 January 2016 issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects
 of international and domestic finance. IFS, Balance-of-Payments Statistics, Direction of Trade Statistics, and
 Government Finance Statistics are available on CD-ROM by annual subscription. The IMF normally determines the
 currencies that are used in transactions and operations with members. Each quarter, the IMF prepares a financial
 transactions plan, in which it indicates the amounts of currencies and SDRs to be used during the relevant period.
 The monthly printed issue of IFS reports current monthly, quarterly, and annual data, while the yearbook reports
 12 observations of annual data. In IFS, exchange rates are expressed in time series of national currency units per
 SDR and national currency units per US dollar, or vice versa.

 April 2016 issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of
 international and domestic finance. The IMF publishes calculated effective exchange rates data only for countries
 that have given their approval. The IMF cannot allocate SDRs to itself but receives them from members through

various financial transactions and operations. Entities authorized to conduct transactions in SDRs are the IMF itself, participants in the SDR Department, and other “prescribed holders.” The IMF quota increase under the Fourteenth General Review of Quotas became effective recently. The details regarding the associated change can be found in the IMF Press Release No. 16/25, dated January 27, 2016. The effect of quota payments is reflected in the following Fund Accounts for those members that have made their quota payments: Quota, Reserve Tranche Position, Fund Holdings of Currency, SDR Holdings. It is also reflected in the international liquidity and central bank data.
