IM Harris

The Music of Space Chris Carberry, 2024-03-31 Since the early days of motion picture production, film scores have helped define our emotional and aesthetic perception of stories on screen—particularly with space movies and television. The music from *The Day the Earth Stood Still*, *2001: A Space Odyssey*, *Star Wars*, *Star Trek*, *Battlestar Galactica* and others has helped define the public's awareness of space almost as much as the films themselves. In some cases, they have redefined the norms of film music. *Star Wars* not only revived the popularity of orchestral film scores but also helped stimulate an increased public interest in classical orchestral music around the world. This work explores the music and the composers who have helped define the sound of space for over a century, transforming how we perceive space and even inspiring greater interest in space exploration. This book also details how music has been performed and played in space since the early days of the space race.

Space Is the Place John F. Szwed, 2012-07-25 Always riveting, *Space Is the Place* is the definitive biography of one of the great big-band leaders, pianists, and surrealists of jazz (The New York Times)—unparalleled for his purposeful outlandishness, a man who exerted a powerful influence over a vast array of artists. Sun Ra—a/k/a Herman Poole Sonny Blount—was born in Alabama on May 22, 1914. But like Father Divine and Elijah Muhammad, he made a lifelong effort to obscure many of the facts of his early life. After years as a rehearsal pianist for nightclub revues and in blues and swing bands, including Wynonie Harris's and Fletcher Henderson's, Sun Ra set out in the 1950s to find a way to impart his views about the galaxy, black people, and spiritual matters through the various incarnations of the Intergalactic Arkestra. His repertoire ranging from boogie-woogie, swing, and bebop to free

form, fusion, and whatever, Sun Ra was above all a paragon of contradictions: profundity and vaudeville; technical pianistic virtuosity and irony; assiduous attention to arrangements and encouragement of collective improvisation; respect for tradition and celebration of the fresh. Some might have been bemused by his Afro-Platonic neo-hermeticism; others might have laughed at his egregious excesses. But Sun Ra was at once one of the great avant-gardists of the latter half of the twentieth century and a black cultural nationalist who extended Afrocentrism from ancient Egypt to the heavens.

Expanding the Space for Improvisation Pedagogy in

Music Guro Gravem Johansen, Kari Holdhus, Christina Larsson, Una MacGlone, 2019-05-31 Expanding the Space for Improvisation Pedagogy in Music is a critical, research-based anthology exploring improvisation in music pedagogy. The book broadens the understanding of the potentials and possibilities for improvisation in a variety of music education contexts and stimulates the development of knowledge and reflection on improvisation. The book critically examines the challenges, cultural values, aims and methods involved in improvisation pedagogy. Written by international contributors representing a variety of musical genres and research methodologies, it takes a transdisciplinary approach and outlines a way ahead for improvisation pedagogy and research, by providing a space for the exchange of knowledge and critique. This book will be of great interest to scholars, researchers, and postgraduate students in the fields of arts education, music education, improvisation, music psychology, musicology, ethnomusicology, artistic research and community music. It will also appeal to music educators on all levels in the field of music education and music psychology.

16th International Conference on Information

Technology-New Generations (ITNG 2019) Shahram

Latifi, 2019-05-22 This 16th International Conference on Information Technology - New Generations (ITNG), continues an

annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, the best student award, poster award, service award, a technical open panel, and workshops/exhibits from industry, government and academia.

John Cage's Concert for Piano and Orchestra Martin Iddon, Philip Thomas, 2020-05-14 John Cage's Concert for Piano and Orchestra is one of the seminal works of the second half of the twentieth century, and the centerpiece of the middle period of Cage's output. It is a culmination of Cage's work up to that point, incorporating notation techniques he had spent the past decade developing - techniques which remain radical to this day. But despite Cage's vitality to the musical development of the twentieth century, and the Concert's centrality to his career, the work is still rarely performed and even more rarely examined in detail. In this volume, Martin Iddon and Philip Thomas provide a rich and critical examination of this enormously significant piece, tracing its many contexts and influences - particularly Schoenberg, jazz, and Cage's own compositional practice - through a wide and previously untapped range of archival sources. Iddon and Thomas explain the Concert through a reading of its many histories, especially in performance - from the legendary performer disobedience and audience disorder of its 1958 New York premiere to a no less disastrous European premiere later the same year. They also highlight the importance of the piano soloist who premiered the piece, David Tudor, and its use alongside choreographer Merce

Cunningham's *Antic Meet*. A careful examination of an apparently bewildering piece, the book explores the critical response to the Concert's performances, re-interrogates the mythology surrounding it, and finally turns to the music itself, in all its component parts, to see what it truly asks of performers and listeners.

American Space, Jewish Time Stephen J. Whitfield,2017-07-05 This is a delightful book, a small gem replete with insightful, provocative pieces about both American culture and Jewish life. I think that Stephen Whitfield is one of the most original essayists on these two topics. Few other scholars combine the density of his knowledge with the verve of his prose. -- Hasia R. Living Space Michael E. Veal,2024-04-09 *Living Space: John Coltrane, Miles Davis, and Free Jazz, from Analog to Digital* fuses biography and style history in order to illuminate the music of two jazz icons, while drawing on the discourses of photography and digital architecture to fashion musical insights that may not be available through the traditional language of jazz analysis. The book follows the controversial trajectories of two jazz legends, emerging from the 1959 album *Kind of Blue*. Coltrane's odyssey through what became known as free jazz brought stylistic (r)evolution and chaos in equal measure. Davis's spearheading of jazz-rock fusion opened a door through which jazz's ongoing dialogue with the popular tradition could be regenerated, engaging both high and low ideas of creativity, community, and commerce. Includes 42 illustrations.

In The Space Of A Song Richard Dyer,2013-07-03 *Songs*

take up space and time in films. Richard Dyer's *In the Space of a Song* takes off from this perception, arguing that the way songs take up space indicates a great deal about the songs themselves, the nature of the feelings they present, and who is allowed to present feelings how, when and where. *In the Space of a Song* explores this perception through a range of examples, from classic MGM musicals to blaxploitation cinema, with the career of Lena Horne providing a turning point in the cultural dynamics of the feeling. Chapters include: The perfection of *Meet Me in St. Louis* A Star Is Born and the construction of authenticity 'I seem to find the happiness I seek': Heterosexuality and dance in the musical *The space of happiness in the musical Singing prettily: Lena Horne in Hollywood* Is *Car Wash* a musical? Music and presence in blaxploitation cinema *In the Space of a Song* is ideal for both scholars and students of film studies.

A Pure Solar World Paul Youngquist, 2016-10-25 Sun Ra said he came from Saturn. Known on earth for his inventive music and extravagant stage shows, he pioneered free-form improvisation in an ensemble setting with the devoted band he called the "Arkestra." Sun Ra took jazz from the inner city to outer space, infusing traditional swing with far-out harmonies, rhythms, and sounds. Described as the father of Afrofuturism, Sun Ra created "space music" as a means of building a better future for American blacks here on earth. *A Pure Solar World: Sun Ra and the Birth of Afrofuturism* offers a spirited introduction to the life and work of this legendary but underappreciated musician, composer, and poet. Paul Youngquist explores and assesses Sun Ra's wide-ranging creative output—music, public preaching, graphic design, film and stage performance, and poetry—and connects his diverse undertakings to the culture and politics of his times, including the space race, the rise of technocracy, the civil rights movement, and even space-age bachelor-pad music. By thoroughly examining the astro-black mythology that Sun Ra espoused, Youngquist masterfully demonstrates that he offered both a holistic response

to a planet desperately in need of new visions and vibrations and a new kind of political activism that used popular culture to advance social change. In a nation obsessed with space and confused about race, Sun Ra aimed not just at assimilation for the socially disfranchised but even more at a wholesale transformation of American society and a more creative, egalitarian world.

John Birchensha: Writings on Music

Wardhaugh, 2017-07-05 John Birchensha (c.1605-?1681) is chiefly remembered for the impression that his theories about music made on the mathematicians, natural philosophers and virtuosi of the Royal Society in the 1660s and 1670s, and for inventing a system that he claimed would enable even those without practical experience of music to learn to compose in a short time by means of 'a few easy, certain, and perfect Rules'-his most famous composition pupil being Samuel Pepys in 1662. His great aim was to publish a treatise on music in its philosophical, mathematical and practical aspects (which would have included a definitive summary of his rules of composition), entitled *Syntagma music*. Subscriptions for this book were invited in 1672-3, and it was due to be published by March 1675; but it never appeared, and no final manuscript of it survives. Consequently knowledge about his work has hitherto remained extremely sketchy. Recent research, however, has brought to light a number of manuscripts which allow us at last to form a more complete view of Birchensha's ideas. Almost none of this material has been previously published. The new items include an autograph treatise of c.1664 ('A Compendious Discourse of the Principles of the Practicall & Mathematicall Partes of Musick') which Birchensha presented to the natural philosopher Robert Boyle, and which covers concisely much of the ground that he intended to cover in *Syntagma musica*. Detailed synopsis for *Syntagma music* which he prepared for a meeting of the Royal Society in February 1676; and an autograph notebook (now in Brussels) containing his six rules of composition with music examples, presumably written for a pupil. Bringing all

this material together in a single volume will allow scholars to see how Birchensha's rules and theories developed over a period of fifteen years, and to gain at least a flavour of the lost Syntagma music

John Calvin Matthieu Arnold,2016-07-13 The three years that Calvin spent in Strasbourg are often considered a simple gap between his two periods in Geneva (1536-1538 and 1541-1564). However, this period has been shown to be extremely fertile for Calvin in literary, theological, and pastoral fields, not forgetting his marriage to Idelette de Bure. It was in Strasbourg that Calvin published the second Latin edition, greatly increased, of his Institution, and where he wrote the first French version of this summary of the reformed religion. There he lectured on Romans, replied to Cardinal Sadolet, and wrote his Little Treatise on Holy Communion, intended to reconcile Protestants. There he became familiar with Martin Bucer's catechetical practice and with the songs of the Strasbourg parishes, which inspired his Some Psalms and Canticles put into Song, and there he gained the friendship of Philippe Melancthon and the respect of other Reformers.

Liber Amicorum John Steele Warren Drake,1997 John Steele was educated at Victoria University of Wellington, and at

Cambridge University, where he was a student of Thurston Dart. Steele was the first New Zealander to become a professional musicologist, and the first to achieve international repute, largely for his work on Italian music of the late sixteenth and early seventeenth centuries. This volume has been undertaken by the New Zealand Musicological Society as a tribute to its most distinguished member on the occasion of his retirement from Otago University. The main focus of the collection is the music of the sixteenth to eighteenth centuries.
