The Bourgeois Virtues Deirdre Nansen McCloskey, 2010-03-15 For a century and a half, the artists and intellectuals of Europe have scorned the bourgeoisie. And for a millennium and a half, the philosophers and theologians of Europe have scorned the marketplace. The bourgeois life, capitalism, Mencken's "booboisie" and David Brooks's "bobos"—all have been, and still are, framed as being responsible for everything from financial to moral poverty, world wars, and spiritual desuetude. Countering these centuries of assumptions and unexamined thinking is Deirdre McCloskey's *The Bourgeois Virtues*, a magnum opus that offers a radical view: capitalism is good for us. McCloskey's sweeping, charming, and even humorous survey of ethical thought and economic realities—from Plato to Barbara Ehrenreich—overturns every assumption we have about being bourgeois. Can you be virtuous and bourgeois? Do markets improve ethics? Has capitalism made us better as well as richer? Yes, yes, and yes, argues McCloskey, who takes on centuries of capitalism's critics with her erudition and sheer scope of knowledge. Applying a new tradition of "virtue ethics" to our lives in modern economies, she affirms American capitalism without ignoring its faults and celebrates the bourgeois lives we actually live, without supposing that they must be lives without ethical foundations. High Noon, Kant, Bill Murray, the modern novel, van Gogh, and of course economics and the economy all come into play in a book that can only be described as a monumental project and a life's work. *The Bourgeois Virtues* is nothing less than a dazzling reinterpretation of Western intellectual history, a dead-serious reply to the critics of capitalism—and a surprising page-turner.

Cicero, Philippic 2, 44–50, 78–92, 100–119 Ingo Gildenhard, 2018-09-03

Cicero composed his incendiary Philippics only a few months after Rome was rocked by the brutal assassination of Julius Caesar. In the tumultuous aftermath of Caesar's death, Cicero and Mark Antony found themselves on opposing sides of an increasingly bitter and dangerous battle for control. Philippic 2 was a weapon in that war. Conceived as Cicero's response to a verbal attack from Antony in the Senate, Philippic 2 is a rhetorical firework that ranges from abusive references to Antony's supposedly sordid sex life to a sustained critique of what Cicero saw as Antony's tyrannical ambitions. Vituperatively brilliant and politically committed, it is both a carefully crafted literary artefact and an explosive example of crisis rhetoric. It ultimately led to Cicero's own gruesome death. This course book offers a portion of the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard's volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Cicero, his oratory, the politics of late-republican Rome, and the transhistorical import of Cicero's politics of verbal (and physical) violence.

The Theory Of Celestial Influence Rodney Collin, 2019-01-15 Before Paulo Coelho and Eckhart Tolle came Rodney Collin. A huge 462 page book full of essential knowledge. How To Become Supernatural Man, The Universe and Cosmic Mystery is an exploration of the universe and man's place in it. Rodney Collin examines 20th-century scientific discoveries and traditional esoteric teachings and concludes that the driving force behind everything is neither procreation nor survival, but expansion of awareness. Collin sets out to reconcile the considerable contradictions of the rational and imaginative minds and of the ways we see the external world versus our inner selves. For readers familiar with Gurdjieff's cosmology will here find further examinations of the systems outlined in by Ouspensky in Search of the Miraculous.

olam he-zeh v'olam ha-ba Leonard J. Greenspoon, 2017-09-15 Dining on Leviathan. Discoursing with Socrates. Debating the nature of existence in the afterlife. These are among the topics authors address in this wide-ranging account of how Jews have conceptualized the world to come and structured their lives in this world accordingly. Some authorities portrayed the afterlife as an endless round of feasting and drinking of chazerie that would put the fanciest Las Vegas buffets to shame. There were visionaries who mapped out otherworldly climes populated by monstrous creatures. Others, decidedly more staid, saw the world to come as a location where neither food nor wine would be consumed; instead, it would offer the opportunity to bring moral certitude to questionable practices that could not be eradicated in this world. More down to earth are comparisons between Rabbi Akiva and Socrates, and analyses of influential thinkers like Moses Mendelssohn and Emmanuel Levinas. And more practical are discussions of how concepts of the afterlife serve to determine mourning practices, or more broadly, how humans should fashion their lives in the here and now. The chronological range of these chapters also is impressive. The earliest documents discussed are from

Apocryphal literature, including apocalypses, that were composed from 400 BCE to 200 CE. There are creative analyses of rabbinic material and documents from the medieval period through the twentieth century. Evolving ritual and liturgical practices bring readers up to the early twenty-first century. Each of the thirteen authors whose works are brought together in this volume shows historical, cultural, and religious sensitivity both to the unique features of these differing manifestations and to the elements that unite them. For the readers of this volume, which is equally rewarding for general audiences and for specialists, the result is a carefully nuanced, creatively balanced exploration of the breadth of Jewish thought and practice concerning some of the most profound and perplexing issues humans face.

European Glass in the J. Paul Getty Museum Catherine Hess, Timothy Husband, 1998-02-19 The Getty Museum's collection of postclassical European glass represents a well-defined chapter within the history of the medium. These objects—which range in date from the late Middle Ages to the late seventeenth century—originated in important Italian, German, Bohemian, Netherlandish, Silesian, and Austrian centers of production. The sixty-eight pieces presented in this catalogue include vessels made to resemble rock crystal or chalcedony; glass blown into unusually large or remarkably refined shapes; and glass decorated with ornament that is intricately applied, elegantly enameled, or gilded. Each object is described in detail, including provenance, bibliography, and relevant comparative examples. An introductory essay traces the history of European glass from classical times to the present.

The Mood/Interest Theory of American Foreign Policy Jack E. Holmes, 2014-07-15 In 1952, Frank L. Klingberg's article on introvert and extrovert American foreign policy moods projected an American turn toward introversion in the late 1960s. After this came to pass, Jack Holmes began to develop a theory of how these moods might work in a more specific sense. His mood/interest theory points to a basic conflict between politico-military interests and the foreign policy moods of the American electorate. Holmes presents a pioneering account of the over-whelming impact of public moods on foreign policy. Policy-making structures, executive-legislative relations, presidential personality, pragmatism, moralism, elitism, conservatism, international economics, and humanitarianism are related to the mood/interest pattern. Major points are illustrated with examples from 1776 to the present. Holmes's analysis indicates that American moods are continuing unabated according to past patterns, so that American foreign policy may undergo some surprising changes in the next decade. One of the author's hopes is that emphasis on the importance of national moods will help avoid future extremes. This book is bold in its assertions and points to major problems in the

analysis of American foreign policy. Whether or not the reader agrees with the entire analysis, he or she will be challenged to think about American foreign policy in new and perhaps revealing ways.

From Plato to Platonism Lloyd P. Gerson, 2013-11-27 Was Plato a Platonist? While ancient disciples of Plato would have answered this question in the affirmative, modern scholars have generally denied that Plato's own philosophy was in substantial agreement with that of the Platonists of succeeding centuries. In *From Plato to Platonism*, Lloyd P. Gerson argues that the ancients are correct in their assessment. He arrives at this conclusion in an especially ingenious manner, challenging fundamental assumptions about how Plato's teachings have come to be understood. Through deft readings of the philosophical principles found in Plato's dialogues and in the Platonic tradition beginning with Aristotle, he shows that Platonism, broadly conceived, is the polar opposite of naturalism and that the history of philosophy from Plato until the seventeenth century was the history of various efforts to find the most consistent and complete version of anti-naturalism. Gerson contends that the philosophical position of Plato—Plato's own Platonism, so to speak—was produced out of a matrix he calls Ur-Platonism. According to Gerson, Ur-Platonism is the conjunction of five antis that in total arrive at anti-naturalism: anti-nominalism, anti-mechanism, anti-materialism, anti-relativism, and anti-skepticism. Plato's Platonism is an attempt to construct the most consistent and defensible positive system uniting the five antis. It is also the system that all later Platonists throughout Antiquity attributed to Plato when countering attacks from critics including Peripatetics, Stoics, and Sceptics. In conclusion, Gerson shows that Late Antique philosophers such as Proclus were right in regarding Plotinus as the great exegete of the Platonic revelation.

Beegu Alexis Deacon, 2018-08-09 Beegu is not supposed to be on Earth. She is lost. She is a friendly little creature, but the Earth People don't seem very welcoming at all. However, so far she has only met the BIG ones. The little ones are a different matter . . .

The Two Faces of Tomorrow James P. Hogan, Ben Hogan, 1997 By the mid-21st Century, technology had become much too complicated for humans to handle -- and the computer network that had grown up to keep civilization from tripping over its own shoelaces was also beginning to be overwhelmed. Something Had To Be Done. As a solution, Raymond Dyer's project developed the first genuinely self-aware artificial intelligence -- code name: Spartacus. But could Spartacus be trusted to obey its makers? And if it went rogue, could it be shut down? As an acid test, Spartacus was put in charge of a space station and programmed with a survival instinct. Dyer and his team had the job of seeing how far the computer would go to defend itself when they tried to pull the plug. Dyer didn't expect any serious problems to arise in the experiment. Unfortunately, he had built more initiative into Spartacus than he realized.... And a superintelligent computer with a high dose of initiative makes a dangerous guinea pig.

Intimate Communities Nicole Elizabeth Barnes, 2018-10-23 A free ebook version of this title is available through Luminos, University of California

Press's Open Access publishing program. Visit www.luminosoa.org to learn more. When China's War of Resistance against Japan began in July 1937, it sparked an immediate health crisis throughout China. In the end, China not only survived the war but emerged from the trauma with a more cohesive population. Intimate Communities argues that women who worked as military and civilian nurses, doctors, and midwives during this turbulent period built the national community, one relationship at a time. In a country with a majority illiterate, agricultural population that could not relate to urban elites' conceptualization of nationalism, these women used their work of healing to create emotional bonds with soldiers and civilians from across the country. These bonds transcended the divides of social class, region, gender, and language.
