## **Basketball Sports Medicine and Science** Lior Laver,Baris

Kocaoglu,Brian Cole,Amelia J. H. Arundale,Jeffrey

Bytowski,Annunziato Amendola,2020-10-05 This book is designed as a comprehensive educational resource not only for basketball medical caregivers and scientists but for all basketball personnel. Written by a multidisciplinary team of leading experts in their fields, it provides information and guidance on injury prevention, injury management, and rehabilitation for physicians, physical therapists, athletic trainers, rehabilitation specialists, conditioning trainers, and coaches. All commonly encountered injuries and a variety of situations and scenarios specific to basketball are covered with the aid of more than 200 color photos and illustrations. **Basketball Sports Medicine and Science** is published in collaboration with ESSKA and will represent a superb, comprehensive educational resource. It is further hoped that the book will serve as a link between the different disciplines and modalities involved in basketball care, creating a common language and improving communication within the team staff and environment.

**Strengthening Forensic Science in the United States** National  
Research Council, Division on Engineering and Physical  
Sciences, Committee on Applied and Theoretical Statistics, Policy and  
Global Affairs, Committee on Science, Technology, and  
Law, Committee on Identifying the Needs of the Forensic Sciences  
Community, 2009-07-29 Scores of talented and dedicated people serve  
the forensic science community, performing vitally important work.  
However, they are often constrained by lack of adequate resources,  
sound policies, and national support. It is clear that change and  
advancements, both systematic and scientific, are needed in a number  
of forensic science disciplines to ensure the reliability of work,  
establish enforceable standards, and promote best practices with  
consistent application. *Strengthening Forensic Science in the United  
States: A Path Forward* provides a detailed plan for addressing these  
needs and suggests the creation of a new government entity, the  
National Institute of Forensic Science, to establish and enforce  
standards within the forensic science community. The benefits of  
improving and regulating the forensic science disciplines are clear:  
assisting law enforcement officials, enhancing homeland security, and  
reducing the risk of wrongful conviction and exoneration.  
*Strengthening Forensic Science in the United States* gives a full  
account of what is needed to advance the forensic science disciplines,  
including upgrading of systems and organizational structures, better

training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Transforming the Workforce for Children Birth Through Age 8**

National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who

contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
