The Book of Eels Patrik Svensson,2020-05-26 A Finalist for the Los Angeles Times Book Prize

National Bestseller Winner of the National Outdoor Book Award Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction A New York Times Notable Book One of TIME's 100 Must Read Books of the Year One of The Washington Post's 50 Notable Nonfiction Books of the Year One of Smithsonian Magazine's 10 Best Science Books of the Year One of Publishers Weekly's Best Nonfiction Books of the Year A New York Times Editor's Choice Part H Is for Hawk, part The Soul of an Octopus, The Book of Eels is both a meditation on the world's most elusive fish—the eel—and a reflection on the human condition Remarkably little is known about the European eel, *Anguilla anguilla*. So little, in fact, that scientists and philosophers have, for centuries, been obsessed with what has become known as the “eel question”: Where do eels come from? What are they? Are they fish or some other kind of creature altogether? Even today, in an age of advanced science, no one has ever seen eels mating or giving birth, and we still don't understand what drives them, after living for decades in freshwater, to swim great distances back to the ocean at the end of their lives. They remain a mystery. Drawing on a breadth of research about eels in literature, history, and modern

marine biology, as well as his own experience fishing for eels with his father, Patrik Svensson crafts a mesmerizing portrait of an unusual, utterly misunderstood, and completely captivating animal. In *The Book of Eels*, we meet renowned historical thinkers, from Aristotle to Sigmund Freud to Rachel Carson, for whom the eel was a singular obsession. And we meet the scientists who spearheaded the search for the eel's point of origin, including Danish marine biologist Johannes Schmidt, who led research efforts in the early twentieth century, catching thousands upon thousands of eels, in the hopes of proving their birthing grounds in the Sargasso Sea. Blending memoir and nature writing at its best, Svensson's journey to understand the eel becomes an exploration of the human condition that delves into overarching issues about our roots and destiny, both as humans and as animals, and, ultimately, how to handle the biggest question of all: death. The result is a gripping and slippery narrative that will surprise and enchant.

Wide Sargasso Sea Jean Rhys, 1992 A considerable tour de force by any standard. ?New York Times Book Review

Night Oceans William Hope Hodgson, 2011-10-03 As well as four classic fantasy novels and a series of occult detective” stories, William Hope Hodgson (1877-1918) produced a large number of sea-faring tales, many of them steeped in elements of supernatural terror. Hodgson's vividly drawn

descriptions of revulsive oceanic entities often pre-echo Lovecraft in their evocation of squamous, deep-sea terror, while the latter also acknowledged Hodgson's masterful evocations of elemental disquiet and disorder. NIGHT OCEANS collects all of Hodgson's acclaimed "Sargasso Sea" tales - From The Tideless Sea, The Mystery Of The Derelict, The Thing In The Weeds, The Finding Of The Graiken, and The Voice In The Dawn (famously filmed in 1963 by Japanese director Ishirô Honda, under the title *Matango*) - reproduced in chronological order according to year of publication; also included is a complementary bonus text, *The Weed Men*, taken from Hodgson's sea-faring novel *The Boats Of Glen Carrig*.

The Thing in the Weeds and Other Tales of the Tideless Sea William Hope Hodgson,2015-10-06 The novels and short stories of William Hope Hodgson (1877-1918), though almost entirely unknown during his lifetime, have become some of the most influential early works in fields of literature as

diverse as fantasy, science fiction, and horror. Hodgson's earliest short fiction was inspired and deeply informed by his experiences at sea while a young man; his ambivalent attitude toward the ocean-mingled reverence, awe, fear, and hatred of it-is perhaps nowhere so starkly presented as in his Sargasso Sea stories, a series of fictions set in the shared world of the mythical Sargasso, a place of ancient derelicts, monstrous creatures, and hapless human castaways. Mesembria Press is proud to present this new collection of William Hope Hodgson's Sargasso Sea stories, which includes a complete set of notes designed to guide the interested reader through the obscure nautical terminology and stylistic nuances of Hodgson's writing. Includes: - From the Tideless Sea, Part I - From the Tideless Sea, Part II - The Mystery of the Derelict - The Thing in the Weeds - The Finding of the Graiken - The Call in the Dawn plus - Explanatory and critical notes

The Mystery of the Bermuda Triangle Chris Oxlade, 2006 The mystery of the Bermuda Triangle has puzzled people for many years. Can ships and planes really disappear without a trace? will it continue to mystify us forever? Discover all of the theories, from the reasonable to the ridiculous, then decide for yourself what to believe. Learn how scientists analyze and explain fakes and hoaxes. This book includes eyewitness accounts, dramatic photographs, up-to-date information, a glossary, further resources, and web search tips.

Eels James Prosek, 2011-10-11 They spawn in the middle of the ocean but spend their adult lives in freshwater. They can overcome seemingly insurmountable obstacles and even cross over land. They are revered as guardians and monster-seducers by New Zealand's Maori, yet are often viewed with disgust in the West. They are a multibillion-dollar business in the Asian food market. They are often mistaken for snakes. They are eels—one of the world's most amazing and least understood fish. (Yes, fish.) James Prosek offers a fascinating tour through the life history and cultural associations of the freshwater eel, exploring its biology, its myth and lore, its mystery and beauty. *Eels* is a mesmerizing biography of an intriguing and mysterious creature, as well as a telling look at humanity, the will to persist, and the ever-changing relationship between man and the natural world.

The Sargasso Sea John Teal,Mildred Teal,1975

Unsolved Mysteries of the Sea Lionel Fanthorpe,Patricia Fanthorpe,2004-03 Explores the intriguing mysteries of the sea: How were the seas formed? What gave rise to stories of mermaids, sirens, and sea monsters?

The isle of dead ships Crittenden Marriott,2022-11-09 There is a floating island in the sea where no explorer has set foot, or, setting foot, has returned to tell of what he saw. Lying at our very doors, in the direct path of every steamer from the Gulf of Mexico to Europe, it is less known than is the frozen pole. Encyclopedias pass over it lightly; atlases dismiss it with but a slight mention; maps do not attempt to portray its ever-shifting outlines; even the Sunday newspapers, so keen to grasp everything of interest, ignore it. But on the decks of great ships in the long watches of the night, when the trade-wind snores through the rigging and the waves purr about the bows, the sailor tells strange tales of the spot where ruined ships, raked derelict from all the square miles of ocean, form a great island, ever changing, ever wasting, yet ever lasting; where, in the ballroom of the Atlantic, draped round with

encircling weed, they drone away their lives, balancing slowly in a mighty tourbillion to the rhythm of the Gulf Stream. Fanciful? Sailors tales? Stories fit only for the marines? Perhaps! Yet be not too sure! Jack Tar, slow of speech, fearful of ridicule, knows more of the sea than he will tell to the newspapers. Perhaps more than one has drifted to the isle of dead ships, and escaped only to be disbelieved in the maelstroms that await him in all the seaports of the world. Facts are facts, none the less because passed on only by word of mouth, and this tale, based on matter gleaned beneath the tropic stars, may be truer than men are wont to think. Remember Longfellow's words: Wouldst thou, thus the steersman answered, Learn the secret of the sea? Only those that brave its dangers Comprehend its mystery.

They Swim the Seas Seymour Simon, 2012-10-01 The oceans of the world are busy highways for creatures on the move. Plankton - small plants and animals, some so tiny they cannot be seen without a microscope - travel up to the surface and then down more than three thousand feet twice a day; eight-hundred-pound green turtles swim more than a thousand miles to lay their eggs; and spiny

lobsters, forming long lines, walk across the ocean bottom. Award-winning science writer Seymour Simon and illustrator Elsa Warnick team again in this vivid companion to *Ride the Wind: Airborne Journeys of Animals and Plants*. Fascinating glimpses of the mysterious migration of sea creatures will enthrall and amaze young readers.
