Musicophilia Oliver Sacks,2010-02-05 What goes on in human beings when they make or listen to music? What is it about music, what gives it such peculiar power over us, power delectable and beneficent for the most part, but also capable of uncontrollable and sometimes destructive force? Music has no concepts, it lacks images; it has no power of representation, it has no relation to the world. And yet it is evident in all of us—we tap our feet, we keep time, hum, sing, conduct music, mirror the melodic contours and feelings of what we hear in our movements and expressions. In this book, Oliver Sacks explores the power music wields over us—a power that sometimes we control and at other times don't. He explores, in his inimitable fashion, how it can provide access to otherwise unreachable emotional states, how it can revivify neurological avenues that have been frozen, evoke memories of earlier, lost events or states or bring those with neurological disorders back to a time when the world was much richer. This is a book that explores, like no other, the myriad dimensions of our experience of and with music.

Copyright and the Music Marketplace United States Copyright Office,2015-12-21 The Copyright Office has previously highlighted the outmoded rules for the licensing of musical works and sound recordings as an area in significant need of reform. Moreover, the Office has underscored the need for a comprehensive approach to copyright review and revision generally. This is especially true in the case of music licensing the problems in the music marketplace need to be evaluated as a whole, rather than as isolated or individual concerns of particular stakeholders.

What the Best College Teachers Do Ken Bain,2011-09-01 Winner of the Virginia and Warren Stone Prize awarded annually by Harvard University Press for an outstanding book on education and society What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.

The Common Good Robert B. Reich,2019-01-15 Robert B. Reich makes a powerful case for the expansion of America's moral imagination. Rooting his argument in common sense and everyday reality, he demonstrates that a common good constitutes the very essence of any society or nation. Societies, he says, undergo virtuous cycles that reinforce the common good as well as vicious cycles that undermine it, one of which America has been experiencing for the past five decades. This process can and must be reversed. But first we need to weigh the moral obligations of citizenship and carefully consider how we relate to honor, shame, patriotism, truth, and the meaning of leadership. Powerful, urgent, and utterly vital, this is a heartfelt missive from one of our foremost political thinkers.

Human by Design Gregg Braden,2017 Human by Design invites you on a journey beyond Darwin's theory of evolution, beginning with the fact that we exist as we do, even more empowered, and more connected with ourselves and the world, than scientists have believed possible.* * *In one of the great ironies of the modern world, the science that was expected to solve life's mysteries has done just the opposite. New discoveries have led to more unanswered questions, created deeper mysteries, and brought us to the brink of forbidden territory when it comes to explaining our origin and existence. These discoveries reveal the following facts: - Fact 1. Our origin--Modern humans appeared suddenly on earth approximately 200,000 years ago, with the advanced brain, nervous system, and capabilities that set them apart from all other known forms of life already developed, rather than having developed slowly and gradually over a long periods of time.- Fact 2. Missing physical evidence--The relationships shown on the conventional tree of human evolution are speculative connections only. While they are believed to exist, a 150-year search has failed to produce the physical evidence that confirms the relationships shown on the evolutionary family tree.- Fact 3. New DNA evidence--The comparison of DNA between ancient Neanderthals, previously thought to be our ancestors, and early humans tells us that we did not descend from the Neanderthals.- Fact 4. A rare DNA fusion--Advanced genome analysis reveals that the DNA that sets us apart from other primates, including in our advanced brain and nervous system, is the result of an ancient and precise fusion of genes occurring in a way that suggests something beyond evolution made our humanness possible.- Fact 5. Our extraordinary abilities--We are born with the capacity to self-heal, to self-regulate longevity, to activate an enhanced immune response, and to experience deep intuition, sympathy, empathy, and, ultimately, compassion--and to do each of these on demand.In this book, New York Times best-selling author and 2017 Templeton Award nominee Gregg Braden crosses the traditional boundaries of science and spirituality to answer the timeless question at the core of our existence--Who are we?--and to reveal science-based techniques that awaken our uniquely human experiences of deep intuition, precognition, advanced states of self-healing, and much more! Beyond any reasonable doubt, Human by Design reveals that we're not what we've been told, and much more than we've ever imagined.

Tenth of December George Saunders,2013-01-03 The prize-winning, New York Times bestselling short story collection from the internationally bestselling author of Lincoln in the Bardo 'The best book you'll read this year' New York Times 'Dazzlingly surreal stories about a failing America' Sunday Times WINNER OF THE 2014 FOLIO PRIZE AND SHORTLISTED FOR THE NATIONAL BOOK AWARD 2013 George Saunders's most wryly hilarious and disturbing collection yet, Tenth of December illuminates human experience and explores figures lost in a labyrinth of troubling preoccupations. A family member recollects a backyard pole dressed for all occasions; Jeff faces horrifying ultimatums and the prospect of Darkenfloxx(TM) in some unusual drug trials; and Al Roosten hides his own internal monologue behind a winning smile that he hopes will make him popular. With dark visions of the future riffing against ghosts of the past and the ever-settling present, this collection sings with astonishing charm and intensity.

The Warren Buffett Way Robert G. Hagstrom,2013-09-13 Warren Buffett is the most famous investor of all time and one of today's most admired business leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of The Warren Buffett Way gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor - just like Buffett Why "loss aversion", the tendency of most investors to overweight the pain of losing money, is one of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett's approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.

Won't Get Fooled Again Richie Unterberger,2011-04-01 From mid-1970 to early 1974, The Who undertook an amazing and peculiar journey in which they struggled to follow up Tommy with a yet bigger and better rock opera. One of those projects, Lifehouse, was never completed, though many of its songs formed the bulk of the classic 1971 album Who's Next. The other, Quadrophenia, was as down-to-earth as the multimedia Lifehouse was futuristic; issued as a double album in 1973, it eventually became esteemed as one of the Who's finest achievements, despite initial unfavourable comparisons to Tommy. Along the way, the group's visionary songwriter, Pete Townshend, battled conflicts within the band and their management, as well as struggling against the limits of the era's technology as a pioneering synthesizer user and a conceptualist trying to combine rock with film and theatre. The results included some of rock's most ambitious failures, and some of its most spectacular triumphs. In Won't Get Fooled Again: The Who From Lifehouse To Quadrophenia, noted rock writer and historian Richie Unterberger documents this intriguing period in detail, drawing on many new interviews; obscure rare archive sources and recordings; and a vast knowledge of the music of the times. The result is a comprehensive, articulate history that sheds new light on the band's innovations and Pete Townshend's massive ambitions, some of which still seem ahead of their time in the early 21st century.
