The Babylonian Astronomical Compendium MUL.APIN

Hermann Hunger, John Steele, 2018-07-11 MUL.APIN, written sometime before the 8th century BC, was the most widely copied astronomical text in ancient Mesopotamia: a compendium including information such as star lists, descriptions of planetary phases, mathematical schemes for the length of day and night, a discussion of the luni-solar calendar and rules for intercalation, and a short collection of celestial omens. This book contains an introductory essay, followed by a new edition of the text and a facing-page transliteration and English translation. Finally, the book contains a new and detailed commentary on the text. This is a fascinating study, and an important resource for anyone interested in the history of astronomy.

Etymological Dictionary of Egyptian Gábor

Takács, 2007-12-31 This is the third volume of the Etymological Dictionary of Egyptian. It comprises the Egyptian words with initial m-. The amount of material offered, the extensive treatment of scholarly discussions on each item, and the insights into the connections of Egyptian and the related Afro-Asiatic (Semito-Hamitic) languages, including many new lexical parallels, will make it an indispensable tool for comparative purposes and an unchallenged starting point for every linguist in the field.

Letters from Assyrian Scholars to the Kings

Esarhaddon and Ashurbanipal Ashurbanipal (King of Assyria), 2007 Eisenbrauns is pleased to announce this quality reprint of Simo Parpola's classic work, Letters from Assyrian Scholars to the Kings Esarhaddon and Assurbanipal. Part II: Commentary and Appendices originally appeared in 1983 as AOAT 5/2

Etymological Dictionary of Egyptian , 2007-12-01

This is the third and final volume of the

Etymological Dictionary of Egyptian. It comprises the Egyptian words with initial m-. The amount of material offered, the extensive treatment of scholarly discussions on each item, and the insights into the connections of Egyptian and the related Afro-Asiatic (Semitic-Hamitic) languages, including many new lexical parallels, will make it an indispensable tool for comparative purposes and an unchallenged starting point for every linguist in the field. The reader will find the etymological entries even more detailed than those of the introductory volume, due to the full retrospective presentation of all etymologies proposed since A. Erman's time, and thanks to an extremely detailed discussion of all possible relevant data even on the less known Afro-Asiatic cognates to the Egyptian roots.

Studies in the History of the Exact Sciences in Honour of David Pingree

Jan P. Hogendijk, Kim Plofker, Michio Yano, Charles Burnett, 2004-02-01
This collection of essays reflects the wide range of David Pingree's expertise in the scientific texts (above all, concerning astronomy and astrology) of Ancient Mesopotamia, Greece, India, Persia, and the medieval Arabic, Hebrew and Latin traditions. Both theoretical aspects and the practical applications of the exact sciences—in time keeping, prediction of the future, and the operation of magic—are dealt with. The book includes several critical editions and translations of hitherto unknown or understudied texts, and a particular emphasis is on the diffusion of scientific learning from one culture to another, and through time. Above all, the essays show the variety and sophistication of the exact sciences in non-Western societies in pre-modern times.

Mathematical Commentaries in the Ancient World

Karine Chemla, Glenn W. Most, 2022-06-09 This is the first book-length analysis of the techniques and

procedures of ancient mathematical commentaries. It focuses on examples in Chinese, Sanskrit, Akkadian and Sumerian, and Ancient Greek, presenting the general issues by constant detailed reference to these commentaries, of which substantial extracts are included in the original languages and in translation, sometimes for the first time. This makes the issues accessible to readers without specialized training in mathematics or in the languages involved. The result is a much richer understanding than was hitherto possible of the crucial role of commentaries in the history of mathematics in four different linguistic areas, of the nature of mathematical commentaries in general, of the contribution that the study of mathematical commentaries can make to the history of science and to the study of commentaries in general, and of the ways in which mathematical commentaries are like and unlike other kinds of commentaries.

Awakening Victory Michael Silverman, 2011-10-10
An "instructive first-hand account of how Iraq's insurgents were defeated" in the surge of 2007—written by a Combat Arms Battalion Commander who lived it (Publishers Weekly). In August 2006, the American war in Iraq was looking grim. Control of Al Anbar Province, the seat of the Sunni insurgency, was said to be irrevocably lost to the insurgents. Al Qaeda in Iraq had planted their flag in the provincial capital, Ramadi, declaring it the capital of their new "Islamic State of Iraq." In January 2007, the 3rd Battalion, 69th Armored Regiment, deployed to Ramadi, spearheading a surge that would become the D-Day of the Global War on Terror. By mid-summer 2007, attacks in the province were down ninety percent. As the "awakening" swept through Iraq, it brought about the best security situation since 2003. The 3rd Battalion was the only unit to participate in this campaign from start to finish. Moreover, many of

the US successes came directly from this unit's work. *Awakening Victory* tells the story of this incredible campaign through the eyes of the 3rd Battalion commander. It describes the battalion's actions, including incidents previously unknown to the public, but it is not merely another war story. The author uses the actions of his battalion to describe a paradigm shift, moving from a war of bombs and bullets to one of partnership and ideas.

Medical Instrumentation Jack M. Winters, Molly Follette Story, 2006-10-31 Two of the most important yet often overlooked aspects of a medical device are its usability and accessibility. This is important not only for health care providers, but also for older patients and users with disabilities or activity limitations. *Medical Instrumentation: Accessibility and Usability Considerations* focuses on how lack of usability

Spiele entwickeln für iPhone und iPad Patrick Völcker, 2012-10-19 Die erfolgreichsten Apps für iPhone und iPad sind einfache Spiele, die kurzweilige Unterhaltung bei schneller Erlernbarkeit bieten – sogenannte Casual Games. Patrick Völcker legt den Schwerpunkt seines praxisnahen Einstiegs in die iOS-Spieleprogrammierung daher auf diese Art von Spielen. In Workshops programmieren die Leser anhand von Klassikern wie 'Doodle Jump' oder 'R-Type' über 12 Spiele aus verschiedenen Casual-Games-Genres von Grund auf. Außerdem erlernen Sie das Handwerkszeug für die oft vernachlässigte Grafik- und Sound-Entwicklung und erhalten inspirierende Denkanstöße für eigene Projekte.

Kastner, Stadford R. Ovshinsky, Gordon A.

Thomas, 2012-12-06 Twenty-four years ago, Hellmut Fritzsche came to our laboratory to evaluate our work in amorphous materials. He came many times, sometimes bringing his violin to play with our youngest son, to talk, to help, to discover, and to teach. The times with him were always exciting and rewarding. There was a camaraderie in the early years that has continued and a friendship that has deepened among Iris and me and Hellmut, Sybille and their children. The vision that Hellmut Fritzsche shared with me, the many important contributions he made, the science that he helped so firmly to establish, the courage he showed in the time of our adversity, and the potential that he recognized put all of us in the amorphous field, not only his close friends and collaborators, in his debt. He helped make a science out of intuition, and played an important role not only in the experimental field but also in the basic theoretical aspects. It has been an honor to work with Hellmut through the years.

Cryptographic Hardware and Embedded Systems

Cetin K. Koc, Christof Paar, 1999-10-20 This book constitutes the refereed proceedings of the First International Workshop on Cryptographic Hardware and Embedded Systems, CHES'99, held in Worcester, MA, USA in August 1999. The 27 revised papers presented together with three invited contributions were carefully reviewed and selected from 42 submissions. The papers are organized in

sections on cryptographic hardware, hardware architectures, smartcards and embedded systems, arithmetic algorithms, power attacks, true random numbers, cryptographic algorithms on FPGAs, elliptic curve implementations, new cryptographic schemes and modes of operation.

Analysis of Parallel Spike Trains Sonja

Grün, Stefan Rotter, 2010-08-18 Solid and transparent data analysis is the most important basis for reliable interpretation of experiments. The technique of parallel spike train recordings using multi-electrode arrangements has been

available for many decades now, but only recently gained wide popularity among electro physiologists. Many traditional analysis methods are based on firing rates obtained by trial-averaging, and some of the assumptions for such procedures to work can be ignored without serious consequences. The situation is different for correlation analysis, the result of which may be considerably distorted if certain critical assumptions are violated. The focus of this book is on concepts and methods of correlation analysis (synchrony, patterns, rate covariance), combined with a solid introduction into approaches for single spike trains, which represent the basis of correlations analysis. The book also emphasizes pitfalls and potential wrong interpretations of data due to violations of critical assumptions.
