Idle Threats Andrew Lyndon Knighton, 2012-10-22

The 19th century witnessed an explosion of writing about unproductivity, with the exploits of various idlers, loafers, and “gentlemen of refinement” capturing the imagination of a country that was deeply ambivalent about its work ethic. *Idle Threats* documents this American obsession with unproductivity and its potentials, while offering an explanation of the profound significance of idle practices for literary and cultural production. While this fascination with unproductivity memorably defined literary characters from Rip Van Winkle to Bartleby to George Hurstwood, it also reverberated deeply through the entire culture, both as a seductive ideal and as a potentially corrosive threat to upright, industrious American men. Drawing on an impressive array of archival material and multifaceted literary and cultural sources, *Idle Threats* connects the question of unproductivity to other discourses concerning manhood, the value of art, the allure of the frontier, the usefulness of knowledge, the meaning of individuality, and the experience of time, space, and history. Andrew Lyndon Knighton offers a new way of thinking about the largely unacknowledged “productivity of the unproductive,” revealing the incalculable and sometimes surprising ways in which American modernity transformed the relationship between subjects and that which is most intimate to them: their own activity.

Our National Monuments Q. T. Luong,2021-09-25
From the north woods of Maine to the cactus-filled deserts of Arizona, America's national monuments include vast lands rivaling the national parks in beauty, diversity, and historical heritage. These critically important landscapes, mostly under the Bureau of Land Management supervision, are often under the radar with limited visitor information available yet offer considerable opportunities for solitude and adventure compared to bustling national parks. The Antiquities Act of 1906 gave Presidents the authority to proclaim national monuments as an expedited way to protect areas of natural or cultural significance. Since then, 16 Presidents have used the Antiquities Act to preserve some of America's most treasured public lands and waters. In 2017, an unprecedented Executive Order was issued questioning these designations by calling for the review of 27 national monuments across 11 states and two oceans, opening the threat of development to vulnerable and irreplaceable natural resources. *Our National Monuments* introduces these spectacular and unique landscapes, in the first book of its kind. Accompanying the collection of scenic photographs is an invaluable guide

including maps of each national monument with carefully selected attractions identified and described based on the author's wide-ranging explorations. Our National Monuments invites readers to experience for themselves these lands and learn about the people and cultures who came before, and to whom these lands are still sacred places. QT Luong is one of the most prolific photographers working in America's public lands and the author of Treasured Lands, the best-selling and acclaimed photography book about the national parks. Combining hundreds of his sumptuously printed photographs with essays from citizen conservation associations caring for these national treasures; including a foreword by former Secretary of the Interior Sally Jewell and photographs of marine national monuments from Ansel Adams award-winning photographer Ian Shive, the comprehensive portrayals of Our National Monuments help readers understand how these essential landscapes are preserving America's past and shaping its future.

The Mighty Niagara John N. Jackson,2003-03

...makes some notable contributions to the popular and scholarly literature about the Niagara region...a welcome addition to the literature of US-Canada cross-border studies. -The Canadian Historical Review...provides a most engaging and eloquently written story, a learned tale of the Niagara region's associated historical triumphs and abiding challenges. The book's geographical and social histories will be of interest not only to residents of the Niagara Frontier but to anyone who has ever been fascinated by the complexly related natural and technological wonders that have helped to make Niagara one of the world's most famous and enduring icons. -ISLEThis in-depth regional study of the Niagara Frontier traces the evolution of landscape and patterns of settlement on both sides of the Niagara River extending from St. Catharines, Ontario, to Lockport, New York. This significant region, astride an international frontier, both connects and separates, unites and divides Canadian and American territories bordering the Niagara River. Like map overlays that build on an underlying base geography, Professor Jackson's chronological approach begins with the qualities of the physical background and their ongoing ramifications up to the present for the use and development of land. He then adds the Native settlements, showing their trails and economic activities, while highlighting the amazing fact that certain Native features remain an intrinsic part of the modern landscape. The

next time period reveals that the previous human landscapes, once continuous across the Niagara River, became acutely discontinuous with the creation in 1783 of an unseen but divisive international boundary. Subsequent chapters follow the changes over the course of time as canals, railways, hydroelectric power, and the dominance of the automobile in the present era all transform the environment. Jackson also discusses Niagara Falls as the fulcrum around which the Niagara Frontier has developed and the impact of the tourist industry on the region. This thorough analysis of an important international region will be of great use to students of regional, urban, and historical geography as well as to anyone involved in cross-boundary trade, education, or tourism. John N. Jackson (St. Catharines, Ontario) is professor emeritus of applied geography at Brock University and the author of fourteen previous books on regional geography and history. John Burtiniak (St. Catharines), now retired, was the special collections librarian and university archivist at Brock University. Gregory P. Stein (Buffalo, NY) is associate professor of geography and planning at SUNY College at Buffalo.
