A Song for Europe Robert Deam Tobin, 2017-07-05 The world's largest and longest-running song competition, the Eurovision Song Contest is a significant and extremely popular media event throughout the continent and abroad. The Contest is broadcast live in over 30 countries with over 100 million viewers annually. Established in 1956 as a televised spectacle to unify postwar Western Europe through music, the Contest features singers who represent a participating nation with a new popular song. Viewers vote by phone for their favourite performance, though they cannot vote for their own country's entry. This process alone reveals much about national identities and identifications, as voting patterns expose deep-seated alliances and animosities among participating countries. Here, an international group of scholars from a variety of disciplines, including musicology, communications, history, sociology, English and German studies, explore how the contest sheds light on issues of European politics, national and European identity, race, gender and sexuality, and the aesthetics of camp. For some countries, participation in Eurovision has been simultaneously an assertion of modernity and a claim to membership in Europe and the West. Eurovision is sometimes regarded as a low-brow camp spectacle of little aesthetic or intellectual value. The essays in this collection often contradict this assumption, demonstrating that the contest has actually been a significant force and forecaster for social, cultural and political transformations in postwar Europe.

The Kiln Book Frederick L. Olsen, 2011-10-06 The Kiln Book is the definitive guide to pottery kiln construction. Since this breakthrough book was first published more than thirty years ago, it has shown generations of ceramicists how to build safe, economical, and fully functional kilns that meet their specific creative needs. The revised fourth edition continues to cover all aspects of kiln construction through step-by-step instructions and detailed diagrams, with new information on alternative fuels and the latest designs. In The Kiln Book, master potter and kiln builder Frederick L. Olsen thoroughly describes fundamental kiln construction methods and design principles in clear, straightforward language. No one has made more custom kilns in more countries than Olsen. His

kiln bible explains the inner workings of crossdraft, downdraft, updraft, and multidirectional draft kilns. It discusses the importance of proper masonry work and gives insights into the variety of refractory materials and their applications. The book also offers expert guidance on firing techniques and optimal firing schedules for various kiln styles. In addition to providing building guidance for the three major types of fuel-fired kilns, The Kiln Book includes information on electric kilns and other specialty designs. The practical instructions and illustrations are supplemented with tables, technical specifications, and other practical data. Richly illustrated with color photographs, building plans, and diagrams, The Kiln Book is an essential text for professional potters who want the freedom and control of firing works in their own kiln and for ceramics educators who wish to share the kiln-building experience with their students.

SeaClear Unleashed Richard Fairman,2010-07-06 SeaClear has been the favorite of yachtsmen worldwide for the past 15 years. It features all the bells and whistles of major chartplotters and navigation systems at a very low cost, in fact at no cost, as it is free to download and use from www.sping.com. Its major shortcoming has been the limited documentation supplied. SeaClear Unleashed brings you in depth information on using SeaClear in real life navigation situations. The unique tutorial led style written by a yachtman for yachtsmen unleashes the full potential of SeaClear.As a bonus, purchasers of SeaClear Unleashed get access to Video Tutorials and access to Online Help at a low price.
