Memory Speaks Julie Sedivy, 2021-10-12 From an award-winning writer and linguist, a scientific and personal meditation on the phenomenon of language loss and the possibility of renewal. As a child Julie Sedivy left Czechoslovakia for Canada, and English soon took over her life. By early adulthood she spoke Czech rarely and badly, and when her father died unexpectedly, she lost not only a beloved parent but also her firmest point of connection to her native language. As Sedivy realized, more is at stake here than the loss of language: there is also the loss of identity. Language is an important part of adaptation to a new culture, and immigrants everywhere face pressure to assimilate. Recognizing this tension, Sedivy set out to understand the science of language loss and the potential for renewal. In *Memory Speaks*, she takes on the psychological and social world of multilingualism, exploring the human brain's capacity to learn—and forget—languages at various stages of life. But while studies of multilingual experience provide resources for the teaching and preservation of languages, Sedivy finds that the challenges facing multilingual people are largely political. Countering the widespread view that linguistic pluralism splinters loyalties and communities, Sedivy argues that the struggle to remain connected to an ancestral language and culture is a site of common ground, as people from all backgrounds can recognize the crucial role of language in forming a sense of self. Distinctive and timely, *Memory Speaks* combines a rich body of psychological research with a moving story at once personal and universally resonant. As citizens debate the merits of bilingual education, as the world's less dominant languages are driven to extinction, and as many people confront the pain of language loss, this is badly needed wisdom.

Global Trends A. Done, 2011-10-31 Looks at the bigger picture, and the future trends that are going to affect the global business world over the next few years. Edgelands Michael Symmons Roberts, Paul Farley, 2011-02-17 The wilderness is much closer than you think. Passed through, negotiated, unnamed, unacknowledged: the edgelands - those familiar yet ignored spaces which are neither city nor countryside - have become the great wild places on our doorsteps. In the same way the Romantic writers taught us to look at hills, lakes and rivers, poets Paul Farley and Michael Symmons Roberts write about mobile masts and gravel pits, business parks and landfill sites, taking the reader on a journey to marvel at these richly mysterious, forgotten regions in our midst. *Edgelands* forms a critique of what we value as 'wild', and allows our allotments, railways, motorways, wasteland and water a presence in the world, and a strange beauty all of their own.

World Yearbook of Education 2017 Julie Allan,Alfredo J. Artiles,2016-12-01

This latest volume in the World Yearbook of Education series examines the relationship between assessment systems and efforts to advance equity in education at a time of growing inequalities. It focuses on the political motives behind the expansion of an assessment industry, the associated expansion of an SEN industry and a growth in consequential accountability systems. Split into three key sections, the first part is concerned with the assessment industry, and considers the purpose and function of assessment in policy and politics and the political context in which particular assessment practices have emerged. Part II of the book, on assessing deviance, explores those assessment and identification practices that seek to classify different categories of learners, including children with Limited English Proficiency, with special needs and disabilities and with behavioural problems. The final part of the book considers the consequences of assessment and the possibility of fairer and more equitable alternatives, examining the production of inequalities within assessment in relation to race, class, gender and disability. Discussing in detail the complex historical intersections of assessment and educational equity with particular attention to the implications for marginalised populations of students and their families, this volume seeks to provide reframings and reconceptualisations of assessment and identification by offering new insights into economic and cultural trends influencing them. Co-edited by two internationally renowned scholars, Julie Allan and Alfredo J. Artiles, World Yearbook of Education 2017 will be a valuable resource for researchers, graduates and policy makers who are interested in the economic trends of global education assessment.
