Salah Abdel-aleem, James E. Lowe

Research and Development Report ,1962

Cardiac Metabolism in Health and Disease Salah Abdel-aleem,James E.

Lowe,2012-12-06 This special issue of Molecular and Cellular Biochemistry contains original research papers as well as invited reviews focused in the field of cardiac metabolism and its regulation under normal and disease conditions. These papers cover many areas under intensive and rapid development such as the regulation of fatty acid oxidation in the heart, the role of cardiac glycogen during ischemia, the role of CPT I isoenzymes, the pathophysiology of diabetic cardiomyopathy, cardiac protection through regulation of energy production, the role of fatty acid binding protein under normal and pathological conditions, and several other important topics in this area of research. We hope that this special issue of Molecular and Cellular Biochemistry provides an up-to-date source of information for scientists and clinicians interested in the mechanism by which cardiac metabolism is regulated in health and disease and the mechanistic relationship between disturbances in cardiac metabolism and the genesis of cardiovascular diseases.

The Journal of Neuroscience ,1989

Colloid/nanoparticle formation and mobility in the context of deep geological nuclear waste disposal (Project KOLLORADO-2) ; final report Huber, Florian,Noseck, Ulrich,Schäfer, Thorsten,2014-03-03 To assess the relevance of colloidal influences on radionuclide transport for the long-term safety of a radioactive waste repository, the KOLLORADO-2 project integrates the results of geochemical and hydrogeological studies. The results may serve as a basis for an appraisal of the implications of colloid presence in

the vicinity of radioactive waste repositories in different deep geological host-rock formations.

Annual Report... Women's Christian Association of Philadelphia, 1912

Treating Substance Abuse Scott T. Walters, Frederick Rotgers, 2011-12-13 Widely adopted, this state-of-the-art work is grounded in the best available knowledge about substance abuse and its treatment. The editors and contributors are leading authorities who provide a complete introduction to each of today's major evidence-based treatment approaches -- from conceptual underpinnings to clinical applications. The third edition has been revised and updated to reflect significant advances in research, theory, and technique. Entirely new chapters cover the biology of substance use disorders, treatment in primary care settings, and case management. The third edition retains the structure that makes the book so popular as a course text and practitioner resource. Following an introductory overview, paired chapters focus respectively on the theory and practice of each approach, including motivational, contingency management, cognitive-behavioral, 12-step, family, and pharmacological models. Theory chapters explain basic assumptions about how people develop, maintain, and recover from substance use disorders and concisely review the research support for each approach. Practice chapters then offer a start-to-finish view of treatment, covering such crucial topics as the therapeutic relationship, assessment procedures, goal setting, the sequencing of interventions, how denial and resistance are addressed, the role of self-help groups, and strategies for preventing and dealing with relapse. Illustrative case examples are included. The volume concludes with three chapters on integrating different techniques to meet patients' needs

in a range of clinical settings. Written for a broad audience, this book is an essential text for courses in substance abuse treatment and addiction counseling. Experienced substance abuse clinicians -- including clinical psychologists, clinical social workers, psychiatric nurses, counselors, and psychiatrists -- will find it a valuable reference for staying up to date on current treatment approaches.

Generalized Epilepsy AVOLI, 2012-12-06 In recent years there has been intense interest in the basic mechanisms of epilepsy. Many symposia and monographs have been devoted to this topic. These reviews, however, have focused almost exclusively on studies performed in models of partial (or focal) epilepsy. It was natural that scientists interested in the fundamental mechanism of epileptogenesis at the cellular level were attracted to work on models in which the epileptogenic dysfunction could be confined to ever-smaller populations of neurons. Many of the most illuminating studies done in this field in the recent past have been carried out in vitro on brain slices or on dissociated neuronal cultures. Much valuable insight into the mechanisms of epileptogenesis has been obtained in this manner. One cannot, however, automatically assume that mechanisms elucidated in such exquisitely focal models are applicable to forms of epilepsy in which seizures from their very start involve the entire brain. One of the most difficult questions that arises in this context is how epileptogenic dysfunction, which can be understood in terms of mechanisms involving a few contiguous cells, can lead to what appears to be a simultaneous onset of seizure discharge in virtually all areas of the brain. Most of the workers who have made excellent contributions to the understanding of the cellular mechanisms involved in epileptogenesis have paid virtually no attention to this important

problem.

Living Clean: The Journey Continues Fellowship of Narcotics Anonymous, 2012

Umami Yōjirō Kawamura, Morley Richard Kare, 1987 Included at the end of each paper.

The Washington Law Reporter, 1922 Includes decisions of the District of Columbia Court of Appeals, 1902-1934, the United States Court of Appeals for the District of Columbia Circuit, 1934-1959, and various other courts of the District of Columbia.

Journal of Clinical Microbiology, 2004

Transplantation Johann W. Masshoff, 2012-12-06 Organ transplantation has almost disappeared from headlines in the daily press, possibly because it failed to fulfill exaggerated expectations. Transplantation pathology has become more and more important, not only with relation to therapeutic transplantations but even more in its fundamental theories. There is some analogy here to the development in space science where spectacular achievements were followed by sobering frustrations and where, for the time being, the effect on technology is more fruitful than the outcome of the original far-reaching projects. That transplant rejection was defined, in most of its stages, as an immunologic process, has given many new impulses to immunology in general. Transplantation assays have become a pet experiment in immunobiology and an abundant source of general information and knowledge. The implications of such a development could not be predicted when the present volume was outlined and planned. In accordance with the concept of WILLI MASSHOFF, general transplantation pathology was given a central position as a fundamental science, while the chapters on the transplantation of various tissues are of a more paradigmatic character. It was MASSHOFF who invited

competent authors and who managed to balance their articles, despite some overlapping, so as to draw a comprehensive picture of contemporary transplantation pathology. WILLI MASSHOFF died while he was editing the first manuscripts. As co-editors we have undertaken to complete the publication that we began together.

Portas abertas Rossana Maria Seabra Sade,2014-03-10 A proposta de reunir em um só livro os protagonistas que trabalham ou trabalharam no processo de desinstitucionalização em Trieste (Itália) amadureceu durante as entrevistas realizadas em meu estágio pós-doutoral, desenvolvido entre os anos de 2010 e 2011. Para entender o cenário de

superação do manicômio em Trieste, além de análise de literatura e embates, entrevistei: Franco Rotelli, Giuseppe Dell'Acqua, Roberto Mezzina, Pina Ridente (psiquiatras); Renato Davì (psicólogo); Roberto Colapietro (operador de saúde mental); Raffaele Dovenna (enfermeiro); Carla Prosdocimo (operadora social); Morena Furlan (técnica de reabilitação psiquiátrica); Izabel Marin (assistente social). A escolha dos protagonistas obedeceu aos seguintes critérios: notoriedade na área, envolvimento com o movimento, diversidade profissional e tempo de trabalho no Departamento de Saúde Mental de Trieste. Procurei conhecer as ideias de profissionais com mais e com menos experiência, a fim de obter diversos pontos de vista sobre o processo de desinstitucionalização.

Embark on a breathtaking journey through nature and adventure with Explore with is mesmerizing ebook, Witness the Wonders in **Na Undelete 201** .
