**Beyond the Sphere of Reasonable Doubt** Virtual Alien (Artist), 2013 Beyond the Sphere of reasonable Doubt (part 1). Diary for the years 2001, 2002, 2003. To some the world is merely an optical illusion created by aliens and extra-terrestrial forces and the world is all part of a virtual game. The diary started on the first of January 2000 as the Y2KDiary.com. The name was later changed to DiaryUnlimited in 2001 and has grown under that name ever since. The diary has been written by one man or alien: V.A. Virtual Alien with contributions from various users, sometimes from big corporations and governments' representatives responding to a recent comment, request or criticism. The diary exists online in images, games and video format. The diary has been conceived Tom Norwood and V.A. (Nick Peterson/Virtual Alien). It all started in London and progressively moved in the U.S. and the language -spelling- reflects this half way through the diary. The date however remained within a British format. The diary started on 01.01.01 (first of January 2001) and remained so until 31.12.09 (31st of December 2009) and beyond. The 00 years are perhaps the scariest decade in human history that saw 9/11, the war on terror, web commerce, MP3/MP4, WW3, The Banking collapse, the biggest corporate frauds in history, the Eurozone, organized religions, gay weddings, Data Protection and ID thefts, electronic viruses, spam, The pollution in London, binge drinking, BSE mad cow disease, Foot and Mouth, life on credit, recycling, the Polish invasion, HD, the Hygiene problem, Lady Gaga, human trafficking, living in New York and L.A., the constant abuse of children, the army of homeless, the first black president in the history of the Western world, the eighties revival with the seventies and nineties hang-over, Facebook, the obesity pandemic, Money Laundering (a guide to), How to Kill someone from a distance, Crime and Punishment (our lawless society). The diary has often been dubbed the diaries of Virtual Alien or the devil as no one can escape the acerbic and vitriolic language often used throughout this decade. V.A. Virtual Alien commenced his journey into outer space at the age of 14 in the late eighties with a brief music career often dubbed -a virtual one- and morphed into the world of interactive films and documentaries in the 00 years and this journey can be traced throughout this diary. The diary of the aughties/noughties/Y2K/00 years. It is also the diary of a Virtual Alien who discovers what the world really is and who really rules the world.

**The Second Life Herald** Peter Ludlow, Mark Wallace, 2007 When a virtual journalist for a virtual newspaper reporting on the digital world of an online game lands on the real-world front page of the New York Times, it just might signal the dawn of a new era. Virtual journalist Peter Ludlow was banned from The Sims Online for being a bit too good at his job--for reporting in his virtual tabloid The Alphaville Herald on the cyber-brothels, crimes, and strong-arm tactics that had become rife in the game--and when the Times, the BBC, CNN, and other media outlets covered the story, users all over the Internet called the banning censorship. Seeking a new virtual home, Ludlow moved the Herald to another virtual world--the powerful online environment of Second Life--just as it was about to explode onto the international mediascape and usher in the next iteration of the Internet. In The Second Life Herald, Ludlow and his colleague Mark Wallace take us behind the scenes of the Herald as they report on the emergence of a fascinating universe of virtual spaces that will become the next generation of the World Wide Web: a 3-D environment that provides richer, more expressive interactions than the Web we know today. In 1992, science fiction writer Neal Stephenson imagined the Metaverse, a virtual space that we would enter via the Internet and in which we would conduct important parts of our daily lives. According to Ludlow and Wallace, that future is coming sooner than we may think. They chronicle its chaotic, exhilarating, frightening birth, including the issue that the mainstream media often ignore: conflicts across the client-server divide over who should write the laws governing virtual worlds.

*The Virtual Community, revised edition* Howard Rheingold, 2000-10-23 Howard Rheingold tours the virtual community of online networking. Howard Rheingold has been called the First Citizen of the

Internet. In this book he tours the virtual community of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, *The Virtual Community* is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

**The Virtual Reality Regression** Barry Oliver, 2020-07-24 If you could escape to another world: a world of spectacular beauty, a world without danger or war; would you do it? What if it was as simple as putting on a virtual reality headset? 13-year-old Daryn Dixon finds such a world hidden in a virtual reality game called Aeviternity. Considering his own world is one of gang violence and inner-city poverty, the decision to escape would seem like a no-brainer. There is a catch. In Aeviternity, Daryn doesn't acquire magical powers or super strength. In Aeviternity, he is a toddler wearing only a diaper. Now would you go? At first his answer is no. Later, as Daryn makes friends and encounters caregivers who love him, his answer turns to yes. Daryn thinks he can be happy in Aeviternity, on a planet called Parvulis, forever. Then something goes terribly wrong. When those intent on its destruction enter Parvulis, Daryn must find a way to defend an essentially defenseless world populated by babies and their gentle caretakers.

**Life Online** Annette N. Markham, 1998 In *Life Online*, Annette Markham adopts an ethnographic approach to understanding Internet users by immersing herself in online reality. She finds that to understand how people experience the Internet, she must learn how to be embodied there.

**Being Virtual** Davey Winder, 2008-05-27 Thanks to the Internet, it has never been so easy to become the person of your wildest dreams. Immersive 3D worlds such as Second Life and THERE.com provide an escape route from the ordinary, into a virtual world where you have the power to mould your life in any way you please. Forget about walking, wheelchair users can fly. Pensioners wipe away the pains of age, discovering youthful exuberance and making young friends once more. No wonder it has become harder than ever to honestly answer the question: who am I? In *Being Virtual*, Davey Winder looks at how an increasing number of us are living part-real, part-virtual lives, and how it affects who we are. He looks at the opportunities and dangers that a virtual identity offers us, how we juggle our real and online lives, and what happens when one spills over into the other... He uses his own personal experiences to bring the issues to life, and backs them up with the real-life stories of others and testimony from the experts. Along the way, he looks at some fascinating questions such as: Are you a virtual liar? What happens when our virtual and real worlds collide? Why will you talk to anyone online, but nobody on the train to work? Why do so many middle-aged men transform into teenage girls online? Is it possible to have any secrets in such a connected world? *Being Virtual* gives a glimpse into the future of human identity, and is a must-read for anyone who uses the Internet to enhance - or escape from - their 'ordinary' life. About the author Davey Winder has been a freelance journalist for 16 years, and is Contributing Editor of the best-selling IT magazine, PC Pro. He has picked up many awards including Technology Journalist of the Year and IT Security Journalist of the Year. A founder member of the Internet Society of England and author of more than 20 books, his blog can be found at: <http://happygeeknewmedia.blogspot.com/>

*The Virtual Community* Howard Rheingold, 1994

**The Virtual** Rob Shields, 2003 This work argues that the virtual has become one of the key organizing principles of contemporary society for the public realms of politics and business as well as private life from sex to shopping.

**Virtual Reality** Susan Henneberg, 2016-12-15 Virtual reality might seem like the stuff of science fiction, but it has been in use in various forms since the 1950s. The technology is being developed for use in education, professional and military training, therapy, entertainment, and design. But is a simulated world a better world? Experts caution that virtual reality could be physically and

emotionally debilitating. They predict that society could go into decline. Is this simply fear of progress, or is it something to take seriously? Readers will learn the hot-button issues associated with virtual reality and whether we should be excited or afraid of this incredible technology.

Changing Lives Through Virtual Reality James Roland, 2020-04 Virtual reality is having a huge impact on how people play, shop, do business, and just live their lives today. It may seem odd to think of developments in a virtual, unreal world changing the lives of people in the real world, but that's exactly what is happening every day. Surgeons, engineers, shoppers and students are peering into VR headsets as the future comes into focus today--

*Beyond the Vision* Sandra K. Helsel, 1992

How Virtual Reality Will Impact Society Cecilia Pinto McCarthy, 2018-08-15 By putting on a headset, virtual reality users can transport themselves to a world that only exists inside a computer. *How Virtual Reality Will Impact Society* examines the progress in this field, looks at the science behind it, and discusses how it will shape our world in the future--

*Virtual Fire* Mendy Sobol, 2019-07 May 1970. Vietnam. Cambodia. Kent State. Jackson State. Violent protests erupt on college campuses across America. Paul Tesla Simmons and his best friend Toby Jessup are college seniors who spend their time writing programs on Wellston University's IBM 650 mainframe computer, playing pinball in the back room of the Beef 'n' Bun restaurant, and dreaming. President Nixon's escalation of the war and their friendship with student activist Meg Wells draw Paul and Toby into the antiwar movement and a choice between violent and non-violent protest. As the war and opposition to the war reach their climaxes, Toby, Paul, and Meg become ever more radicalized, only to have their plans overshadowed by an incident that alters the course of their personal histories forever. Decades later, Paul, a successful programmer in an era transformed by the rise of the computer, makes a revolutionary technological discovery. Realizing he now has the means to change a tragic, yet seemingly minor historical event, Paul acts, and unwittingly sets history on a deadly new course. Living in the world his actions created, a world where computers are the province of a select few, seeing life as it was only in his dreams, can Paul, with the help of the brilliant young hacker Melora Kennedy, return history to its proper path and restore the dreams of his youth? From New England's ivy-covered college halls, to New Jersey's crumbling cities, to the beaches of Florida's Gulf coast and the ruins of post-war Vietnam, *VIRTUAL FIRE*'s four narrators relate their experiences of war, resistance to war, the power of friendship and the power of dreams. Author's Note: *VIRTUAL FIRE* contains scenes concerning warfare, post-traumatic stress disorder related to the Vietnam War, violent acts committed by and against antiwar protesters, and explicit language. It includes a compendium of links to books, movies, and music for those who want to learn more about the Vietnam War and the anti-war movement.

**Virtual Reality** Elaine Pascoe, 1998 Discusses in general terms the computer technology involved in virtual reality and how it has been used and will be used in the future.

**My Tiny Life** Julian Dibbell, 1999

*The Virtual Ghost* D. F. Rider, 1994 Carlos is the only one who sees a parrot and a medicine man in a virtual reality program. As they investigate, Carlos and Chris explore an ancient civilization.

**My Journal: Energy Windmill Prototype, Blank 150 Page Lined Diary / Journal / Notebook** My Journal, 2016-05-26 Blank 150 page lined journal/diary/notebook for your thoughts, inspiration, and ideas.

Virtual America John Opie, 2008 Virtual America traces the complex relationship between Americans, technology, and their environment as it has unfolded over the past several centuries. Throughout history Americans have constructed mental pictures of unique places, such as the American West, that have taken on more authority than the actual gritty landscapes. This disconnect from reality is magnified by the new world of virtual realities on the computer screen, where personal immersion in interactive simulations becomes the "default" environment. Virtual America identifies the connections (or lack thereof) between our individual selves, an American identity, and the geography "out there." John Opie examines what he calls First Nature (the natural world), Second Nature (metropolitan infrastructure/built environment), and Third Nature (virtual reality in

cyberspace). He also explores how Americans have historically dreamed about a better life in daily, ordinary existence and then fulfilled it through the Engineered America of our built environment, the Consumer America of material well-being, and the Triumphal America of our conviction that we are the world's exceptional model. But these dream worlds have also encouraged placelessness and thus indifference to our dwelling in home ground. Finally, Opie explores Last Nature (a sense of place) and argues that when we identify an authentic place, we can locate authenticity of self—a reification of place and self—by their connectedness.

**The Virtual Castle** Rosemary Patyus, 2010-08 Trapped in his own computer game, Charlie Daniels had only a few hours left to live. Only his daughter and nephew could rescue him but they didn't know where he was. Tim hated computers. The last place he wanted to spend his holidays was with his young cousin Sarah at his computer crazy uncle's house. Little did he know that within twenty-four hours they would face deadly dangers, solve intriguing puzzles and riddles, make fools of themselves at a circus and have unbelievable adventures in strange and exotic locations. Romper was just a dog and the key to the whole adventure.
