Wound Healing Vlad Alexandrescu,2016-10-12 Outstanding scientific advances over the last decades unceasingly reveal real complexity of wound-healing process, astonishing in its staged progression, as life is unfolding itself. This natural course of tissue repair seems to bear thousands of overlapping molecular and macroscopic processes that nowadays only start to unfold to our knowledge. The present volume collecting recent scientific references proposes to readers a two-folded audacious goal. First, an updated design of intimate cellular mechanisms is entailed in tissue regeneration that emanates from the first section of the book. Next, a multidisciplinary therapeutic perspective that focuses on macroscopic healing throughout the second part of this work adds clinically integrated observation. Practical diagnostic and treatment information is appended in each chapter that may equally help experienced clinicians or dedicated students and researchers in broadening essential breaking points of their work. It is the wish of all multidisciplinary experts who gather prominent author's panel of this volume to incorporate latest medical reports and compel limits of current understanding for better tissue regeneration, limb salvage, and improved quality of life of our patients.

Working with Midpoints Kathy Allan,2024-01-01 A simple yet often overlooked astrological technique. The information that midpoints provide is astonishing; they can mirror what is going on in the world, in many cases providing the missing link that explains what is really happening when traditional astrology fails. Veteran astrologer and author Kathy Allan has crafted a new manual that will teach readers to hone their basic chart reading and predictive skills through working with midpoints, long considered a specialized topic in the field of astrology. Initially inspired by the astrology classic *Working with Astrology* by Charles Harvey and Mike Harding, Allan wanted to create a more user-friendly textbook. Exercises are included at the end of each chapter. After explaining what midpoints are and how to find them, Allan uses in-depth case studies that examine the lives and horoscopes of such cultural icons as Carl Jung, Evangeline Adams, and Stephen King, demonstrating midpoints in action. Allan shows us how to delineate transiting and solar arc midpoints as an aid to understanding events. Adding midpoints to ingress, eclipse, and return charts adds detailed information that enables us to more accurately anticipate coming events. Readers will learn all about occupied and unoccupied midpoints, planetary axes, the 360 and 90 degree dials, plus how to contemplate and forecast future trends. At last, here is a systematic and engaging approach to – working with midpoints. The perfect companion volume to Allan’s acclaimed book on the Lunar Nodes.
