Guidelines for the management of symptomatic sexually transmitted infections World Health Organization,2021-07-15 The WHO global health sector strategy on sexually transmitted infections, 2016–2021, endorsed by the World Health Assembly in 2016, aims to eliminate STIs as a public health threat by 2030. In 2019, WHO published estimates of new cases of chlamydia, gonorrhoea, syphilis and trichomoniasis. Recent changes in the epidemiology of STIs and progress in prevention, diagnosis and treatment of STIs and HIV have necessitated changes in approaches to STI prevention and management. To address these STIs, the most widely used approach in clinical settings is the syndromic management of STIs. In most resource-limited settings, the syndromic management flow charts are still the standard of care where laboratory diagnosis is not available or is hard to access. The objectives of these guidelines are to provide updated, evidence-informed clinical and practical recommendations on the case management of people with symptoms of STIs; and to support countries in updating their national guidelines for the case management of people with symptoms of STIs. These guidelines include the management of symptomatic infections related to urethral discharge syndrome, including persistent urethral discharge syndrome;

vaginal discharge syndrome, including persistent vaginal discharge; anorectal infection; genital ulcer disease syndrome; and lower abdominal pain syndrome. These guidelines are intended for programme managers for STI prevention and control at the national level and the health-care providers at the frontline – primary, secondary and tertiary health care.

LGBTQ Cultures Michele J. Eliason, Peggy L. Chinn, 2017-10-16 Drawn from real-world experience and current research, the fully updated LGBTQ Cultures, 3rd Edition paves the way for healthcare professionals to provide well-informed, culturally sensitive healthcare to lesbian, gay, bisexual, transgender, and queer (LGBTQ) patients. This vital guide fills the LGBTQ awareness gaps, including replacing myths and stereotypes with facts, and measuring the effects of social stigma on health. Vital for all nursing specialties, this is the seminal guide to actively providing appropriate, culturally sensitive care to persons of all sexual orientations and gender identities.

Social Work and Health Care Practice with Transgender and Nonbinary Individuals and Communities

Shanna K. Kattari, M. Killian Kinney, Leonardo Kattari, N. Eugene Walls, 2020-08-16 This book examines issues across the lifespan of transgender and nonbinary individuals whilst synthesizing conceptual work, empirical evidence, pedagogical content, educational experiences, and the voices of transgender and

nonbinary individuals. It highlights the resilience and resistance of transgender and nonbinary individuals and communities to challenge narratives relying on one-dimensional perspectives of risk and tragic lives. While there is currently unprecedented visibility and increasing support, members of these communities still face shockingly high rates of violence, victimization, unemployment, discrimination, and family rejection. Significant need for services and support coupled with social, clinical, and medical service systems ill-equipped to provide culturally responsive care illustrates the critical need for quality education and training of educators, practitioners, and service providers in best practices of working with members of the transgender and nonbinary community. Organized into six sections: Health Areas of Practice Coming Out and Family Relationships and Sexuality Communities Multiply Marginalized Identities and Populations, this book offers a current, comprehensive, and intersectional guide for students, practitioners, and researchers across a variety of professions, including social work, psychology, public policy, and health care.

Consolidated Guideline on Sexual and Reproductive Health and Rights of Women Living with HIV World Health Organization, 2017-02-20 the starting point for this guideline is the point at which a woman

has learnt that she is living with HIV and it therefore covers key issues for providing comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities as well as from the health-care institutions where they seek care particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan develop and monitor programmes and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living with HIV taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights.

A Wary Partnership Euijin Jung, Arvind Subramanian, Steven R. Weisman, 2020-09-30 This PIIE Briefing published by the Peterson Institute for International Economics traces the complex economic relationship between India and the rest of the world, focusing on the United States. The various chapters, by leading experts, emphasize the contrast between political ties between Washington and New Delhi, which have steadily improved since the 1980s, culminating in the landmark nuclear agreement in 2005, and economic ties, which have lagged despite intensive negotiations and pledges of cooperation. The current moment of uncertainty and turbulence may not seem to be the time for a new collaborative chapter in this frequently contentious economic relationship. But the authors argue instead that a crisis can

compel leaders of both countries to rethink their failed policies and expand, not reduce, their economic cooperation. By examining the record of international economic policies in the world's two most populous democracies, this volume can illuminate a path forward. There are no illusions in these essays about the costs and obstacles. Their assumption is that learning the lessons of the past can guide the way for progress in the future.

Reservoir Characterization Larry Lake, 2012-12-02 Reservoir Characterization is a collection of papers presented at the Reservoir Characterization Technical Conference, held at the Westin Hotel-Galleria in Dallas on April 29-May 1, 1985. Conference held April 29-May 1, 1985, at the Westin Hotel—Galleria in Dallas. The conference was sponsored by the National Institute for Petroleum and Energy Research, Bartlesville, Oklahoma. Reservoir characterization is a process for quantitatively assigning reservoir properties, recognizing geologic information and uncertainties in spatial variability. This book contains 19 chapters, and begins with the geological characterization of sandstone reservoir, followed by the geological prediction of shale distribution within the Prudhoe Bay field. The subsequent chapters are devoted to determination of reservoir properties, such as porosity, mineral occurrence, and permeability variation estimation. The discussion then shifts to the utility of a Bayesian-type formalism to delineate qualitative soft information and expert interpretation of reservoir description data. This topic is followed by papers concerning reservoir simulation, parameter assignment, and method of calculation of wetting phase relative

permeability. This text also deals with the role of discontinuous vertical flow barriers in reservoir engineering. The last chapters focus on the effect of reservoir heterogeneity on oil reservoir. Petroleum engineers, scientists, and researchers will find this book of great value.

Transgender Health and HIV Prevention Walter O. Bockting, Eric Avery, 2006-01-04 Get the latest assessment of the health needs of the transgender population The impact of the HIV/AIDS epidemic on the transgender community has been tragically ignored, and as yet there is surprisingly little research data on the subject of health care and HIV prevention in this marginalized population. Transgender Health and HIV Prevention fills this void by providing a groundbreaking empirical assessment of the health needs of transgender persons in several areas around the United States. Respected experts discuss issues that hinder the effectiveness of HIV prevention programs, including housing, mental health, and employment, as well as the unique broader problems of social stigma, discrimination, and the lack of transgender knowledge and sensitivity on the part of health providers and prevention workers. Even though recent studies show estimated HIV infection rates to be as much as 60 percent among specific transgender populations in the

United States, the transgender community continues to receive inadequate healthcare support. Transgender Health and HIV Prevention tackles the problems inherent in the healthcare system by first assessing the needs of transgender persons, then offering specific practical recommendations for remedy. Top researchers in partnership with community members in San Francisco, Houston, Washington DC, Chicago, Boston, Philadelphia, New England, San Juan, and Minneapolis/St. Paul bring empirical data together to assess what has to be done to effectively stem the HIV epidemic. This essential resource is extensively referenced with several tables to clarify data. Transgender Health and HIV Prevention explores in detail: health and social services needs of African-Americans, Latinas, and Asian/Pacific Islanders sources for the high rates of HIV infection among male-to-female transgender persons the prevalence of physical and sexual violence, substance abuse, and unemployment in the transgender community risk behaviors of male-to-female transgender persons health care providers' ignorance, insensitivity, and discrimination—with training strategies to increase patient access and effectiveness of care how traditional notions about femininity affect risk behaviors a comparison between transgender persons and other sexual minorities Transgender Health and HIV Prevention is crucial, one-of-a-kind reading for educators, students, researchers, public health professionals, social workers, health care providers, HIV/AIDS caregivers, and prevention workers.
