Handbook of Humility Everett L. Worthington Jr.,Don E. Davis,Joshua N. Hook,2016-12-08 The Handbook of Humility is the first scholarly book to bring together authors from psychology as well as other fields to address what we know and don't know about humility. Authors review the existing research in this burgeoning field that has well over 100 empirical articles and an increasing trajectory of publication. This work should form the basis for research in humility for many years. In this book, chapters address definitions of humility that guide research. Authors also reflect on the practical applications of humility research within the areas they reviewed. The book informs people who study humility scientifically, but it is also an exceptional guide for psychotherapists, philosophers, religious and community leaders, politicians, educated lay people, and those who would like to fuel an informed reflection on how humility might make interactions more civil in relationships, organizations, communities, political processes, and national and international relations.

Communication in Palliative Nursing Elaine Wittenberg,Joy V. Goldsmith,Sandra L. Ragan,Terri Ann Parnell,2019-12-24 Communication in Palliative Nursing presents the COMFORT Model, a theoretically-grounded and empirically-based model of palliative care communication. Built on over a decade of communication research with patients, families, and interdisciplinary providers, and reworked based on feedback from hundreds of nurses nationwide, the chapters outline a revised COMFORT curriculum: Connect, Options, Making Meaning, Family caregivers, Openings, Relating, and Team communication. Based on a narrative approach to communication, which addresses communication skill development, this volume teaches nurses to consider a universal model of communication that aligns with the holistic nature of palliative care. This work moves beyond the traditional and singular view of the nurse as patient and family educator, to embrace highly complex communication challenges present in palliative care-namely, providing care and comfort through communication at a time when patients, families, and nurses themselves are suffering. In light of the vast changes in the palliative care landscape and the increasingly pivotal role of nurses in advancing those changes, this second edition provides an evidence-based

approach to the practice of palliative nursing. Communication in Palliative Nursing integrates communication theory and health literacy constructs throughout, and provides clinical tools and teaching resources to help nurses enhance their own communication and create comfort for themselves, as well as for patients and their families.

Transboundary Marine Spatial Planning and International Law Daud Hassan, Tuomas Kuokkanen, Niko Soininen, 2015-07-16 Marine Spatial Planning (MSP) is an integrated and comprehensive approach to ocean governance and is used to establish a rational use of marine space and reconcile conflicting interests of its users. MSP allows both a high level of environmental protection and a wide range of human activities and emphasizes coordinated networks of national, regional and global institutions. This book focuses on the framework of international law behind MSP and especially on the transboundary aspects of MSP. It first sets out a general framework for transboundary MSP and then moves on to compare and assess differences and similarities between different regions. Specific detailed case studies include the EU with the focus on the Baltic Sea and North Sea, the Bay of Bengal and Great Barrier Reef in Australia. The authors examine the national and regional significance of MSP from an integrated and sustainable ocean governance point of view. They also show how transboundary MSP can create opportunities and positive initiatives for cross-border cooperation and contribute to the effective protection of the regional marine environment.
