 [Ready the Cannons!](#) William Gurstelle, 2016-10-01 From the author of Backyard Ballistics comes this new DIY handbook on building cannons and other fun things that shoot, from wiffle ball launchers and beverage bottle bazookas to super-powered water guns and model culverins. It combines military history and physics with do-it-yourself projects. Now ordinary folks can construct a dozen awesome artillery devices in their garage or basement workshops using inexpensive household or hardware store materials and this step-by-step guide. Clear instructions, diagrams, and photographs show how to build projects ranging from the simple supersonic ping-pong ball shooter to the more complex replica of the Napoleon cannon. With a strong emphasis on safety, the book also gives tips on troubleshooting, tells the history of how and when the artillery devices were used, and explains the physics behind the projects. This book will be indispensable for the legions of backyard watergunners, model-rocket launchers, and fireworks fanatics who wish every day was the fourth of July.

 [Mushrooms](#) Peter Marren, 2018-02-28 Mushrooms, the first of a major new series of books on British natural history, provides a remarkable insight into the natural and human world of fungi. Peter Marren, in his inimitable, relaxed style, guides the reader through the extraordinary riches of this often overlooked group, from the amazing diversity of forms and lifestyles that populate the fungal landscape, to the pursuit of edible fungi for the pot, and the complexities of identification thrown up by our modern understanding of DNA. Throughout the book, the author tells a story rich in detail about how we have come to appreciate and, in some cases, fear the mushrooms and toadstools that are such an integral part of the changing seasons. Marren also provides a refreshingly candid view of our attempts to name species, the role of fungi in ecosystems, and our recent efforts to record and conserve them.
