*On Mystery, Ineffability, Silence and Musical Symbolism*

Laurence Wuidar, 2021-09-09 Collecting together numerous examples of Augustine's musical imagery in action, Laurence Wuidar reconstructs the linguistic laboratory and the hermeneutics in which he worked. Sensitive and poetical, this volume is a reminder that the metaphor of music can give access not only to human interiority, but allow the human mind to achieve proximity to the divine mind. Composed by one of Europe's leading musicologists now engaging an English-speaking audience for the first time, this book is a candid exploration of Wuidar's expertise. Drawing on her long knowledge of music and the occult, from antiquity to modernity, Wuidar particularly focuses upon Augustine's working methods while refusing to be distracted by questions of faith or morality. The result is an open and at times frightening vista on the powers that be, and our complex need to commune with them.

**The Mind's Ear** Bruce Adolphe, 2021-08-05 The Mind's Ear offers a unique approach to stimulating the musical imagination and inspiring creativity, as well as providing detailed exercises aimed at improving the ability to read and imagine music in silence, in the mind's ear. Modelling his exercises on those used in theatre games and acting classes and drawing upon years of experience with improvisation and composition, Bruce Adolphe has written a compelling, valuable, and practical guide to musical creativity that can benefit music students at all levels and help music teachers be more effective and inspiring. This expanded edition offers 34 new exercises inspired by improv comedy, hip-hop sampling and loops, robots, and AI as well as a new section

based on Mr. Adolphe's Piano Puzzlers segment on public radio's Performance Today. The book provides provocative ideas and useful tools for professional performers and composers, as well as offering games and exercises to serious listeners that can increase their musical understanding and level of engagement with music in a variety of ways.

Musical Portraits Joshua S. Walden, 2018 Joshua S. Walden's *Musical Portraits: The Composition of Identity in Contemporary and Experimental Music* explores the wide-ranging but under-examined genre of musical portraiture. It focuses in particular on contemporary and experimental music created between 1945 and the present day, an era in which conceptions of identity have changed alongside increasing innovation in musical composition as well as in the uses of abstraction, mixed media, and other novel techniques in the field of visual portraiture. In the absence of physical likeness, an element typical of portraiture that cannot be depicted in sound, composers have experimented with methods of constructing other attributes of identity in music, such as character, biography, and profession. By studying musical portraits of painters, authors, and modern celebrities, in addition to composers' self-portraits, the book considers how representational and interpretive processes overlap and differ between music and other art forms, as well as how music is used in the depiction of human identities. Examining a range of musical portraits by composers including Peter Ablinger, Pierre Boulez, Morton Feldman, Philip Glass, György Ligeti, and Virgil Thomson, and director Robert Wilson's on-going series of video portraits of modern-day celebrities and his portrait opera *Einstein on the Beach*, *Musical Portraits* contributes to the study of music since 1945 through a detailed examination of contemporary understandings of music's capacity to depict identity, and of the intersections between music, literature, theater, film, and the visual arts.

**Composing under the Skin** Paul Craenen,2014-04-29 A revealing study of the physical presence of the musician in musical performance. Fingers slipping over guitar strings, the tap of a bow against the body of a cello, a pianist humming along to the music: contemporary composers often work with parasitic, non-conventional sounds such as these. Are they to be perceived as musical elements or do they shift attention to the physical effort of music-making, contact between a body and an instrument? Composer Paul Craenen explores ways in which the musician's body is revealed in musical performance. He leads us from Cage, Lachenmann, Kagel and their contemporaries to a discussion of how today's generation of young composers is writing a body paradigm into composition itself. Micro-temporal physical gestures and instrumental timbre provide the key to unveiling the physical presence of both a musician and a 'composing body'. The author's concept of 'intercorporeality', along with the idea of an alternating linear and non-linear relationship of the composing body to time, casts new light on the relationship between musicians, composers, and music consumers.

**Musical Aesthetics: The nineteenth century** Edward A. Lippman,1986 The second volume of this anthology of musical aesthetics proceeds from the rational, common-sense examination of the 18th-century artistic experience to the realm of 19th-century expressiveness. The rational foundation of aesthetics gave way to an emphasis on an art form's strength of feeling and expressive power, a purity of the creation and the creator. No longer confined to a restricted sense of beauty, music admitted the violent, the enormous and the ugly into its sphere of emotion,

now the era of romanticism and Sturm und Drang. These developments are here detailed in the writings of Wackenroder, Herder, Thibaut, Schelling, Hegel, Schopenhauer, Kirkegaard, Wagner, Hanslick, Ambros, Nietzsche, Spencer, Gurney, and Haussegger. Through them we see the classical province of proportion, educated taste and contained expressiveness recede, and the emotional realism of music come to the fore.

**Everything's Coming Up Profits** Steve Young, Sport Murphy, 2013 The little-known world of industrial shows is reconstructed through the record collection of author Steve Young, who has spent twenty years finding the extremely rare souvenir albums as well as tracking down and interviewing the writers and performers.

**Music and the Brain** Macdonald Critchley, R. A. Henson, 2014-04-24 Music and the Brain: Studies in the Neurology of Music is a collaborative work that discusses musical perception in the context of medical science. The book is comprised of 24 chapters that are organized into two parts. The first part of the text details the various aspects of nervous function involved in musical activity, which include neural and mechanical aspects of singing; neurophysiological interpretation of musical ability; and ecstatic and synesthetic experiences during musical perception. The second part deals with the effects of nervous disease on musical function, such as musicogenic epilepsy, the amusias, and occupational palsies. The book will be of great interest to students, researchers, and practitioners of disciplines that deal with the nervous system, such as psychology, neurology, and psychiatry.

Metaphors of Depth in German Musical Thought Holly Watkins, 2011-09-01 What does it mean to say that music is deeply moving? Or that music's aesthetic value derives from its deep

structure? This study traces the widely employed trope of musical depth to its origins in German-language music criticism and analysis. From the Romantic aesthetics of E. T. A. Hoffmann to the modernist theories of Arnold Schoenberg, metaphors of depth attest to the cross-pollination of music with discourses ranging from theology, geology and poetics to psychology, philosophy and economics. The book demonstrates that the persistence of depth metaphors in musicology and music theory today is an outgrowth of their essential role in articulating and transmitting Germanic cultural values. While musical depth metaphors have historically served to communicate German nationalist sentiments, Watkins shows that an appreciation for the broad connotations of those metaphors opens up exciting new avenues for interpretation.

Stephen Sondheim and the Reinvention of the American Musical Robert L. McLaughlin, 2016-08-11 From *West Side Story* in 1957 to *Road Show* in 2008, the musicals of Stephen Sondheim and his collaborators have challenged the conventions of American musical theater and expanded the possibilities of what musical plays can do, how they work, and what they mean. Sondheim's brilliant array of work, including such musicals as *Company*, *Follies*, *Sweeney Todd*, *Sunday in the Park with George*, and *Into the Woods*, has established him as the preeminent composer/lyricist of his, if not all, time. *Stephen Sondheim and the Reinvention of the American Musical* places Sondheim's work in two contexts: the exhaustion of the musical play and the postmodernism that, by the 1960s, deeply influenced all the American arts. Sondheim's musicals are central to the transition from the Rodgers and Hammerstein-style musical that had dominated Broadway stages for twenty years to a new postmodern musical. This new style reclaimed many of the self-aware, performative techniques of the 1930s musical comedy to develop its themes of the breakdown of narrative knowledge and the fragmentation of identity. In his most recent work, Sondheim, who was famously mentored by Oscar Hammerstein II, stretches

toward a twenty-first-century musical that seeks to break out of the self-referring web of language. Stephen Sondheim and the Reinvention of the American Musical offers close readings of all of Sondheim's musicals and finds in them critiques of the operation of power, questioning of conventional systems of knowledge, and explorations of contemporary identity.
