Lost Libraries J. Raven,2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

Afghanistan Kenneth Katzman,2008 U.S. and outside assessments of the effort to stabilise Afghanistan are mixed and subject to debate; the Administration notes progress on reconstruction, governance and security in many areas of Afghanistan, particularly the U.S.-led eastern sector of Afghanistan. However, a November 2007 Bush Administration review of U.S. efforts in Afghanistan reportedly concluded that overall progress was inadequate. This mirrors recent outside studies that contain relatively pessimistic assessments, emphasising a growing sense of insecurity in areas previously considered secure, increased numbers of suicide attacks, and increasing aggregate poppy cultivation, as well as increasing divisions within the NATO alliance about the relative share of combat among the nations contributing to the peacekeeping mission. Both the official U.S. as well as outside assessments are increasingly pointing to Pakistan as failing -- either through lack of attention or eliberatestrategy -- to prevent Taliban commanders from operating from Pakistan. To try to gain momentum against the insurgency, the United States is considering new initiatives including adding U.S. troops to the still combat-intense south, possibly assuming U.S. command of the southern sector, and increasing direct U.S. action against Taliban concentrations inside Pakistan. Politically, the Afghan government remains reasonably stable. The post-Taliban transition was completed with the convening of a parliament in December 2005; a new constitution was adopted in January 2004, successful presidential elections were held on October 9, 2004, and parliamentary elections took place on September 18, 2005. The parliament has become an arena for factions that have fought each other for nearly three decades to debate and peacefully resolve differences, as well as a centre of political pressure on President Hamid Karzai. Major regional strongmen have been marginalised. Afghan citizens are enjoying personal freedoms forbidden by the Taliban, and women are participating in economic and political life. Presidential elections are to be held in the fall of 2009, with parliamentary and provincial elections to follow one year later. To help stabilise Afghanistan, the United States and partner countries are deploying a 47,000 troop NATO-led International Security Assistance Force (ISAF) that now commands peacekeeping throughout Afghanistan, including the restive south. Of those, 19,000 of the 31,000 U.S. forces in Afghanistan are part of ISAF. The U.S. and partner forces also run regional enclaves to secure reconstruction (Provincial Reconstruction Teams, PRTs), and are building an Afghan National Army and National Police. The United States has given Afghanistan over \$23 billion (appropriated, including FY2008 to date) since the fall of the Taliban, including funds to equip and train Afghan security forces.

Crusoe's Books Bill Bell,2022-01-13 This is a book about readers on the move in the age of Victorian empire. It examines the libraries and reading habits of five reading constituencies from the long nineteenth century: shipboard emigrants, Australian convicts, Scottish settlers, polar explorers, and troops in the First World War. What was the role of reading in extreme circumstances? How were new meanings made under strange skies? How was reading connected with mobile communities in an age of expansion? Uncovering a vast range of sources from the period, from diaries, periodicals, and literary culture, Bill Bell reveals some remarkable and unanticipated insights into the way that reading operated within and upon the British Empire for over a century.

Poucher's Perfumes, Cosmetics and Soaps H. Butler,2013-06-29 Poucher's Perfumes Cosmetics and Soaps has been in print since 1923 and is the classic reference work in the field of cosmetics. Now in a fully updated 10th edition, this new volume provides a firm basic knowledge in the science of cosmetics (including toiletries) as well as incorporating the latest trends in scientific applications and legislation which have occurred since the 9th edition. This edition will not only be an excellent reference book for students entering the industry but also for those in specialized research companies, universities and other associated institutions who will be able to gain an overall picture of the modern cosmetic science and industry. The book has been logically ordered into four distinct parts. The historical overview of Part 1 contains an essay demonstrating William Arthur Poucher's influence on the 20th Century cosmetics industry as well as a chapter detailing the long history of cosmetics. Part 2 is a comprehensive listing of the properties and uses of common cosmetic types, ranging from Antiperspirants through to Sunscreen preparations. There are an increased number of raw materials in use today and their chemical, physical and safety benefits are carefully discussed along with formulation examples. The many additions since the last edition demonstrate the dramatic recent expansion in the industry and how changes in legal regulations affecting the development, production and marketing of old, established and new products are operative almost worldwide. Information on specialist products for babies and others is included within individual chapters. The chapters in Part 3 support and outline the current guidelines regarding the assessment and control of safety and stability. This information is presented chemically, physically and microbiologically. Part 3 chapters also detail requirements for the consumer acceptability of both existing and new products. Those legal regulations now in force in the EU, the USA and Japan are carefully described in a separate chapter and the remaining chapters have been extensively updated to explain the technical and practical operations needed to comply with regulations when marketing. This information will be invaluable to European Union and North American companies when preparing legally required product information dossiers. The final chapters in Part 4 contain useful information on the psychology of perfumery as well as detailing methods for the conduct of assessment trials of new products. As ingredient labelling is now an almost universal legal requirement the International Nomenclature of Cosmetics Ingredients (INCI) for raw materials has been used wherever practicable. The advertised volume is the 10th edition of what was previously known as volume 3 of Poucher's Cosmetics and Soaps. Due to changes in the industry there are no plans to bring out new editions of volume 1 and 2.

Reconciliation Benazir Bhutto,2009-10-13 Benazir Bhutto returned to Pakistan in October 2007, after eight years of exile, hopeful that she could be a catalyst for change. Upon a tumultuous reception, she survived a suicide-bomb attack that killed nearly two hundred of her countrymen. But she continued to forge ahead, with more courage and conviction than ever, since she knew that time was running out—for the future of her nation, and for her life. In *Reconciliation*, Bhutto recounts in gripping detail her final months in Pakistan and offers a bold new agenda for how to stem the tide of Islamic radicalism and to rediscover the values of tolerance and justice that lie at the heart of her religion. With extremist Islam on the rise throughout the world, the peaceful, pluralistic message of Islam has been exploited and manipulated by fanatics. Bhutto persuasively argues that America and Britain are fueling this turn toward radicalization by supporting groups that serve only short-term interests. She believed that by enabling dictators, the West was actually contributing to the frustration and extremism that lead to terrorism. With her experience governing Pakistan and living and studying in the West, Benazir Bhutto was versed in the complexities of the conflict from both sides. She was a renaissance woman who offered a way out. In this riveting and deeply insightful book, Bhutto explores the complicated history between the Middle East and the West. She traces the roots of international terrorism across the world, including American support for Pakistani general Zia-ul-Haq, who destroyed political parties, eliminated an independent judiciary, marginalized NGOs, suspended the protection of human rights, and aligned Pakistani intelligence agencies with the most radical elements of the Afghan mujahideen. She speaks out not just to the West, but to the Muslims across the globe who are at a crossroads between the past and the future, between education and ignorance, between peace and terrorism, and between dictatorship and democracy. Democracy and Islam are not incompatible, and the clash between Islam and the West is not inevitable. Bhutto presents an image of modern Islam that defies the negative caricatures often seen in the West. After reading this book, it will become even clearer what the world has lost by her assassination.

Surviving Sudden Environmental Change Jago Cooper,Payson Sheets,2012-02-01 Archaeologists have long encountered evidence of natural disasters through excavation and stratigraphy. In *Surviving Sudden Environmental Change*, case studies examine how eight different past human communities—ranging from Arctic to equatorial regions, from tropical rainforests to desert interiors, and from deep prehistory to living memory—faced, and coped with, such dangers. Many disasters originate from a force of nature, such as an earthquake, cyclone, tsunami, volcanic eruption, drought, or flood. But that is only half of the story; decisions of people and their particular cultural lifeways are the rest. Sociocultural factors are essential in understanding risk, impact, resilience, reactions, and recoveries from massive sudden environmental changes. By using deep-time perspectives provided by interdisciplinary approaches, this book provides a rich temporal background to the human experience of environmental hazards and disasters. In addition, each chapter is followed by an abstract summarizing the important implications for today's management practices and providing recommendations for policy makers. Publication supported in part by the National Science Foundation.

The Genus Aeromonas Brian Austin,1996 It is recognized that aeromonads form the dominant component of the eutrophic freshwater aerobic bacterial population and over the last ten years the many facets of the organisms have attracted much attention. This timely publication presents the latest developments in the biology of *Aeromonas* and draws on the expertise of an international team of contributors to provide an authoritative and enlightening account of the many species in this genus. Early chapters deal with the taxonomy, isolation and enumeration, and identification of aeromonads. The book goes on to describe subtyping methods for *Aeromonas* species, the ecology of mesophilic *Aeromonas* in the aquatic environment, human pathogens (diarrhoeal disease), *Aeromonas* species in disease of animals, fish pathogens, pathogenic mechanisms, toxins and the *Aeromonas hydrophila* group in food. This commendable reference source will be of value to all medical and veterinary microbiologists, public health scientists and microbial ecologists.

Sudan, Oil, and Human Rights Jemera Rone,Human Rights Watch (Organization),2003 For twenty years, southern Sudan has been the site of a tragic and brutal civil war, pitting the northern-based Arab and Islamic government against rebels in African marginalized areas, especially the south. More than two million people have died and four million have been displaced as a result. In 1999, anew element radically changed the war: Sudanese oil, located in the south, was firs exported by the central government. The human price of this bonanza is immeasurable. The government, using oil revenues and aided by co-opted southerners, rained a scorched earth campaign of mass displacement, bombing, and terror on the agro-pastoral southern civilians living in and near the oil zones. The displaced number in the hundreds of thousands.

Given the literature dearth, this book will not only be a comprehensive assessment of water resources in Pakistan but can also can as outstanding textbook on water resource management in Pakistan. It will attract a great range of readership including water specialists, researchers, undergraduate and post graduate students and policy makers from Pakistan as well as from overseas.

Songs of Wisdom and Circles of Dance Tazim R. Kassam,1995-08-17 Coursing though cultures and time, tuneful verse has given moving expression to the human longing for the divine. As poetry strung on sweet melodies, hymns bear testimony to the religious life of the devout, and to the inspiring teachings of minstrels and saints. Such is the ginan tradition of the Satpanth Isma'ilis, Indian successors of the Fatand Nizari Isma'ili sect of the Shi'ah

Muslims. Traditionally recited during daily ritual prayers, ginans have been revered for generations among the Satpanth Isma'ilis as sacred compositions. This work offers for the first time an extensive translation of hymns attributed to the Isma'ili saint-composer, Pir Shams (ca. 13th century), who is at once one of the most pivotal and yet most enigmatic figures of this literary tradition. It also presents a cogent historical reconstruction of the beginnings of Satpanth Isma'ilism--a phase of Isma'ili history that has spanned over eight centuries.

The Pharaoh of the Exodus: Fairy tale or real history? Gerard Gertoux,2017-02-10 For Egyptologists as well as archaeologists, and even now Bible scholars, the answer to the question: Who was the pharaoh of the Exodus, the answer is obvious: there was nobo because the biblical story was a myth (Dever: 2003, 233). Consequently, who to believe: Moses or Egyptologists? Several scholars (Finkelstein, Dever and others) posit that the Exodus narrative may have developed from collective memories of the Hyksos expulsions of Semitic Canaanites from Egypt, possibly elaborated on to encourage resistance to the 7th century domination of Judah by Egypt. For these scholars the liberation from Egypt after the 10 plagues, as it is written in the Book of Exodus, is quite different from the historical war of liberation against the Hyksos. What are the Egyptian documents underlying this hypothesis: none, and what is the chronology of this mysterious war: nobody knows! Consequently, who to believe: Moses or Egyptologists? This study will give the answer.

Innovation, Learning, and Technological Dynamism of Developing Countries Sunil Mani,Henny Romijn,2004 Development scholars from the Netherlands, Germany, Australia, India, and Britain highlight examples of developing countries creating their own technology rather than, or often in conjunction with obtaining it from elsewhere, as is the usual practice. The nine studies were presented at an conference in Maastricht; no date is noted. Annotation 2004

Metabolic Engineering for Bioactive Compounds Vipin Chandra Kalia,Adesh Kumar Saini,2017-10-07 This book comprehensively discusses the latest research in the area of metabolic engineering. Metabolic engineering solutions for bioactive compounds are now being derived by means of heterologous gene expression, in a wide range of organisms. The book provides an overview of the model systems being employed for metabolic manipulation to yield bioactive molecules, such as single-cell proteins, antibody generation, metabolites, proteases, chaperones, therapeutic proteins, nanomaterials, polymeric conjugates, dendrimers and nanoassemblies, Escherichia coli, Agrobacterium, Saccharomyces cerevisiae and cell lines, etc. In addition, it shares insights into the scope of these methods in the areas of prevention, diagnosis and treatment of diseases, e.g. immunotherapy for curing various diseases like cancer, allergies, autoimmune diseases, etc.

Advances in Mechanical Systems Dynamics Alberto Doria,Giovanni Boschetti,Matteo Massaro,2020-02-13 Modern dynamics was established many centuries ago by Galileo and Newton before the beginning of the industrial era. Presently, we are in the presence of the fourth industrial revolution, and mechanical systems are increasingly being integrated with electronic, electrical, and fluidic systems. This trend is present not only in the industrial environment, which will soon be characterized by the cyber-physical systems of industry 4.0, but also in other environments like mobility, health and bio-engineering, food and natural resources, safety, and sustainable living. In this context, purely mechanical systems with quasi-static behavior will become less common and the state-of-the-art will soon be represented by integrated mechanical systems, which need accurate dynamic models to predict their behavior. Therefore, mechanical system dynamics are going to play an increasingly central role. Significant research efforts are needed to improve the identification of the mechanical properties of systems in order to develop models that take non-linearity into account, and to develop efficient simulation tools. This Special Issue aims at disseminating the latest research achievements, findings, and ideas in mechanical systems dynamics, with particular emphasis on applications that are strongly integrated with other systems and require a multi-physical approach.
