Requiem for Nature John Terborgh, 1999-04 For ecologist John Terborgh, Manu National Park in the rainforest of Peru is a second home; he has spent half of each of the past twenty-five years there conducting research. Like all parks, Manu is assumed to provide inviolate protection to nature. Yet even there, in one of the most remote corners of the planet, Terborgh has been witness to the relentless onslaught of civilization. Seeing the steady destruction of irreplaceable habitat has been a startling and disturbing experience for Terborgh, one that has raised urgent questions: Is enough being done to protect nature? Are current conservation efforts succeeding? What could be done differently? What should be done differently? In *Requiem for Nature*, he offers brutally honest answers to those difficult questions, and appraises the prospects for the future of tropical conservation. His book is a clarion call for anyone who cares about the quality of the natural world we will leave our children. Terborgh examines current conservation strategies and considers the shortcomings of parks and protected areas both from ecological and institutional perspectives. He explains how seemingly pristine environments can gradually degrade, and describes the difficult social context –a debilitating combination of poverty, corruption, abuses of power, political instability, and a frenzied scramble for quick riches –in which tropical conservation must take place. He considers the significant challenges facing

existing parks and examines problems inherent in alternative approaches, such as ecotourism, the exploitation of nontimber forest products, sustainable use, and sustainable development. Throughout, Terborgh argues that the greatest challenges of conservation are not scientific, but are social, economic, and political, and that success will require simultaneous progress on all fronts. He makes a compelling case that nature can be saved, but only if good science and strong institutions can be thoughtfully combined.

Lighting the Corners Michael McClure, 1994 A luminous compendium of fascinating poetic and cultural history by one of our best and wisest bard/scholars. McClure's thinking is brave, obdurate, passionate, complex. This book sparkles with bright panoramic reminiscences, wit, juice, and vertebral insight. -- Anne Waldman

The Most Holy Trinity and the the Four Corners of the Universe James H.

Kurt,2009-02-11 How can what is always eternal be spoken of in temporal terms? How can God who is far above us all be upon this earth and found to be dwelling among us and how can we be a refl ection of Him? How can it be that God is in His Creation, and His Creation in God? Is the Father not the hidden One, from whom all things come? Is the Son not the saving One, by whom we are redeemed this day? Is the Spirit not the guiding One, through whom we shall come to Heaven? And are we not called to be as He is, one with the One LORD forever?

Noticing Nature Chuck Bonner,2008-12-09 A rocky hillside reveals the history and destiny of the universe. The drama of predator and prey plays out in a city park. A common typographical error brings you nose to nose with a wild deer. In the pages of Noticing Nature, you will see the natural world with new eyes and learn to notice the miracles disguised within the ordinary. Gather round the campfire and pull up a log to sit on. Make yourself comfortable, because Chuck Bonner has dozens of stories to tell that will make you laugh, and make you think, and make you wonder why you never noticed nature before.

Beveled Edges and Mitered Corners Mary Elizabeth Lee, 2015-07-09 The words have dried up, brittle as pine straw, scorched by summer sun, fragile as fleeting ashes of burning leaves. They bud, but this drought leaves them hanging on vines like dried string beans. They rattle in the wind, empty and noisy, dry and hard from lack of inspiration, dried seeds in summer gourds of poetry. Mary Elizabeth Lee relies on her experiences traveling country roads in North and South Louisiana and teaching students for many years to influence her first collection of poetry that reflects on people, nature, and the world around her. From a Sunday drive where pines whisper to the blue horizon to a majestic oak that has seen its time to a light rain that falls around Catfish Town, Lee shares a variety of relatable poems that shine a light on the wildlife and landscape she observed during her travels and also from her perch on her back porch. With a strong, distinctive voice, Lee also ponders life, death, and everything in between while exploring the power of love, friendship, heartbreak, and change. *Beveled Edges and Mitered Corners* is an insightful collection of poetry that mirrors one woman's walk through life as she encourages others to embrace all that life has to offer.

Jim Gilbert's Minnesota Nature Notes James R. Gilbert, Jim Gilbert, 2008 For more than thirty years Jim Gilbert has been observing the changing Minnesota seasons with the accuracy of a trained biologist and the rapt attention of a poet, while also keeping in touch with events in remote corners of the state through friendships developed during his weekly WCCO Radio call-in program. Now Jim shares the fruits of this experience with us in a series of brief essays and remarks focused on each passing week of the year--Back cover

I am learning the steppes - Student's activity book Food and Agriculture Organization of

the United Nations,Ministry of Agriculture and Forestry,2022-05-26 In the project, diverse educational programs are implemented for different target groups, including teachers, students, experts and decision makers responsible for the management of protected areas. An educational program was designed for students, including wall painting and drama activities with the artists, poetry and drawing competitions among schools, and a kite festival with the artists. Additionally, nature corners displaying the features of steppes were established in certain schools. As part of the education and awareness-raising program, an educational kit was prepared for teachers and students. This kit is a source document for increasing the knowledge, interest and awareness of children about the steppe ecosystems of ?anl?urfa. With this reference kit, you will be able to explore the diversity and importance of steppes from different perspectives such as history, biology, geography, sustainability, and climate change.

Nature's Twelve Louis Komzsik,2015-09-04 Have you ever wondered about our strong preference for the number twelve in our lives? Why are we measuring time in twelve hours and many other things in units of twelve? How about the many occurrences of geometric manifestations of twelve in nature? Is our geometry describing nature, or is nature imitating our geometry? If you have an enquiring mind and seek a better understanding of the peculiar roles of certain numbers in our universe, if you are intrigued by the philosophical historical- scientific perspective of the very interesting number twelve, this book is for you.

Mountains and Marshes David Rains Wallace,2015-12-01 Described as a writer in the tradition of Henry David Thoreau, John Muir, and other self-educated seers by the San Francisco Chronicle, David Rains Wallace turns his attention to one of the most distinctive corners of California: the San Francisco Bay Area. Weaving a complex and engaging story of the Bay Area from personal, historical, and environmental threads, Wallace's exploration of the natural world takes readers on a fascinating tour through the region: from Point Reyes National Park, where an abandoned campfire and an invasion of Douglas fir trees combusted into a dangerous wildfire, to Oakland's Lake Merritt, a surprising site amid skyscrapers for some of the best local bird-watching; from the majestic Diablo Range near San Jose, where conservationists fight against land developers to preserve species like mountain lions and golden eagles, to the Golden Gate itself, the iconic bridge that—geologically speaking—leads not to gold but to serpentine. Each essay explores a different place throughout the four corners of the Bay Area, uncovering the flora and fauna that make each so extraordinary. With a naturalist's eye, a penchant for local history, and an obvious passion for the subject, Wallace's new collection is among the first nature writing dedicated entirely to the Bay Area. Informative, engrossing, and exquisitely described, **Mountains and Marshes** affords unexpected yet familiar views of a beloved region that, even amidst centuries of growth and change, is as dynamic as it is timeless.
