The Tao of Sound Fabien Maman, Terres Unsoeld, 2008-03-04 In 1981, French musician/composer and acupuncturist Fabien Maman conducted a revolutionary sound/cellular experiment, documenting for the first time under a microscope, the impacts of acoustic sound on human cells. This research changed the landscape of vibrational

sound healing as we know it today. Websters' Dictionary (English), sites Maman as the founding father of vibrational sound therapy. His colleagues call him a visionary before his time. 2011 marks the 30th anniversary of Maman's sound/cellular experiment. In commemoration of this anniversary, Fabien Maman has now written The Tao of Sound: Acoustic Sound Healing for the 21st Century. This book is an encyclopedia of Maman's more than 30 years of research and practical application, creating more than 30 techniques to heal the body, mind and spirit using acoustic sound, color and chi movement®. Fabien Maman is the man who created the now famous technique of using tuning forks and color lights on the acupuncture meridians to heal the body, mind and spirit. Each evolutionary technique is grounded in sound and cellular research, as well as the Classical traditions of music theory, mathematics, Chinese medicine, aikido, Kototama and astrology. The Tao of Sound will become the quintessential Encyclopedia for Sound Healing. It is everything you ever wanted to know about Fabien Maman's sound research and sound protocols from Star to Cell - linking the human body, organs, meridians, chakras and subtle energy fields with the 5 elements of nature, 8 directions of the Bagwa, the Kaballa and the stars and beyond. And it is backed by his 100 brilliant color photographs of human cells under the influence of acoustic sound! It is also a manifesto for acoustic sound - challenging all who enter the world of vibrational sound healing, to do so softly... with no electronic nor electric sounds... but returning, once again, to the healing power of pure overtones and harmonics that can only be found in the five elements and the nature....

Tuning the Human Biofield Eileen Day McKusick, 2021-09-07 • Provides a precise map of the energetic biofield that surrounds the body, showing where specific emotions, memories, traumas, and pain are stored • Details how to locate stored trauma in the biofield with a tuning fork and clear it • Winner of the 2015 Nautilus Silver Award When Eileen McKusick began offering sound therapy in her massage practice she soon discovered she could use tuning forks to locate and hear disturbances in the energy field, or biofield, that surrounded each of her clients. Passing the tuning forks through these areas in the biofield not only corrected the distorted vibrational sounds she was hearing but also imparted consistent, predictable, and sometimes immediate relief from pain, anxiety, insomnia, migraines, depression, fibromyalgia, digestive disorders, and a host of other complaints. Now, more than 20 years later, McKusick has fully developed her sound healing method, which she calls Biofield Tuning, and created a map of the biofield, revealing the precise locations where specific emotions, memories, ailments, and traumas

are stored. In this book, McKusick explains the basics of Biofield Tuning practice and provides illustrations of her Biofield Anatomy Map. She details how to use tuning forks to find and clear pain and trauma stored in the biofield and reveals how the traditional principles and locations of the chakras correspond directly with her biofield discoveries. Exploring the science behind Biofield Tuning, she examines scientific research on the nature of sound and energy and explains how experiences of trauma produce “pathological oscillations” in the biofield, causing a breakdown of order, structure, and function in the body. Offering a revolutionary perspective on mind, energy, memory, and trauma, McKusick’s guide to Biofield Tuning provides new avenues of healing for energy workers, massage therapists, sound healers, and those looking to overcome chronic illness and release the traumas of their past.
