Social Lives in Language--sociolinguistics and Multilingual Speech Communities Gillian Sankoff,Miriam Meyerhoff,Naomi Nagy,2008 This volume offers a synthetic approach to language variation and language ideologies in multilingual communities. Although the vast majority of the world's speech communities are multilingual, much of sociolinguistics ignores this internal diversity. This volume fills this gap, investigating social and linguistic dimensions of variation and change in multilingual communities. Drawing on research in a wide range of countries (Canada, USA, South Africa, Australia, Papua New Guinea, Solomon Islands, Vanuatu), it explores: connections between the fields of creolistics, language/dialect contact, and language acquisition; how the study of variation and change, particularly in cases of additive bilingualism, is central to understanding social and linguistic issues in multilingual communities; how changing language ideologies and changing demographics influence language choice and/or language policy, and the pivotal place of multilingualism in enacting social power and authority, and a rich array of new empirical findings on the dynamics of multilingual speech communities.

Translanguaging and Epistemological Decentring in Higher Education and Research Heidi Bojsen,Petra Daryai-Hansen,Anne Holmen,Karen Risager,2023-01-13 Using data from multilingual settings in universities and adjacent learning contexts in East Asia, North Africa, Central and North America and Europe, this book provides examples of the heuristic value of translanguaging and epistemological decentring. Despite this and other theoretical and empirical work, and ever stronger calls for the inclusion of other languages, epistemologies and constructions of culture in higher education, decentring and translanguaging practices are often relegated to the margins or suppressed in research and education because of the organisational structures of education institutions and prevailing language norms, policies and ideologies. The authors draw on research on pluri- and multilingualism within education studies, as well as post- and decolonial theoretical contributions to the research on the role of language in education and knowledge production, to provide evidence that decentring cannot happen until learners have been given the tools to identify which sorts of centring dynamics and conditions are salient to their learning and (trans)languaging.

Accented America Joshua L. Miller,2011-04-21 American literary works written in the heyday of modernism between the 1890s and 1940s were playfully, painfully, and ambivalently engaged with language politics. The immigrant waves of the period fed into writers' aesthetic experimentation; their works, in turn, rewired ideas about national identity along with literary form. Accented America looks at the long history of English-Only Americanism-the political claim that U.S. citizens must speak a singular, shared American tongue-and traces its action in the language workshop that is literature. The broadly multi-ethnic set of writers brought into conversation here-including Gertrude Stein, Jean Toomer, Henry Roth, Nella Larsen, John Dos Passos, Lionel Trilling, Américo Paredes, and Carlos Bulosan-reflect the massive demographic shifts taking place during the interwar years. These authors share an

acute awareness of linguistic standardization while also following the defamiliarizing sway produced by experimentation with invented and improper literary vernaculars. Rather than confirming the powerfully seductive subtext of monolingualism-that those who speak alike are ethically and politically likeminded-multilingual modernists compose literature that speaks to a country of synthetic syntaxes, singular hybrids, and enduring strangeness.

An Experiment in Bible Translation Stuart Jeremy Foster,2008-09-01 This study sketches a complete arc from the impact at worldview level of covenant concepts in the Hebrew of the Old Testament to impact at worldview level among present-day Lomwe-speakers in northern Mozambique. It uses the challenge of adequately translating one Biblical Hebrew word, BERITH, to address missiological issues relevant throughout Africa. It proposes becoming the muloko wa Muluku, 'people of God', as a powerful integrating framework.

Multilingual Identities in a Global City D. Block,2005-11-22 Opening with a discussion of the key issues of globalization, migration, multiculturalism, multilingualism and global cities, David Block then turns to four detailed case studies: East Asian students living and working in London; foreign language teachers from France; London's growing Latino community; and second generation South Asian university students. Via these case studies the book explores the ambivalent and multi-layered identities of individuals who have crossed geographical and psychological borders during the course of their lifetimes and settled in London, the quintessential global city.

Humanizing Business Michel Dion,R. Edward Freeman,Sergiy D. Dmytriiev,2022-05-30 This book is about humanizing business. In contrast to the mainstream modern management and leadership literature, this book provides distinctly humane perspectives on business. The volume travels outside the world of business to explore what Humanities – such as Philosophy, History, Literature, Creative Arts, and Cultural Studies – can offer to business. Renowned scholars from different Humanities disciplines, as well as management researchers exploring the heritage of Humanities, convey what it actually means to make business more humane. The book strives to humanize business. It aims to show that it is not people who have to suppress their human feelings, aspirations, and beliefs when they are at their workplaces, but it is business itself that needs to be redefined by the human norms of human beings. Companies should care about their employees and other stakeholders letting them be themselves, i.e. be human, at work and beyond. The book will be of interest to management scholars across various business disciplines. It can also be used as teaching material in the classroom with MBA students, especially in Business Ethics, Business and Society, Sustainability, Organizational Behavior, Human Resource Management and other management courses. The volume will also be of interest to scholars that work in different Humanities fields and whose interests span organizations, management, and business. Finally, many practitioners in the business world, especially those in managerial and leadership positions, will find the book both thought-provoking and useful for them as well. Advertising as Multilingual Communication H. Kelly-Holmes,2016-01-11 Advertising has traditionally communicated messages to consumers with strong local and national identities. However, increasingly, products, producers, advertising agencies and media are becoming internationalized. In the development of strategies that appeal to a large multinational consumer base, advertising language takes on new 'multilingual' features. The author explores the role of advertising language in this new globalized environment, from a communicative theory point of view, as well as from a close linguistic analysis of some major advertising campaigns within a multicultural and multilingual marketplace.

The Way of the Linguist Steve Kaufmann,2005-11 The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book The Way of The Linguist, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.
