Living Together - Roland Barthes, the Individual and the Community Knut Stene-Johansen,Christian Refsum,Johan Schimanski,2018-09-30 Is it possible to create a community where everyone lives according to their own rhythm, and yet respects the individual rhythms of others? This volume contains new essays which investigate and actualize the concepts that Roland Barthes discussed in his famous 1977 lecture series on How to Live Together at the Collège de France. The anthology presents original and thought-provoking approaches to questions of conviviality and idiorrhythmic life forms in literature, arts and other media. The essays are written by 32 highly competent scholars from seven countries, representing literary studies, philosophy, social sciences, theology, church history, psychoanalysis, art history, architecture, media studies, history of ideas, and biology.

Statistics for Biologists D. J. Finny,2012-12-06 This book has grown from nine hours of lectures, and about the same time in tutorial classes, that attempt to give first-year students of biology some understanding of statistics. I am convinced that such a short course should not be mathematical (though it can employ basic mathematical symbolism), and that it should give students an appreciation of statistical argument, even though this limits the amount of detailed instruction in techniques of analysis that can be included. A statistical cookery book would have been easier to write and much easier to read, but lacking in true educational content. I am more concerned to show 'why' than to present methods and rules. A further constraint, that of remaining within a reasonable price range, prevents reiteration of explanations: the reader is expected to remember what he has read, for he will not find standard terms and ideas explained afresh on each occasion of use. Many books that introduce statistics to biologists blur distinctions and evade logical issues, for example by failing to emphasize the distinction between a parameter and an estimator from a sample or by neglecting the role of randomization. On this, I aim to be uncompromisingly correct - at least until reviewers point out my errors - but to do so through realistic examples rather than abstract symbolism.

I Should Have Written A Book Tom Grannetino,2019-04-24 William Grannetino served in the US navy during World War II. From the day he landed on Omaha Beach to the morning he sailed out of the Pacific theatre for the last time, he was surrounded by violence, trauma, death, and a comradery unparalleled in civilian life. Through the pen of Grannetino’s son, readers are provided a glimpse of a sailor’s gut-wrenching realities of war as he relates details about little-known landings that happened ahead of the initial D-Day assault and unique facts somehow lost in history. Compelling descriptions of street to street fighting in the city of Caen, the urgency of rushing military support to the Battle of the Bulge, and the terror of Kamikaze attacks in the Pacific, transport readers right to the battle zone. From the jubilation over the end of hostilities to the devastation of Hiroshima and Nagasaki, Tom Grannetino has captured his father’s stories and crafted an historical and deeply personal account of one man’s experiences in the Second World War.

The Ethics of Writing Peter Pericles Trifonas,2000 In this compelling and timely treatise, cultural theorist and educator Peter Trifonas puts forth the first book-length study of Jacques Derrida's 'educational texts: ' that is, those writings most explicitly concerned with the ethics and politics of the historico-philosophical structures constituting the scene of teaching. The text examines how deconstruction allows us to re-think the socio-historical and ethico-philosophical aspects of pedagogical practices and policies, including pedagogical theories that have had direct bearing on the ethical and cultural ideals forming the reason of Western educational systems and the exclusion of its 'Others.
