Nicomachean Ethics Aristotle, 2016-10-27 The Ethics of Aristotle is one half of a single treatise of which his Politics is the other half. Both deal with one and the same subject. This subject is what Aristotle calls in one place the philosophy of human affairs; but more frequently Political or Social Science. In the two works taken together we have their author's whole theory of human conduct or practical activity, that is, of all human activity which is not directed merely to knowledge or truth. The Nicomachean Ethics is the name normally given to Aristotle's best-known work on ethics. The work, which plays a pre-eminent role in defining Aristotelian ethics, consists of ten books, originally separate scrolls, and is understood to be based on notes from his lectures at the Lyceum. The title is often assumed to refer to his son Nicomachus, to whom the work was dedicated or who may have edited it (although his young age makes this less likely). Alternatively, the work may have been dedicated to his father, who was also called Nicomachus. The theme of the work is a Socratic question previously explored in the works of Plato, Aristotle's friend and teacher, of how men should best live. In his Metaphysics, Aristotle described how Socrates, the friend and teacher of Plato, had turned philosophy to human questions, whereas Pre-Socratic philosophy had only been theoretical. Ethics, as now separated out for discussion by Aristotle, is practical rather than theoretical, in the original Aristotelian senses of these terms. In other words, it is not only a contemplation about good living, because it also aims to create good living. It is therefore connected to Aristotle's other practical work, the Politics, which similarly aims at people becoming good. Ethics is about how individuals should best live, while the study of politics is from the perspective of a law-giver, looking at the good of a whole community.

The Magic Numbers of Dr. Matrix Martin Gardner, 2020-10-06 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume is a collection of Irving Joshua Matrix columns published in the magazine from 1960-1980. There were several collections of Dr. Matrix, the first in 1967; they were revised as Gardner reconnected with the good doctor over the years. This is the 1985 Prometheus Books edition and contains all the Dr. Matrix columns from the magazine.

Neo-Victorian Biofiction, 2020-09-07 Highlighting neo-Victorian biofiction's crucial role in reimagining and augmenting the historical archive, this volume explores the complex ethical consequences of a creative movement of historiographic revisionism, combining biography and fiction in a dialectic tension of empathy and voyeuristic spectacle.

Orphans Of Versailles Richard Blanke, 2014-07-15 The lands Germany ceded to Poland after World War I included more than one million ethnic Germans for whom the change meant a sharp reversal of roles. The Polish government now confronted a German minority in a region where power relationships had been the other way around for more than a century. Orphans of Versailles examines the complex psychological and political situation of Germans consigned to Poland, their treatment by the Polish government and society, their diverse strategies for survival, their place in international relations, and the impact of National Socialism. Not a one-sided study of victimization, this book treats the contributions of both the Polish state and the German minority to the conflict that culminated in their mutual destruction. Based largely on research in European archives, it sheds new light on a key aspect of German-Polish relations, one that was long overshadowed by concern over the German revanchist threat and the hostility that subsequently dominated the German-Polish relationship. Thanks to the new political situation in central Europe, however, this topic can finally be addressed evenhandedly.

Hottentot Venus Barbara Chase-Riboud, 2007-12-18 It is Paris, 1815. An extraordinarily shaped South African girl known as the Hottentot Venus, dressed only in feathers and beads, swings from a crystal chandelier in the duchess of Berry's ballroom. Below her, the audience shouts insults and pornographic obscenities. Among these spectators is Napoleon's physician and the most famous naturalist in Europe, the Baron George Cuvier, whose encounter with her will inspire a theory of race that will change European science forever. Evoking the grand tradition of such "monster" tales as

Frankenstein and The Hunchback of Notre Dame, Barbara Chase Riboud, prize-winning author of the classic Sally Hemings, again gives voice to an “invisible” of history. In this powerful saga, Sarah Baartman, for more than 200 years known only as the mysterious lady in the glass cage, comes vividly and unforgettably to life.

It offers focused discussions from comparative and transnational perspectives of the key themes and prevailing forms of opposition in the region, including non-conformist art, youth sub-cultures, intellectual dissent, religious groups, underground rock, avantgarde theater, exile, traditionalism, ethnic revivalism, censorship, and surveillance. The handbook provides its reader with a concise synthesis of the existing scholarship and suggests new avenues for further research.

Binding Chaos: Mass Collaboration on a Global Scale Heather Marsh, The world is long overdue for a completely new system of governance. If there was ever a need for political representation or a paternalistic and opaque authority, it has been removed by technology. Every political system we have tried has proven incapable of protecting human rights and dignity. Every political system we have tried has devolved into oligarchy. To effect the change we require immediately, to give individuals control and responsibility, to bring regional systems under regional governance, allow global collaboration and protect the heritage of future generations, we need a new political model.
