Memo for Nemo William Firebrace,2022-10-04 A cultural history of living in the undersea, both fictional and real, from Jules Verne's Captain Nemo to NASA's ECC02 project. In Memo for Nemo, William Firebrace investigates human inhabitation of the undersea, both fictional and real. Beginning with Jules Verne's Captain Nemo—an undersea Renaissance man with a library of 12,000 volumes on his submarine—and proceeding through aquariums, undersea photography, artificial seas on land, nuclear-powered submarines, undersea film epics, giant squid, and NASA satellites, Firebrace examines the undersea as a zone created by exploration and invention. Throughout, the history of undersea life is accompanied by an imagined undersea, envisioned by cultural figures ranging from Verne and Herman Melville to Orson Welles and Jimi Hendrix. Firebrace takes readers through the enormous sequence of rooms (impossible in real life) in Nemo's submarine, recounts the competition among nineteenth-century cities to build the most spectacular aquatic world, and explains the workings of the bathysphere—an early underwater vessel modeled on a hot-air balloon. He considers the aquarium's function in films as a sort of viewing lens, describes the chlorine-proof artificial sea life seen by passengers on the submarine ride at Disneyland, and reports that Jacques Cousteau's famous underwater documentaries were in fact highly staged. The oceans of today are not those imagined by Verne; they are changing from both natural processes and human influence. Memo for Nemo documents the power of the undersea in both art and life.

Hunt and Kill Theodore P. Savas,2004-06-19 One of WWII's pivotal events was the capture of U-505 on June 4, 1944. The top secret seizure of this massive Type IX submarine provided the Allies with priceless information on German technology and innovation. After the war U-505 was transported to Chicago, where today 1,000,000 visitors a year pass through her at the Museum of Science and Industry. Hunt and Kill offers the first definitive study of U-505. The chapters cover her construction, crew and commanders, combat history, general Type IX operations, naval intelligence, the eight fatal German mistakes that doomed the boat, and her capture, transportation, and restoration for posterity. The contributors to this fascinating volume--a Who's Who of U-boat historians--include: Erich Topp (U-Boat Ace, commander of U-552); Eric Rust (Naval Officers Under Hitler); Timothy Mulligan (Neither Sharks Nor Wolves); Jak Mallman Showell (Hitler's U-boat Bases); Jordan Vause (Wolf); Lawrence Patterson (First U-boat Flotilla); Mark Wise (Enigma and the Battle of the Atlantic); Keith Gill (Curator, Museum of Science and Industry), and Theodore Savas (Silent Hunters; Nazi Millionaries).

The need for clarifying the concepts and the interlink between criminal and quasi-criminal enforcement is a topic attracting a lot of discussion and debate both in academia and practice across Europe (and beyond). Queer and Deleuzian Temporalities Rachel Loewen Walker, 2021-11-18 Rachel Loewen Walker's original study of Deleuze's theory of temporality advances a concept of the living present as a critical juncture through which novel meanings and activism take flight in relation to new feminist materialisms, queer theory, Indigenous studies, and studies of climate. Drawing on literature, philosophy, popular culture, and community research, Loewen Walker unsettles the fierce linearity of our stories, particularly as they uphold fixed systems of gender, sexuality, and identity. Treading new ground for Deleuzian studies, this book focuses on the non-linearity of the living present to show that everything is within rather than outside of time. Through this critical re-evaluation, which takes in climate change, queer and trans politics, and Indigenous sovereignty, *Queer and Deleuzian Temporalities* "thickens" the present moment. By opening up multiple pasts and multiple futures we are invited to act with a deepened level of accountability to all possible timelines.

Captain Nemo Kevin J. Anderson, 2019-12-11 A New York Times bestseller imagines the life of Jules Verne in this "rollicking whopper of a novel [that] glides down smoothly" (Publishers Weekly). Captain Nemo is the fictional life story of one of Jules Verne's most memorable characters from *20,000 Leagues Under the Sea* and *The Mysterious Island*. This alternate history covers his boyhood friendship with the dreamer, Jules Verne, adventures aboard sailing ships, battles with pirates, and survival on a mysterious deserted island. Each time he returns home to his beloved France, Captain Nemo shares the tales of his exploits with the struggling writer Verne. We follow Nemo's exploration of hidden caverns that lead to the center of the earth, travels across darkest Africa in a hydrogen balloon, and his imprisonment by an evil Ottoman caliph who commands the dark genius to construct a submarine boat, the *Nautilus*, in order to attack merchant ships that venture through the newly completed Suez Canal. "K. J. Anderson seamlessly blends events of Jules Verne's real life with the plotlines of his fictional works. His portrayal of Verne is masterful: a man able to break free from the circumstances that stifle him through his vivid imagination and the inspiration provided by his lifelong friend, Nemo." —Harry Turtledove, New York Times—bestselling author of *The Guns of the South* "A swashbuckling mix of Jules Verne, Daniel DeFoe, and Michael

Crichton.” –Terry Brooks, New York Times–bestselling author of The Sword of Shannara

Museums and Technologies of Presence Maria Shehade, Theopisti Stylianou-Lambert, 2023-09-07 In view of the ever-increasing use of interactive and emerging technologies in museum spaces, *Museums and Technologies of Presence* rethinks the role of such technologies as potential facilitators of presence and as vehicles for offering new, immersive, and embodied visitor experiences. This edited collection presents theoretical approaches and case studies that explore how presence can be experienced in museum spaces and what role technology can play in visitor experiences. It considers the theoretical underpinnings of the concept 'presence' for museum spaces, offering a critical examination of how immersive and other emerging technologies can affect, diminish or enhance our sense of presence and embodiment. Through an international range of case studies and innovative projects, this volume considers emerging technologies – including virtual reality, augmented reality, interactive (multisensory) installations, and AI – alongside different aspects of presence, including immersion, embodiment, empathy, emotion, engagement, and affect. Taking an interdisciplinary approach, *Museums and Technologies of Presence* will be beneficial to those researching or studying in the fields of Museum Studies, Digital Humanities, Computer Science, Information Science, and Digital Media. It will also be useful to museologists, curators, and artists who are interested in developing immersive experiences, experimental new media, and immersive aesthetics.

Derrida, Blanchot, and de Man, Zigarovich maintains that narrating death was important to the understanding of absence, separation, and displacement in an industrial and destabilized culture.

The Reality Bubble Ziya Tong,2019-05-14 WINNER OF THE 2020 LANE ANDERSON AWARD SHORTLISTED FOR THE 2020 RBC TAYLOR PRIZE From one of the world's most engaging science journalists, a groundbreaking and wonder-filled look at the hidden things that shape our lives in unexpected and sometimes dangerous ways. Our naked eyes see only a thin sliver of reality. We are blind in comparison to the X-rays that peer through skin, the mass spectrometers that detect the dead inside the living, or the high-tech surveillance systems that see with artificial intelligence. And we are blind compared to the animals that can see in infrared, or ultraviolet, or in 360-degree vision. These animals live in the same world we do, but they see something quite different when they look around. With all of the curiosity and flair that drives her broadcasting, Ziya Tong illuminates this hidden world, and takes us on a journey to examine ten of humanity's biggest blind spots. First, we are introduced to the blind spots we are all born with, to see how technology reveals an astonishing world that exists beyond our human senses. It is with these new ways of seeing that today's scientists can image everything from an atom to a black hole. In Section Two, our collective blind spots are exposed. It's not that we can't see, Tong reminds us. It's that we don't. In the 21st century, there are cameras everywhere, except where our food comes from, where our energy comes from, and where our waste goes. Being in the dark when it comes to how we survive makes it impossible to navigate our future. Lastly, the scope widens to our civilizational blind spots. Here, the blurred lens of history reveals how we inherit ways of thinking about the world that seem natural or inevitable but are in fact little more than traditions, ways of seeing the world that have come to harm it. This vitally important new book shows how science, and the curiosity that drives it, can help civilization flourish by opening our eyes to the landscape laid out before us. Fast-paced, utterly fascinating, and deeply humane, *The Reality Bubble* gives voice to the sense we've all had -- that there is more to the world than meets the eye.
