to Address Poverty in America. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.

**Manazuru** Hiromi Kawakami,2017-11-01 Startlingly restless and immaculately compact, Manazuru paints the portrait of a woman on the brink of her own memories and future. Twelve years have passed since Kei's husband, Rei, disappeared and she was left alone with her three-year-old daughter. Her new relationship with a married man—the antithesis of Rei—has brought her life to a

numbing stasis, and her relationships with her mother and daughter have spilled into routine, day after day. Kei begins making repeated trips to the seaside town of Manazuru, a place that jogs her memory to a moment in time she can never quite locate. Her time there by the water encompasses years of unsteady footing and a developing urgency to find something. Through a poetic style embracing the surreal and grotesque, a quiet tenderness emerges from these dark moments. Manazuru is a meditation on memory—a profound, precisely delineated exploration of the relationships between lovers and family members.
