**Copyright and the Music Marketplace** United States Copyright Office,2015-12-21 The Copyright Office has previously highlighted the outmoded rules for the licensing of musical works and sound recordings as an area in significant need of reform. **Democratizing Innovation** Eric Von Hippel,2006-02-17 The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among lead users, who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

**Lyrics and the Law** Aaron R. S. Lorenz,2007 The subject of the book is important in order to show that while the Supreme Court writes decisions and legislators create and modify statutes, music is more invasive and influential in the lives of the populous. The book's first purpose is to introduce readers to the classic jurisprudential schools of thought and connect those philosophies to the lyrics of various songs. There is clear evidence that Natural Law and Legal Positivism have been instrumental in establishing a legal structure and philosophy of law. The remnants of those jurisprudential schools can be directly seen in the lyrics of the last 50 years. The book notes that greater attention should be paid to the music since it is in actuality, non-traditional jurisprudence. After classic jurisprudence is presented, the book undertakes Constitutive Theory and connects lyrics to this critical approach of law.
