9-1-1 WHAT IS YOUR EMERGENCY? Lucia - Retired Dispatcher #160,2013-11 This book contains actual 911 and non-emergency calls that came into the San Diego Police Department Communications Division during my 19 years working as a Police 911 Dispatcher. This book represents the calls received as accurately as possible. I did not embellish them to make the calls funnier or more exciting. These are actual calls, often unbelievable, but they are real calls. This book is a way for me to portray the real world life of a 911 dispatcher. Some people may not understand why or how we can make light of some of the calls in this book. You may fall into that category making this book not your cup of tea. If however, you can approach this book with an open mind, and a light heart, you may gain a different perspective about 911 dispatchers then you had before. Of course, the bulk of calls coming in were true emergencies that would not be appropriate for this book. I chose mostly, the light hearted calls that would make you come away from the book with a smile, instead of a heavy heart. The Dark Side Chapter is the only chapter in this book with samples of the more serious, violent type of calls we get on a daily basis. Many of you may be amazed by the sub culture out there, and how they live on a day to day basis. Many of these calls may shock you, and have you scratching your head thinking....OMG really?!! I took my job very seriously, and would never willingly jeopardize the confidentiality, or privacy of anybody who asked for my help. Therefore, I did not use real personal names or addresses from any callers in this book without their consent. Any names or a personal address used in this book that may sound familiar is pure coincidence. I hope you enjoy this book.

Next Generation 911 (Ng911) Standards Identification and Review National 911 National 911 Program,2016-06-30 One of the most critical aspects of transforming the nation's public safety answering points (PSAPs) from today's legacy 911 technology to Next Generation 911 (NG911) is adherence to a common set of standards. Development and adoption of international standards is key to achieving 911 interoperability across multiple local, regional, state, and national public safety jurisdictions, and beyond into the global emergency communications environment. Based on conceptual definitions dating from 2000, development began on NG911 standards in 2003 when the National Emergency Number Association (NENA) initiated technical requirements and definition work on core Internet Protocol (IP) functionality and architecture. Beyond the walls of the 911 PSAPs, the consistent observance of standards is essential in accomplishing seamless transmission of data from the caller to 911, and on to emergency responders. As PSAPs expand the forms of data they receive and transmit to each other, and as emergency responders migrate to a broadband network (e.g., FirstNet), it is essential that standards are established and consistently adopted. A variety of standards already exist, and many are actively under development. However, there is limited coordination across the broad NG911 community regarding what completed standards are available, what standards overlap, and what standards still need to be established. The National 911 Program, led by the United States (U.S.) Department of Transportation (USDOT), National Highway Traffic Safety Administration (NHTSA), has compiled this list of standards activities related to NG911. The standards development organizations (SDOs) mentioned herein were given the opportunity to vet the contents of this document, to assess the status of specific standards. This is a living document, and the National 911 Program will publish, monitor, support, and promote the activities of SDOs in establishing a comprehensive set of standards for NG911.

Dial 911 ... and Die Richard W. Stevens,1999 Do the police owe a duty to protect citizens from criminal attack? This book explains why, in most of the United States, the answer is no. In most cases the law does not even require the police to respond to emergency 911 calls. This compact paperback devotes one short chapter to each of the 50 states, Puerto Rico, the Virgin Islands, the District of Columbia and Canada, to show how statutes and court decisions consistently hold that the police generally have no duty to protect individual citizens. Most chapters reveal the true stories, taken from published court opinions, that describe the plight of citizens who

relied solely upon their telephone and police response for emergency help against a violent criminal. Not only did those crime victims not get help, the local government and police escaped legal responsibility for failing to help those victims. Highlighting the importance of personal and family defense, the book also retells 45 stories about people who successfully defended themselves long before any police could help. Footnotes provide full citations to primary and secondary legal sources for all laws and case decisions. 271 pages; footnotes.
