James Milton

Practical Vocabulary Builder Dorothy Gabel Liebowitz,1983

Measuring Second Language Vocabulary Acquisition James Milton,2009 *Measuring Second Language Vocabulary Acquisition* describes the effect that word frequency and lexical coverage have on learning and communication in a foreign language. It examines the tools we have for assessing the various facets of vocabulary knowledge, the scores these produce, and the way these are tied to exam and communicative performance.

Vocabulary Learning Strategies and Foreign Language Acquisition Višnja Pavičić Takač,2008-02-04 The book discusses vocabulary learning strategies as an integral subgroup of language learning strategies. It defines language learning strategies in general and their features on the basis of cognitive theory and relevant models of second language acquisition as the basis for empirical research. Furthermore, the book gives a survey of research on vocabulary learning strategies and describes three original empirical studies. Thus, the book attempts at integrating the approaches of theories of second language acquisition, the theory and practice of instructed foreign language learning, and the findings of current empirical research.

Writing to Learn Academic Words Breno B. Silva,2022-08-22 This book highlights the importance of English academic vocabulary for success at university and explores written tasks as effective pedagogical tools to promote the acquisition of academic words. The book reviews germane and recent SLA, psycholinguistic, corpus linguistics, and L2 writing research to underscore the challenges associated with the learning of academic words. Then, it reports on three empirical studies conducted in the Polish context. The first study develops a reliable tool to assess the knowledge of academic vocabulary of undergraduate learners. The second and third studies investigate the learning of academic words after the writing of sentences and argumentative essays, and discuss the role of cognition as a mediator of such learning. The book also provides an accessible introduction to linear mixed-effect models, a powerful, reliable, and flexible statistical technique that has been gaining popularity among SLA and psycholinguistics researchers.

Multilingual Law Colin D Robertson,2016-06-17 This book introduces and explores the concept of multilingual law. Providing an overview as to what is 'multilingual law', the study establishes a new discourse based on this concept, which has hitherto lacked recognition for reasons of complexity and multidisciplinaryity. The need for such a discourse now exists and is becoming urgent in view of the progress being made towards European integration and the legal and factual foundation for it in multilingualism and multilingual legislation. Covering different types of multilingual legal orders and their distinguishing features, as well as the basic structure of legal systems, the author studies policy formation, drafting, translation, revision, terminology and computer tools in connection with the legislative and judicial processes. Bringing together a range of diverse legal and linguistic ideas under one roof, this book is of importance to legal-linguists, drafters and translators, as well as students and scholars of legal linguistics, legal translation and revision.

Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms Neokleous, Georgios, Krulatz, Anna, Farrelly, Raichle, 2020-03-27 Literacy has traditionally been associated with the linguistic and functional ability to read and write. Although literacy, as a fundamental issue in education, has received abundant attention in the last few decades, most publications to date have focused on monolingual classrooms. Language teacher educators have a responsibility to prepare teachers to be culturally responsive and flexible so they can adapt to the range of settings and variety of learners they will encounter in their careers while also bravely questioning the assumptions they are encountering about multilingual literacy development and instruction. *The Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms* is an essential scholarly publication that explores the multifaceted nature of literacy development across the lifespan in a range of multilingual contexts. Recognizing that literacy instruction in contemporary language classrooms serving diverse student populations must go beyond developing reading and writing abilities, this book sets out to explore a wide range of literacy dimensions. It offers unique perspectives through a critical reflection on issues related to power, ownership, identity, and the social construction of literacy in multilingual societies. As a resource for use in language teacher preparation programs globally, this book will provide a range of theoretical and practical perspectives while creating space for pre- and in-service teachers to grapple with the ideas in light of their respective contexts. The book will also provide valuable insights to instructional designers, curriculum developers,

linguists, professionals, academicians, administrators, researchers, and students.

Foundation Models for Natural Language Processing Gerhard Paaß, Sven Giesselbach, 2023-05-23 This open access book provides a comprehensive overview of the state of the art in research and applications of Foundation Models and is intended for readers familiar with basic Natural Language Processing (NLP) concepts. Over the recent years, a revolutionary new paradigm has been developed for training models for NLP. These models are first pre-trained on large collections of text documents to acquire general syntactic knowledge and semantic information. Then, they are fine-tuned for specific tasks, which they can often solve with superhuman accuracy. When the models are large enough, they can be instructed by prompts to solve new tasks without any fine-tuning. Moreover, they can be applied to a wide range of different media and problem domains, ranging from image and video processing to robot control learning. Because they provide a blueprint for solving many tasks in artificial intelligence, they have been called Foundation Models. After a brief introduction to basic NLP models the main pre-trained language models BERT, GPT and sequence-to-sequence transformer are described, as well as the concepts of self-attention and context-sensitive embedding. Then, different approaches to improving these models are discussed, such as expanding the pre-training criteria, increasing the length of input texts, or including extra knowledge. An overview of the best-performing models for about twenty application areas is then presented, e.g., question answering, translation, story generation, dialog systems, generating images from text, etc. For each application area, the strengths and weaknesses of current models are discussed, and an outlook on further developments is given. In addition, links are provided to freely available program code. A concluding chapter summarizes the economic opportunities, mitigation of risks, and potential developments of AI.

Building and Using Comparable Corpora for Multilingual Natural Language Processing Serge Sharoff, Reinhard Rapp, Pierre Zweigenbaum, 2023-08-23 This book provides a comprehensive overview of methods to build comparable corpora and of their applications, including machine translation, cross-lingual transfer, and various kinds of multilingual natural language processing. The authors begin with a brief history on the topic followed by a comparison to parallel resources and an explanation of why comparable corpora have become more widely used. In particular, they provide the basis for the multilingual capabilities of pre-trained models, such as BERT or GPT. The book then focuses on building comparable corpora, aligning their sentences to create a database of suitable translations, and using these sentence translations to produce dictionaries and term banks. Then, it is explained how comparable corpora can be used to build machine translation engines and to develop a wide variety of multilingual applications.
