*Passive and Active Network Measurement* Mark Claypool,Steve Uhlig,2008-04-29 The 2008 edition of the Passive and Active Measurement Conference was the ninth of a series of successful events. Since 2000, the Passive and Active M-surement (PAM) conference has provided a forum for presenting and discussing

innovative and early work in the area of Internet measurement. PAM has a tradition of being a workshop-like conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis techniques. This year's c- ference was held in Cleveland, Ohio. PAM2008's call for papers attracted 71 submissions. Each paper was ca- fully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers. The papers were - ranged into eight sessions covering the following areas: addressing and topology, applications,classi?cationandsampling,measurementsystems andframeworks, wireless 802.11, tools, characterization and trends, and malware and anomalies. **Computer Performance Optimization** Wolfgang W. Osterhage,2014-07-08 Computing power performance was important at times when hardware was still expensive, because hardware had to be put to the best use. Later on this criterion was no longer critical, since hardware had become inexpensive. Meanwhile, however, people have realized that performance again plays a significant role, because of the major drain on system resources involved in developing complex applications. This book distinguishes between three levels of performance optimization: the system level, application level and business processes level. On each, optimizations can be achieved and cost-cutting potentials can be identified. The book presents the relevant theoretical

background and measuring methods as well as proposed solutions. An evaluation of network monitors and checklists rounds out the work.

**Youth and the National Narrative** Marie Lall,Tania Saeed,2019-11-28 The role of the security establishment in Pakistan has been strengthened in a post-Musharraf era as social institutions are increasingly drawn into the security agenda. Pakistan's problems are often explained through the lens of ethnic or religious differences, the tense relationship between democracy and the Pakistan military, or geopolitics and terrorism, without taking into account young citizens' role in questioning the state and the role of the education system. Based on new research and interviews with more than 1900 Pakistanis aged 16-28 the authors examine young people's understanding of citizenship, political participation, the state and terrorism in post-Musharraf Pakistan. The authors explore the relationship between the youth and the security state, highlighting how the educational institutions, social media, political activism and the entire nature of the social contract in Pakistan has been

increasingly securitized. The focus is on the voices of young Pakistanis, their views on state accountability (or lack thereof), political literacy and participation, and the continued problem of terrorism that is transforming their views of both their country and the world today. With 67% of the country's population under the age of 30, this book is a unique window into how Pakistan is likely to evolve in the next couple of decades.
