Regularization in Orbital Mechanics Javier Roa,2017-09-25 Regularized equations of motion can improve numerical integration for the propagation of orbits, and simplify the treatment of mission design problems. This monograph discusses standard techniques and recent research in the area. While each scheme is derived analytically, its accuracy is investigated numerically. Algebraic and topological aspects of the formulations are studied, as well as their application to practical scenarios such as spacecraft relative motion and new low-thrust trajectories.

Readings in Cyberethics Richard A. Spinello,Herman T. Tavani,2004 This book of readings is a

flexible resource for undergraduate and graduate courses in the evolving fields of computer and Internet ethics. Each selection has been carefully chosen for its timeliness and analytical depth and is written by a well-known expert in the field. The readings are organized to take students from a discussion on ethical frameworks and regulatory issues to a substantial treatment of the four fundamental, interrelated issues of cyberethics: speech, property, privacy, and security. A chapter on professionalism rounds out the selection. This book makes an excellent companion to *CyberEthics: Morality and Law in Cyberspace, Third Edition* by providing articles that present both sides of key issues in cyberethics.

Teaching and Researching: Motivation Zoltán Dörnyei, Ema Ushioda, 2013-11-26

Cultivating motivation is crucial to a language learner's success - and therefore crucial for the language teacher and researcher to understand. This fully revised edition of a groundbreaking work reflects the dramatic changes the field of motivation research has undergone in recent years, including the impact of language globalisation and various dynamic and relational research methodologies, and offers ways in which this research can be put to practical use in the classroom and in research. Key new features and material:

- A brand new chapter on current socio-dynamic and complex systems perspectives
- New approaches to motivating students based on the L2 Motivational Self System
- Illustrative summaries of qualitative and mixed methods studies
- Samples of new self-related motivation measures

Providing a clear and comprehensive theory-driven account of motivation, *Teaching and Researching Motivation* examines how theoretical insights can be used in everyday teaching practice, and offers practical tips. The final section provides a range of useful resources, including relevant websites, key reference works and tried and tested example questionnaires. Written in an accessible style and illustrated with concrete examples, it is an invaluable resource for teachers and researchers alike.
