Money Margaret Hall, 2008 Do you ever wonder what makes money valuable? Have you visited another country and noticed how different the money looks? This book looks at the history of money, how it has changed throughout history, and the many different kinds of currency. Open the pages of this book to learn: what people used to pay for things before using money, why some U.S. coins have ridges around the edges, and what makes each and every dollar bill special.

Black American Money 3 Boyce Watkins, 2019-04-23 Black Wealth is expected to drop to zero for half of all black families by the year 2053. This means that half of our community will be in the negative, and the other half will be positive. Those who embrace economic education will be the ones who are on the positive side of this statistic, largely because they've avoided the economic traps that exist in our society. The traps consist of but are not limited to: Ridiculous amounts of student loan debt, marketing that continuously reinforces the message of extensive consumption, a culture built on job seeking rather than job creation, a lack of interest in stock/bond investing, renting rather than ownership, inadequate life insurance with virtually no estate planning, and much, much more. While I work hard to sound the warning bell for the entire black community, our voices are often drowned out by messages coming from corporate media, problematic politicians, and a broken educational system which is determined to keep our people in the midst of economic slavery. I have taught Finance to college students for 25 years at several major universities. I've spent thousands of hours studying the problems that are specific to black people and believe that I have developed solutions that you can implement right now, **TODAY**, within your own family. These are not get-rich-quick or fly-by-night solutions. Instead, they are long-term wealth-building prototypes that will yield results over several decades of continuous activity. Those who embrace financial literacy in their households will not be on the negative side of the statistic that I mentioned above. Those who save and invest won't have the same financial problems as many others. Those who make long-term plans for their children rarely watch their kids struggle. The future is owned by those who prepare for it today.

The Money Tracking Machine Meyer Joel Bendavid, 2011-01 The key elements to manage the money in stock, mutual funds, 401k plans and IRA 's are evaluating, buying, selling, tracking, and protecting money. The Money Tracking Machine teaches when to buy and when to sell stock or mutual funds.

Understanding Money Hayden Burrus, 2017-01-16 This book, Understanding Money, is the first in my five part series on personal finance. The goal of this book is to begin to get you thinking about your attitudes and beliefs regarding the basics of personal finance: Money, earning, spending, saving, and investing. In thinking about these topics, you will begin to understand how your beliefs shape your financial behaviors for better or worse. This book is the foundation for all the information and discussion contained in the remaining four books on personal finance topics that you are almost sure to face in your life. Continue your journey through all five books and you'll be certain to Never Make an Uninformed Financial Decision Again. My name is Hayden Burrus. I am a Registered Investment Adviser and founder of Forward Financial Planners, LLC. Each week for several years I have educated and informed readers of TypeZFinance.com on personal finance topics with the goal of enabling readers to manage their finances intelligently without the assistance of a financial adviser. That's right, I am a financial adviser (actually I call myself a Financial Coach) encouraging people to fire their financial adviser! For decades I have been researching financial products and services offered to individuals. During that time I concluded that virtually all of the offers from financial advisers are grossly overpriced compared to do-it-yourself options available to those investors willing to make a modest time investment understanding personal finance. I've met advisers who have stated I've never met anyone that doesn't need more life insurance. I've met advisers who recommend widely discredited investments that underperform and have expenses 10x as large as the do-it-yourself options. I've met advisers who hide from their clients the fact that they are being paid to recommend financial products. I'VE HAD ENOUGH and I want to help free investors from predatory financial advisers. The second book is titled Starting to Make Money. The goal of this book is to get you thinking about everyday money issues that everyone faces. I talk about car loans, everyday spending and saving decisions and money issues affecting your social life. This book takes the personal finance foundation developed in book one and applies it to the real world. After reading this book you'll be comfortable effectively managing your personal budget. You'll be generating positive cash flow in your life and will be starting down a path that will lead to traditional investing and wealth building. The third book is titled An Adult Relationship with Money. This book is where most personal finance books start. To me, starting with this book is kind of like starting to build a house on the third floor. There's no way you can be successful in managing your taxes, investments, loans, and financial advisers until you have the foundation contained in the first two books. This is the book most similar to traditional personal finance books. The fourth book is titled Now You Have Money. This book discusses financial issues and decisions you'll face if you follow the guidance in the first three books. It discusses retirement investing, annuities, and other issues related to managing a six or seven figure net worth. If you're not in that wealth category yet, you will be soon enough. Just follow the guidance from the first three books. It's great to be ahead of the game and have the piece of mind knowing how to handle your future wealth before you actually have it. The fifth and final book is titled Extra Credit - Money for Fun. This book is the final step of the personal finance journey. Among other things it discusses personal finance issues around being set for life and keeping yourself educated about personal finance. If you're not set for life yet, don't fret. Just follow the guidance in the first four books and be patient. NEVER MAKE AN UNINFORMED FINANCIAL DECISION AGAIN!
