Book of Abstracts of the 69th Annual Meeting of the European Federation of Animal Science Scientific Committee, 2023-12-14

This Book of Abstracts is the main publication of the 69th Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming.

Conservation Science for the Cultural Heritage Evangelia A. Varela, 2012-12-15 Conservation Science is a rather innovative application of instrumental analysis with steadily increasing importance. Although the first attempts for preserving material from the cultural heritage on a scientific basis are found in the 19th century pioneer chemistry years, only the use of sophisticated physicochemical techniques results in effective identification and deterioration studies of monuments and objects, and in reliable intervention procedures. This volume allows to gain solid knowledge and improved skills on the ways separation schemes and diagnostic methodologies are applied in the safeguarding and authentication of tangible works of art; as well as on the modes of implementing novel safeguarding practices built on well-established principles – such as the use of laser in the decontamination of objects. All techniques are covered at a state-of-the-art level; while selected applications permit addressing major groups of materials and artefacts. Conservation Science is nowadays taught at master's level in all developed countries, and museum laboratories increasingly adopt scientific approaches in their restoration initiatives. The book is intended as a valuable tool for students and professionals active in these frames. In addition, it provides an indispensable manual for participants in the specialized intensive courses, which are

systematically offered by the authors under the auspices of the relevant European network.

Diversions of a Diplomat in Turkey Samuel Sullivan Cox, 1893

Diversions of a Diplomat in Turkey. By: Samuel S. Cox (illustrated) Samuel S. Cox, Abdul Hamid II, 2016-11-10 Samuel Sullivan Sunset Cox (September 30, 1824, Zanesville, Ohio - September 10, 1889, New York City) was an American Congressman and diplomat. He represented both Ohio and New York in the United States House of Representatives, and also served as United States Ambassador to the Ottoman Empire. Cox was the grandson of New Jersey Congressman James Cox. He was named for his maternal grandfather, Samuel Sullivan, who was Ohio State Treasurer in 1820-1823.[1] Cox attended Ohio University and Brown University, graduating from Brown in 1846. He practiced law in Zanesville and became the owner and editor of the Ohio Statesman, a newspaper in Columbus, Ohio. In 1855, he was secretary of the U.S. legation to Peru. Cox was elected to Congress as a Democrat in 1856, and served three terms representing Ohio's 12th congressional district and one representing the 7th district. After giving an impassioned speech in 1864 denouncing Republicans for allegedly supporting miscegenation (see miscegenation hoax), he was defeated for reelection and moved to New York City, where he resumed law practice. As slavery was already dead by the bullet, I figured it would be better to stop the bloodshed, he told a crowd seven years later. That mattered more than there mere empty, abstract ceremonial of burying the dead corpse of slavery. He returned to Congress after winning election in 1868 to New York's 6th congressional district. He served two terms, was defeated by Lyman Tremain in the New York state election, 1872, running for Congress at-large on the state ticket, but was elected to the vacant Congressional seat of the late James Brooks in 1873. Cox was then re-elected six times. In May 1885, Cox resigned his Congressional seat to accept appointment by President Grover

Cleveland as U.S. Ambassador to the Ottoman Empire, succeeding Lew Wallace. After serving for a year as Ambassador, he ran for Congress yet again, in a special election to fill the term of Joseph Pulitzer, who had resigned his seat; Cox was once again elected and served from the lower west side of Manhattan until his death on September 10, 1889. During his last term, he was chairman of the House Democratic Caucus.....Abdul Hamid II (21 September 1842 - 10 February 1918) was the 34th Sultan of the Ottoman Empire and the last Sultan to exert effective autocratic control over the fracturing state. He oversaw a period of decline in the power and extent of the Ottoman Empire, including widespread pogroms and government-sanctioned massacres of Armenians and Bulgarians, as well as an assassination attempt, ruling from 31 August 1876 until he was deposed shortly after the 1908 Young Turk Revolution, on 27 April 1909. In accordance with an agreement made with the republican Young Ottomans, he promulgated the first Ottoman constitution of 1876 on 23 December 1876, which was a sign of progressive thinking that marked his early rule. Soon, however, he claimed Western influence on Ottoman affairs and citing disagreements with Parliament,[4] Abdul Hamid suspended both the short-lived constitution and Parliament in 1878 and seized absolute power, ending the first constitutional era of the Ottoman Empire. Abdul Hamid's 1909 removal from the throne was hailed by most Ottoman citizens, who welcomed the return to constitutional rule after three decades.

The Practice of Tempera Painting Daniel Varney Thompson, 1962-01-01 Historical background, step-by-step instruction, materials, permanence. Lucid, careful exposition of all aspects of authentic technique. 85 illustrations.

Painter's Handbook Mark David Gottsegen, 2006-04-01 Much more than just another guide to artists' materials, The Painter's Handbook is an amazingly useful resource, with information on everything from the canvas up: the canvas itself,

plus paper, sizes and grounds, pigments and binders, solvents and thinners, varnishes and preservatives. Dozens of step-by-step recipes for make-it-yourself paints, pastels, varnishes, gessoes, sizes, supports, and equipment take this indispensable guide way beyond the competition. Authoritatively written by Mark David Gottsegen, chair of the federal government's ASTM committee on artist's materials, the revised Painter's Handbook considers the enormous changes in the art-materials world since the first edition was published in 1993. New materials, new health issues, new information on outmoded and even harmful supplies and practices mean that every painter needs a copy of The Painter's Handbook.

The Alchemy of Paint Spike Bucklow, 2009 A fascinating look at how pigments were created, used, and revered in the Middle Ages.

The Brilliant History of Color in Art Victoria Finlay, 2014-11-01 The history of art is inseparable from the history of color. And what a fascinating story they tell together: one that brims with an all-star cast of characters, eye-opening details, and unexpected detours through the annals of human civilization and scientific discovery. Enter critically acclaimed writer and popular journalist Victoria Finlay, who here takes readers across the globe and over the centuries on an unforgettable tour through the brilliant history of color in art. Written for newcomers to the subject and aspiring young artists alike, Finlay's quest to uncover the origins and science of color will beguile readers of all ages with its warm and conversational style. Her rich narrative is illustrated in full color throughout with 166 major works of art—most from the collections of the J. Paul Getty Museum. Readers of this book will revel in a treasure trove of fun-filled facts and anecdotes. Were it not for Cleopatra, for instance, purple might not have become the royal color of the Western world. Without Napoleon, the black graphite pencil might never have found its way into the hands of Cézanne.

Without mango-eating cows, the sunsets of Turner might have lost their shimmering glow. And were it not for the pigment cobalt blue, the halls of museums worldwide might still be filled with forged Vermeers. Red ocher, green earth, Indian yellow, lead white—no pigment from the artist's broad and diverse palette escapes Finlay's shrewd eye in this breathtaking exploration.

Tempera Painting 1800-1950 Patrick Dietemann, Wibke Neugebauer, Heike Stege, Eva Reinkowski-Häfner, Renate Poggendorf, 2019 The papers and posters in this volume were presented at the conference 'Tempera painting between 1800 and 1950 Experiments and innovations from the Nazarene movement to abstract art held at the Doerner Institut, in cooperation with the Academy of Fine Arts, Munich. They explore the revival of tempera painting between 1800 and 1950 from the perspectives of art history, technical art history, conservation and scientific analysis.

Solvent Gels for the Cleaning of Works of Art Dusan Stulik, 2004 The cleaning of a work of art often involves removing not only dirt and grime but also unwanted layers of varnish, gilding, and paint from the work's surface. The challenge for conservators lies in finding a cleaning agent that will act on one layer without affecting the layer being preserved and without leaving any harmful residues on the cleaned work. This book, which examines gel cleaning in the treatment of paintings and painted works of art, presents the methodologies, data, and results of a collaborative project of the Getty Conservation Institute and Winterthur Museum. Among the issues covered are the theory and application of gel cleaning systems, the detection of residues left on the surfaces of objects cleaned with these systems, research into solvent-gel and solvent residues, stability of surfactants during natural and artificial aging, and recommendations for formulating gels for specific cleaning tasks.

Materials for Conservation C V Horie, 2013-10-22 Materials for Conservation: Organic Consolidants, Adhesives and Coatings provides an overview of one aspect of materials conservation treatment, particularly the properties of organic consolidants, adhesives, and coatings. The contents of the book are divided into two parts; these parts are background information and survey of polymers. The coverage of the first part includes polymer science and the uses and requirements of applied polymers. The second part covers resins, vinyl, thermoplastics, fillers, and colorants. The text will be most useful to individuals involved in the management and conservation of historic materials, such as museum curators. Materials engineer and polymer chemists will also benefit from the book.

Field Crops , 1996

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Introduced Mammals of the World John L Long, 2003-08-14

Winner in the Scholarly Reference section of the 2004 Australian Awards for Excellence in Educational Publishing. Introduced Mammals of the World provides a concise and extensive source of information on the range of introductions of mammals conducted by humans, and an indication as to which have resulted in adverse outcomes. It provides a very valuable tool by which scientists can assess future potential introductions (or re-introductions) to avoid costly mistakes. It also provides tangible proof of the need for political decision makers to consider good advice and make wise and cautious decisions. Introduced Mammals of the World also provides a comprehensive reference to students of ecological systems management and biological conservation. This book is a companion volume to Introduced Birds of the World, by the same author, published in 1981, and which remains the premier text of its kind in the world more than twenty years after it was published. Introduced Mammals of the World provides the most comprehensive account of the movement of mammals around the world providing details on the date(s) of introduction, the person/agency responsible, the source populations, the location(s) of release, the fate of the introductions, and the impact if known, for over 300 species of mammal.

Cleaning Painted Surfaces Richard Wolbers, 2000 This book contributes significantly to the selection of appropriate and controllable cleaning methods for varnished and unvarnished paint surfaces. It is a distillation of many years' experience of formulating a cleaning treatment for any given object. The general principles of the chemistry and the practical applications are described. The methods are applicable to the surface cleaning of both traditional and modern paint media found on sculptures, ethnographic materials, paintings, gilded surfaces and furniture. Aqueous methods are certainly worth considering for those surfaces which cannot be cleaned safely by methods based on

solvents.
