**The Wretched of the Screen** Hito Steyerl,2013-04-05 In Hito Steyerl's writing we begin to see how, even if the hopes and desires for coherent collective political projects have been displaced onto images and screens, it is precisely here that we must look frankly at the technology that seals them in. The Wretched of the Screen collects a number of Steyerl's landmark essays from recent years in which she has steadily developed her very own politics of the image. Twisting the politics of representation around the representation of politics, these essays uncover a rich trove of information in the formal shifts and aberrant distortions of accelerated capitalism, of the art system as a vast mine of labor extraction and passionate commitment, of occupation and internship, of structural and literal violence, enchantment and fun, of hysterical, uncontrollable flight through the wreckage of postcolonial and modernist discourses and their unanticipated openings. e-flux journal Series edited by Julieta Aranda, Brian Kuan Wood, Anton Vidokle

**Cyber Fraud** Rick Howard,2009-04-23 With millions lost each year, cyber crime has evolved from a minor nuisance to a major concern involving well-organized actors and highly sophisticated organizations. Combining the best of investigative journalism and technical analysis, Cyber Fraud: Tactics, Techniques, and Procedures documents changes in the culture of cyber criminals and explores the innovations that are the result of those changes. The book uses the term Botnet as a metaphor for the evolving changes represented by this underground economy. Copiously illustrated, this engaging and engrossing book explores the state of threats present in the cyber fraud underground. It discusses phishing and pharming, trojans and toolkits, direct threats, pump-and-dump scams, and other fraud-related activities of the booming cyber-underground economy. By examining the geopolitical and socio-economic foundations of a cyber threat landscape, the book specifically examines telecommunications infrastructure development, patterns and trends of internet adoption and use, profiles of specific malicious actors, threat types, and trends in these areas. This eye-opening work includes a variety of case studies — including the cyber threat landscape in Russia and Brazil. An in-depth discussion is provided on the Russian Business Network's (RBN) role in global cyber crime as well as new evidence on how these criminals steal,

package, buy, sell, and profit from the personal financial information of consumers. Armed with this invaluable information, organizations and individuals will be better able to secure their systems and develop countermeasures to disrupt underground fraud.

**Flora of the Codex Cruz-Badianus** Arthur O. Tucker,Jules Janick,2020-10-09 In 1929, Charles Upson Clark (1875-1960), a history Professor at Columbia University carrying out bibliographic research on the early history of the Americas in the Vatican Library, came across a remarkable illustrated Latin manuscript entitled Libellus de Medicinalibus Indorum Herbis (Little Book of Indian Medicinal Herbs) completed in 1552. The manuscript now known as the Codex Cruz-Badianus (CCB) contained 185 illustrations (phytomorphs) of plants with text that described their medicinal uses. This manuscript spread new light on botanical and medicinal knowledge of the indigenous peoples of Mexico known today as the Nahuas or Aztecs. It was to have major repercussions on our knowledge of Aztec culture and the history of New Spain in the 16th century. CCB was produced at the Colegio of Imperial de Santa Cruz at Tlatelolco established in 1536 to train sons of the Aztec nobility for the clergy. The authors were two indigenous faculty members, Martin (Martinus in Latin) de la Cruz and Juan Badiano (Juannes Badianus in Latin) whose Spanish names were conferred upon their baptism. Martin de la Cruz was the Colegio's indigenous doctor who gave instruction in medicine and Juan Badiano, a Latin teacher and former student translated the book into Latin. The herbal dedicated to the Viceroy Francisco de Mendoza was sent to Spain as a gift to King Carlos I soon after its completion in 1552. The original ended up in the Vatican Library until 1990 when John Paul II returned it to Mexico. In 1931, the Mayanist scholar, William Gates, and the biologist Emily Walcott Emmart became aware of the manuscript and independently translated it to English. In 2009, Martin Clayton, Luigi Guerrini, and Alejandro de Avila identified plants of the CCB based on Emmart's book

and a 17th century copy found in the Windsor library. Of the 185 phytomophs, Gates identified 85 on the generic level, Emmart 9, and Clayton et al. 126. However most of these identifications disagree. In the present work, 183 of 185 phytomorphs are systematically re-evaluated and identified on the generic, as well as specific level, along with their botanical descriptions, previous identifications, putative identification, distribution, names, and uses.

**Lake District Walks** Brian Conduit,1990-03 All the essential ingredients of a mountain landscape grandeur, beauty, ruggedness can be found in the Lake District, yet on a comparatively small scale, making the region welcoming rather than forbidding. From almost all the major peaks there are views of peaceful, wooded valleys, giving the region an essential 'Englishness' which distinguishes it from the Scottish Highlands and nearby Snowdonia and inspiring some of William Wordsworth's most romantic poetry.

*Beneath the Dust of Time* Jacques R. Pauwels,2009 Aims to explain the origin and meaning of the

names of peoples (e.g. Greeks, Germans), countries (e.g. Spain), continents (Europe, Africa), seas (Baltic), mountains (Alps, Pyrenees), rivers (Nile, Rhine, Danube), and cities (Rome, Babylon). These names are generally extremely old, and many can be traced back to migrants who had fled from their desertifying homeland in North Africa and who spoke non-Indo-European languages such as Etruscan. Pauwels has written a book for the general public, but historians, geographers, and linguists will also benefit from reading it (...). [He] is a scholar who knows how to tell an intriguing story. Too few of his colleagues possess that talent.
