**Animation: A World History** Giannalberto Bendazzi,2015-11-06 A continuation of 1994’s groundbreaking *Cartoons*, Giannalberto Bendazzi’s *Animation: A World History* is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, *Animation: A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume III catches you up to speed on the state of animation from 1991 to present. Although characterized by such trends as economic globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history.

**A History of Artists' Film and Video in Britain** David Curtis,2019-07-25 In recent years the use of film and video by British artists has come to widespread public attention. Jeremy Deller, Douglas Gordon, Steve McQueen and Gillian Wearing all won the Turner Prize (in 2004, 1996, 1999 and 1997 respectively) for work made on video. This fin-de-siecle explosion of activity represents the culmination of a long history of work by less well-known artists and experimental film-makers. Ever since the invention of film in the 1890s, artists have been attracted to the possibilities of working with moving images, whether in pursuit of visual poetry, the exploration of the art form's technical challenges, the hope of political impact, or the desire to re-invigorate such time-honoured subjects as portraiture and landscape. Their work represents an alternative history to that of commercial cinema in Britain - a tradition that has been only intermittently written about until now. This major new book is the first comprehensive history of artists' film and video in Britain. Structured in two parts ('Institutions' and 'Artists and Movements'), it considers the work of some 300 artists, including Kenneth Macpherson, Basil Wright, Len Lye, Humphrey Jennings, Margaret Tait, Jeff Keen, Carolee Schneemann, Yoko Ono, Malcolm Le Grice, Peter Gidal, William Raban, Chris Welsby, David Hall, Tamara Krikorian, Sally Potter, Guy Sherwin, Lis Rhodes, Derek Jarman, David Larcher, Steve Dwoskin, James Scott, Peter Wollen and Laura Mulvey, Peter Greenaway, Patrick Keiller, John Smith, Andrew Stones, Jaki Irvine, Tracy Emin, Dryden Goodwin, and Stephanie Smith and Ed Stewart. Written by the leading authority in the field, *A History of Artists' Film and Video in Britain, 1897-2004* brings to light the range and diversity of British artists' work in these mediums as well as the artist-run organisations that have supported the art-form's development. In so doing it greatly enlarges the scope of any understanding of 'British cinema' and demonstrates the crucial importance of the moving image to British art history.

**The Yellow Wall-Paper** Charlotte Perkins Gilman,2024-03-21 She has just given birth to their child. He labels her postpartum depression as »hysteria.« He rents the attic in an old country house. Here, she is to rest alone – forbidden to leave her room. Instead of improving, she starts hallucinating, imagining herself crawling with other women behind the room's yellow wallpaper. And secretly, she records her experiences. The *Yellow Wall-Paper* [1892] is the short but intense, Gothic horror story, written as a diary, about a woman in an attic – imprisoned in her gender; by the story. Charlotte Perkins Gilman's feminist novella was long overlooked in American literary history. Nowadays, it is counted among the classics. CHARLOTTE PERKINS GILMAN (1860-1935), born in Hartford, Connecticut, was an American feminist theorist, sociologist, novelist, short story writer, poet, and playwright. Her writings are precursors to many later feminist theories. With her radical life attitude, Perkins Gilman has been an inspiration for many generations of feminists in the USA. Her most famous work is the short story *The Yellow Wall-Paper* [1892], written when she suffered from postpartum psychosis.

The book features four sections. In addition to highlighting related theoretical underpinnings, key concepts, linguistic-didactic functionalities and interaction scenarios in materials development, the volume will address the practical issues and considerations not only in the design, development, integration, and evaluation of the technology-enhanced materials development for language instruction but also the protection, usability, and access in authored and/or co-authored content. Furthermore, previous research findings and foci are addressed to highlight the research gaps and pedagogical implications for materials developers, policy makers, and language teachers. *The Aesthetics of Ambivalence* Brooks Landon,1992-08-30 Brooks Landon's book is wide-ranging, thought-provoking, and near state-of-the-art. It concerns science fiction film and, toward the end, almost becomes SF in its provocative speculations on the future of such film. His study is really two books in one. The first part argues that most criticism of SF film has been inadequate because it is based on literary rather than film-specific standards. The second argues that SF film will soon become either obsolete or be totally transformed through new computer technology. What ties them together is the author's concern with what might be called the SF ethos or SF thinking, so that science fiction can be seen to encompass not only SF in print, film, TV and comic books, but has become all-pervasive in contemporary culture. At present, Landon argues that SF film may have exhausted itself as a genre but new electronic technology--computer animation, interactive narratives, and virtual reality--promises to radically transform SF film and possibly create a synthesis of the

divergent trends of SF literature and film. Production technology has become the new story, one more interesting than the narrative it ostensibly supports. Landon believes we are at the threshold of a new age, similar to the pioneer years of filmmaking a hundred years ago.

The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. “This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way.” Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.
