2040: A Handbook for the Regeneration Damon Gameau, 2019-04-23 'The future can't be predicted but it can be envisioned and brought lovingly into being.' Donella Meadows Like most of us, Damon Gameau has spent most of his adult years overwhelmed into inaction by the problem of climate change and its devastating effects on the planet. But when Damon became a father, he knew he couldn't continue to look away. So he decided to do what he does best, and tell a story. And the story became an imagining of what the world could look like in 2040, if we all decided to start doing things differently, right now. The result is the era-defining documentary 2040 - a meticulously researched plea for the adoption of community-building, energy-generating, connection-forging, forest-renewing, ocean-replenishing measures that science tells us will reset our planet's health, drive our economies and improve lives across the globe. 2040: A Handbook for the Regeneration shows us how we can stitch this magnificent vision into everyday life by engaging in activities such as cooking, shopping, gardening, sharing, working and teaching our kids. It shows us that climate change is a practical problem that can be tackled by each of us, one small step at a time, and that we can make a genuine difference - if we know what to do. Brimming with practical wisdom and even 50 delicious recipes, 2040: A Handbook for the Regeneration empowers you to become the change you want to see in the world. This is a specially formatted fixed-layout ebook that retains the look and feel of the print book. PRAISE

Unaccompanied Javier Zamora, 2018-05-01 New York Times Bestselling Author of *Solito* Every line resonates with a wind that crosses oceans.—Jamaal May Zamora's work is real life turned into myth and myth made real life.

—Glappitnova Javier Zamora was nine years old when he traveled unaccompanied 4,000 miles, across multiple borders, from El Salvador to the United States to be reunited with his parents. This dramatic and hope-filled poetry debut humanizes the highly charged and polarizing rhetoric of border-crossing; assesses borderland politics, race, and immigration on a profoundly personal level; and simultaneously remembers and imagines a birth country that's been left behind. Through an unflinching gaze, plainspoken diction, and a combination of Spanish and English, *Unaccompanied* crosses rugged terrain where families are lost and reunited, coyotes lead migrants astray, and the thin white man let us drink from a hose / while pointing his shotgun. From *Let Me Try Again*: He knew we weren't Mexican. He must've remembered his family coming over the border, or the border coming over them, because he drove us to the border and told us next time, rest at least five days, don't

trust anyone calling themselves coyotes, bring more tortillas, sardines, Alhambra. He knew we would try again. And again—like everyone does. Javier Zamora was born in El Salvador and immigrated to the United States at the age of nine. He earned a BA at UC-Berkeley, an MFA at New York University, and is a 2016–2018 Wallace Stegner Fellow at Stanford University.

How People Learn Olimpia Mesa, 2019-08-07 Whether you're a parent, grandparent, teacher, therapist or other significant caregiver, I've written this book for you and the children you care for. My goal is to help children understand how people learn, enabling you all to view learning and studying in a whole new way. Many of the concerns related to a child's academic

results, cognitive skills and wellbeing in school will fade away once complex brain processes are better understood and managed. After reading this book together, both children and adults will have the confidence and information required to discuss topics like What happens when you learn?, Why does your brain ignore boring things?, How can we organise learning for better thinking?, and How can we stop the process of forgetting? I hope you enjoy the book! - Olimpia Mesa Through neuroscience stories, Olimpia Mesa, an expert learning designer and mother, unravels how a human brain learns and what to do about it to help your children become smarter, better and happier learners. The book draws on ideas from brain science without being academic about it. It is written in a way that will engage and interest children between the ages of 6 and 12, inviting them on a journey that they will find constantly fascinating. Olimpia Mesa is a leading expert and consultant on brain-based learning design. She is the president of Instructional Design Ltd., a company behind hundreds of successful corporate and educational programs. In addition to consulting with Fortune 500 organisations on learning projects, Olimpia is the founder of Book to Courses(tm) Online School whose main goal is to teach authors how to transform a nonfictional book into online academies or apps. Well done on an excellent guide to help children use their brains more effectively and also giving parents and teachers a way of working and supporting children's learning. I loved the lay-out and the visuals. I thought the series of exercises and challenges

were very age appropriate and accessible. The way it ends with the brain-challenges is great and gives children and real programme to follow and challenging questions at every stage. Well done on a very clever and thought provoking piece of work! -Dr. Martin Fitzgerald, Lecturer in Education and Human Development, LIT, Ireland This book is an important reminder of the basics of human behavior and learning while educating children for a better world. It succeeds in capturing many important aspects of developing brains in processing information and everyday experiences from the very early years of childhood. The parents are supposed to act as mentors all along. In fact without the support of adults the great potential laid out in the book is not completely met. I highly recommend this book for all families who aspire to inspire children to learn to learn and to maintain and develop their inborn skills to be curious and creative. -Jukka Kangaslahti, PhD in educational Sciences, Senior Advisor at European Parliament, Finland Children will discover activities that challenge them to go outside the book and actually build the concepts they are reading about. Learning challenges will allow them to take the lessons from the book back into their homes and classrooms and notice how their life changes as they experience learning differently. Thus the book itself comes alive and becomes a gateway - bridging new insights with practical application, all in a fun, engaging way. -Alis Anagnostakis, Executive Coach (PCC), Australia We all learn every day, but how learning happens is often a mystery. The book takes us on an adventure to

uncover the secrets of learning. In a manner that is accessible to both children and adults alike, it invites us to explore the magnificent human brain and how to ensure it works effectively...What I like most of all is the accessibility to complex information - a simplicity that is very powerful.- Davin Willows, Director of Admissions and Advancement, ISB, Belgium

You Can't F*ck Up Your Kids Lindsay Powers, 2020-03-31 Cribsheet meets The Sh!t No One Tells You in this no-holds-barred, judgment-free parenting guide that sets the record straight on every hot-button parenting topic by longtime journalist and founder of the viral #NoShameParenting movement. What if you could do more for your kids, by doing a whole lot less? Parenting today has become a competitive sport, and it seems that everyone is losing. From the very moment that little line turns blue, parents-to-be find themselves in a brave new world where every decision they make is fraught, every action they take is judged, and everything they do seems to be the wrong thing. Formula feed? Breast is best. Breastfeed in public? That's indecent. Cry it out? You're causing permanent harm to your child. Don't sleep train? Your child will never learn to sleep on his or her own. Stay home? You're setting a bad example for your kids. Go back to work? Don't you love your kids more than your job? Lindsay Powers—former editor-in-chief of Yahoo! Parenting, creator of the #NoShameParenting movement, and mom of two—is here to help parents everywhere breathe a collective sigh of relief. This laugh-out-loud funny, accessible, and reassuring book sets the record straight on all of the insane

conflicts that parents face—from having a glass of wine while pregnant to sleep training, childcare, feeding, and even sex after baby. Drawing on the latest research and delivered in a relatable, comforting voice, *You Can't F*ck Up Your Kids* demonstrates that it is possible to take the stress out of parenting and sit back and enjoy the ride.

Futurevision Richard Watson, Oliver Freeman, 2013-07-01 The future is not what it used to be. In this volatile era, with the world changing at a rapid rate, people are more anxious than ever about what lies ahead. Will relentless consumerism end up destroying our planet? Or can science and technology allow us to innovate our way out of trouble? Perhaps a greater social consciousness and community-based living will take over - or, conversely, the competition for limited resources may result in everyone fighting for themselves. Drawing on these four possible futures, Richard Watson and Oliver Freeman invite us to examine critically the risks and opportunities to come. They discuss the key factors, trends, critical uncertainties, and wildcards that will shape the future, guiding us to a greater awareness of long-term problems and possible solutions - and empowering us not only to adapt to what might happen but also to shape our future and generate change. It's impossible to know for certain what the future holds, but we can remove some of its surprises by engaging in a meaningful debate about the choices we face now. This book shows us how. -- Publisher description.

Energy, Economic Growth, and Geopolitical Futures Evan Hillebrand, Stacy

Closson, 2015-03-27 Top-drawer scenario builders map a unique array of 'big picture' global outcomes shaped by energy prices, economic growth, and global harmony. Better still, they give the reader tools to build her own scenarios. An essential reference for experts concerned with geopolitical and geoeconomic futures. -- Gary Clyde Hufbauer, Reginald Jones Senior Fellow, Peterson Institute for International Economics The way the authors have integrated the International Futures model into scenario analysis is very instructive and amounts to a useful methodological contribution to the literature on scenario analysis. As an energy economist, I also appreciate that the book adds to the usual energy market forecasting exercises that take economic growth as exogenous to the energy markets and ignore political factors. -- Peter Hartley, Mitchell Professor of Economics and Rice Scholar in Energy Studies at the Baker Institute, Rice University Evan Hillebrand and Stacy Closson have written an interesting and original book in which they analyze several different scenarios for economic growth, energy prices, and international conflict over the next forty years in an engaging and accessible style. I recommend this book to anyone who wishes to understand the range of possible futures. -- James Morrow, Professor of Political Science, University of Michigan

New York Magazine, 1977-06-06 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-

Space Case Stuart Gibbs,2014-09-16 It's a murder mystery on the moon in this humorous and suspenseful space adventure from the author of Belly Up and Spy School that The New York Times Book Review called "a delightful and brilliantly constructed middle grade thriller." Like his fellow lunarnauts—otherwise known as Moonies—living on Moon Base Alpha, twelve-year-old Dashiell Gibson is famous the world over for being one of the first humans to live on the moon. And he's bored out of his mind. Kids aren't allowed on the lunar surface, meaning they're trapped inside the tiny moon base with next to nothing to occupy their time—and the only other kid Dash's age spends all his time hooked into virtual reality games. Then Moon Base Alpha's top scientist turns up dead. Dash senses there's foul play afoot, but no one believes him. Everyone agrees Dr. Holtz went onto the lunar surface without his helmet properly affixed, simple as that. But Dr. Holtz was on the verge of an important new discovery, Dash finds out, and it's a secret that could change everything for the Moonies—a secret someone just might kill to keep...

New York 2140 Kim Stanley Robinson, 2017-03-14 New York Times bestselling author Kim Stanley Robinson returns with a bold and brilliant vision of New York City in the next century. As the sea levels rose, every street became a

canal. Every skyscraper an island. For the residents of one apartment building in Madison Square, however, New York in the year 2140 is far from a drowned city. There is the market trader, who finds opportunities where others find trouble. There is the detective, whose work will never disappear -- along with the lawyers, of course. There is the internet star, beloved by millions for her airship adventures, and the building's manager, quietly respected for his attention to detail. Then there are two boys who don't live there, but have no other home -- and who are more important to its future than anyone might imagine. Lastly there are the coders, temporary residents on the roof, whose disappearance triggers a sequence of events that threatens the existence of all -- and even the long-hidden foundations on which the city rests.

Tell Your Children Alex Berenson, 2020-02-18 In “a brilliant antidote to all the...false narratives about pot” (American Thinker), an award-winning author and former New York Times reporter reveals the link between teenage marijuana use and mental illness, and a hidden epidemic of violence caused by the drug—facts the media have ignored as the United States rushes to legalize cannabis. Recreational marijuana is now legal in nine states. Advocates argue cannabis can help everyone from veterans to cancer sufferers. But legalization has been built on myths—that marijuana arrests fill prisons; that most doctors want to use cannabis as medicine; that it can somehow stem the opiate epidemic; that it is beneficial for mental health. In this

meticulously reported book, Alex Berenson, a former New York Times reporter, explodes those myths, explaining that almost no one is in prison for marijuana; a tiny fraction of doctors write most authorizations for medical marijuana, mostly for people who have already used; and marijuana use is linked to opiate and cocaine use. Most of all, THC—the chemical in marijuana responsible for the drug’s high—can cause psychotic episodes. “Alex Berenson has a reporter’s tenacity, a novelist’s imagination, and an outsider’s knack for asking intemperate questions” (Malcolm Gladwell, *The New Yorker*), as he ranges from the London institute that is home to the scientists who helped prove the cannabis-psychosis link to the Colorado prison where a man now serves a thirty-year sentence after eating a THC-laced candy bar and killing his wife. He sticks to the facts, and they are devastating. With the US already gripped by one drug epidemic, *Tell Your Children* is a “well-written treatise” (*Publishers Weekly*) that “takes a sledgehammer to the promised benefits of marijuana legalization, and cannabis enthusiasts are not going to like it one bit” (*Mother Jones*).

Rosetown Cynthia Rylant, 2018-05-08 “Eloquent and resonant...poignantly underscores the significance of family, friendship, and home.” —*Publishers Weekly* (starred review) “Gentle and old-fashioned in the best sense...a little gem about small-town life.” —*Booklist* (starred review) “A sweet story for children dealing with change.” —*Kirkus Reviews* From Newbery Medalist Cynthia Rylant comes the charming story of nine-year-old Flora Smallwood and the

eventful year she spends in the quiet community of Rosetown, Indiana. For nine-year-old Flora Smallwood, Rosetown, Indiana, is full of surprises, many of the best of which happen at the Wing and a Chair Used Book Shop, where she loves to read vintage children's books after school in the faded purple chair by the window. But lately, those surprises haven't been so good. Her dear old dog, Laurence, recently passed away. Not long after, her parents decided to take a breather from their marriage, and now Flora has to move back and forth between their two houses. Plus, she's just begun fourth grade, and it is so much different than third. Luckily Flora has two wonderful friends—one old and one new. And with them around to share thoughts and laughs and adventures big and small, life in Rosetown still has many sweet moments—and even some very happy surprises!

The Science of Interstellar Kip Thorne, 2014-11-07 A journey through the otherworldly science behind Christopher Nolan's award-winning film, Interstellar, from executive producer and Nobel Prize-winning physicist Kip Thorne. Interstellar, from acclaimed filmmaker Christopher Nolan, takes us on a fantastic voyage far beyond our solar system. Yet in The Science of Interstellar, Kip Thorne, the Nobel prize-winning physicist who assisted Nolan on the scientific aspects of Interstellar, shows us that the movie's jaw-dropping events and stunning, never-before-attempted visuals are grounded in real science. Thorne shares his experiences working as the science adviser on the film and then moves on to the science itself. In chapters on wormholes, black holes, interstellar travel, and much more, Thorne's scientific insights—many of them triggered during the actual scripting and shooting of Interstellar—describe the physical laws that govern our universe and the truly astounding phenomena that those laws make possible.
