The Sound of Innovation Andrew J. Nelson,2023-08-15 How a team of musicians, engineers, computer scientists, and psychologists developed computer music as an academic field and ushered in the era of digital music. In the 1960s, a team of Stanford musicians, engineers, computer scientists, and psychologists used computing in an entirely novel way: to produce and manipulate sound and create the sonic basis of new musical compositions. This group of interdisciplinary researchers at the nascent Center for Computer Research in Music and Acoustics (CCRMA, pronounced "karma") helped to develop computer music as an academic field, invent the technologies that underlie it, and usher in the age of digital music. In The Sound of Innovation, Andrew Nelson chronicles the history of CCRMA, tracing its origins in Stanford's Artificial Intelligence Laboratory through its present-day influence on Silicon Valley and digital music groups worldwide. Nelson emphasizes CCRMA's interdisciplinarity, which stimulates creativity at the intersections of fields; its commitment to open sharing and users; and its pioneering commercial engagement. He shows that Stanford's outsized influence on the emergence of digital music came from the intertwining of these three modes, which brought together diverse supporters with different aims around a field of shared interest. Nelson thus challenges long-standing assumptions about the divisions between art and science, between the humanities and technology, and between academic research and commercial applications,

showing how the story of a small group of musicians reveals substantial insights about innovation. Nelson draws on extensive archival research and dozens of interviews with digital music pioneers; the book's website provides access to original historic documents and other material.

Driving While Brown Terry Greene Sterling,Jude Joffe-Block,2021-04-20 A smart, well-documented book about a group of people determined to hold the powerful to account.—2021 NPR Books We Love Journalism at its best.—2022 Southwest Books of the Year: Top Pick A 2021 Immigration Book of the Year, Immigration Prof Blog Investigative Reporters & Editors Book Award Finalist 2021 How Latino activists brought down powerful Arizona sheriff Joe Arpaio. Journalists Terry Greene Sterling and Jude Joffe-Block spent years chronicling the human consequences of Sheriff Joe Arpaio's relentless immigration enforcement in Maricopa County, Arizona. In Driving While Brown, they tell the tale of two opposing movements that redefined Arizona's political landscape—the restrictionist cause

advanced by Arpaio and the Latino-led resistance that rose up against it. The story follows Arpaio, his supporters, and his adversaries, including Lydia Guzman, who gathered evidence for a racial-profiling lawsuit that took surprising turns. Guzman joined a coalition determined to stop Arpaio, reform unconstitutional policing, and fight for Latino civil rights. Driving While Brown details Arpaio's transformation—from America's Toughest Sheriff, who forced inmates to wear pink underwear, into the nation's most feared immigration enforcer who ended up receiving President Donald Trump's first pardon. The authors immerse readers in the lives of people on both sides of the battle and uncover the deep roots of the Trump administration's immigration policies. The result of tireless investigative reporting, this powerful book provides critical insights into effective resistance to institutionalized racism and the community organizing that helped transform Arizona from a conservative stronghold into a battleground state.

Higher Education in the Era of the Fourth Industrial Revolution Nancy W. Gleason,2018-06-21 This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are

preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.
